Market, Financial and Industrial News of the Day

Omaha Grain

Omaha, Sept. 22.—

The more serious aspect of the near eastern situation was reflected in sharply higher Liverpool cables and Omaha market followed with a higher range of values. Export demand was rather slow and mainly for Manitobas.

Receipts of wheat at Omaha was 87 cars against 76 cars, corn 42 cars against 28 cars, oats 21 cars against 10 cars last year, rye and barley receipts small. Total shipments were only 88 cars as compared with 146 cars a year ago.

There was a very good demand for cash wheat on the Omaha floor and prices were quoted 1 to 2 cents higher than yesterday. Corn sold readily, being generally 1 cent higher. Oats were unchanged to 1-2-cent up. Rye was quoted 1 cent higher and barely 1 to 2 cents higher.

Chicago Grain

By CHARLES D. MICHAELS.
Omaha Bee Leased Wire.

Chicago, Sept. 22.—All grains sold at a new high on the present movement, May corn was at the best price of the season. The rise was in response to the more warlike news from abroad. An overbought condition developed as the result of the swift upturn. The finish was on a good reaction, but net gains were 1¼@2½c on wheat, ¼@½c on oats and ⅛@1c on rye. Corn was unchanged to ⅛c higher.

Winnipeg led the early advance in wheat and at the top showed 3⅝@4⅛c higher, compared with a gain of 3@3⅛c here. Foreigners bought futures freely at Winnipeg, and to some extent in Chicago. The action of Liverpool in closing 2@3d higher on the political news and scarcity of cash wheat, was the bullish influence that attracted considerable attention. It is the first time that the near east situation has had any great effect there.

A majority of the local traders were bullish. Shorts covered freely, weakening the technical position. When profit taking started, the support was not aggressive until prices had dropped more than 1 cent from the early top. Toward the close there was a return of pressure, due to evening up as general expectations are for very rapid fluctuations. Export sales of cash wheat were not large. Houses with eastern connections were persistent buyers of futures.

September Wheat Tight.

September wheat at Chicago acted tight and closed 5c over December, all deliveries being the highest since early in August. Reports as to the flour demand showed more liberal sales in the northwest and southwest, some going for export from St. Louis. Local receipts were 43 cars.

Coarse grains derived considerable strength from sympathy with wheat. Outside trade has broadened. There was a good early run on commission house buying account. On the bulge profit taking by local longs and also some pressure from houses with country connections checked the advance and all action came toward the last with wheat. December corn sold up to 59¾c, and closed 1c under that figure. Exporters took 150,000 bushels corn here and domestic sales were 200,000 bushels corn and a like quantity of oats. Receipts 299 cars corn and 119 cars oats.

Selling of rye against purchases of wheat and pressure from Duluth which was hedging cash grain made an easier market. Scattered longs in the September sold rather freely. Exporters took 50,000 bushels here while a fair demand was in evidence at the seaboard. The two northwestern markets received 130 cars.

Pit Notes.

Duluth has been buying liberal quantities of cash wheat at Minneapolis recently. It is understood that the cash grain in the latter market was due to mills holding off because of the reduction of 5c per bushel in the tariff put Canadian wheat just about on an import basis.

Reports regarding export demand for wheat at the seaboard were mixed. One message said all offers of Manitobas to the United Kingdom had been accepted, while another claimed France was offering to pay a premium to defer shipment of September purchases, showing no immediate scarcity.

A decrease of possibly 10 per cent or more in the winter wheat acreage in Kansas and Oklahoma is suggested by reports to the Modern Miller. The area seeded promises to be above the average in the territory east of the Mississippi river.

Owing to the scarcity of cars in the southwest, Kansas City cash grain handlers have appealed to the American railway association for help. The Union Pacific is said to be furnishing cars promptly, while other roads supply 2a to 50 per cent of their orders.

Traffic departments of the Chicago & Northwestern, the St. Paul and the Chicago & Black Island railroads have promised to try and rush forward all loaded grain cars destined for Chicago, to get the grain unloaded and thereby help relieve the shortage in cars in the west.

NEW YORK TIMES.
Omaha Bee Leased Wire.

New York, Sept. 22.—What may be called the secondary war scare over the Turkish dispute probably had some influence on financial markets, but its result was uncertainty and irregularity rather than actual weakness. On the Stock Exchange there was quite as much evidence, during the day, of speculators repurchasing on the decline, what they had previously sold, as there was of new professional selling. The market was in fact greatly confused all day; it closed with as many advances as declines from Thursday's final prices and with the advances on the whole more substantial than the declines.

Foreign markets moved in much the same way as our own; that is to say, they were irregular and undecided, but not distinctly weak, which would appear to mean that the decline in prices earlier in the week had fairly "discounted" whatever was unpleasant in the European political situation, also that little or no fresh apprehension had been caused by today's cabled view of affairs from Constantinople.

Sterling Loses Cent.

One interesting fact in the day's financial markets was the moderate recovery in the sterling exchange along with the loss of the previous day's 1 cent recovery by sterling. It has become rather evident that sterling is now bearing the brunt of the pressure caused by remittances from the European markets to provide for their purchases of produce in this country.

Prices in today's bond market moved as inconsistently, with one another as did prices of stocks. French bonds, which had advanced the day before declined again today as did the United Kingdom bonds.

As a whole, the day's financial movement indicated little except the divergent and conflicting views of speculators, with the attitude of real investors not in evidence. The 6 per cent Stock Exchange call money market of the day before was not repeated. As a matter of fact, the disposition was to lay more stress, as a cause for Thursday's tightening market, on the sudden demand for money to take out merchandise from bond in anticipation of the higher duties than on withdrawal by inland banks.

Wall Street Topics.

Standard Oil company of New Jersey was one of the features of the listed standard stocks, gaining 3¼ points net and selling within striking distance of the high level of the year. The rise in the stock, according to Wall street opinion, is based upon the belief that the company, probably within the next six months, will make an extra distribution in the form of a stock dividend or an extra dividend in cash.

The report was also circulated declaring that the company contemplated a readjustment of the capitalization and increasing it $1,000,000,000. This report was followed by an official denial by the company, but Wall street paid little attention to the denial. New Jersey strength was followed by an advance in other standard stocks, but some issues in the group sold off on profit-taking.

New York Bonds

New York, Sept. 22.—Depression in the prices of foreign bonds, in response to the weakened exchange rate and strain over the near eastern situation, was the outstanding development in today's comparatively active bond market.

Losses of 1 to nearly 1½ points took place in Queensland 5s, Japan 4s, French 4½s, Belgium 7½s and Serbs 1s, while substantial fractional reactions took place in United Kingdom 2½s of 1937, Queensland 5s, Dutch East Indies 6s of 1941, Argentine 5s and Rio de Janeiro 8s. Cuba Government 4½s, Cuba Government 4½s fell nearly 4 points.

Weakness in foreign issues extended to the domestic list. St. Paul convertible 4½s dropping 1¾ and declines of a point taking place in Minneapolis and St. Louis refunding 4s. Atchison adjustment 4s stamped, Chesapeake & Ohio convertible 5s, Norfolk & Western convertible, Pennsylvania General 5s, New Haven convertible 6s, Inslerbile Oil 5s and Chile Copper 7s. There were a few exceptions to the downward trend. Distillers' securities is pushed forward 2½ points more, representing a gain of 14 points during the week and 58 above the year's low. Northern Oh
