# GRAIN AND PRODUCE MARKET

## Wheat Continues to Be the Feature of Trade.

## PRICE HIGH, DEMAND IS GOOD

### All Offerings Are Taken—Market Shows Nervousness, with the Tendency Ever Toward the Top.

OMAHA, April 12, 1909.

There were no cables this morning, it being a holiday abroad. The outlook is unchanged in wheat and a nervous market is still on. It looks like high prices will prevail until the production is increased. The cash market is very strong, with a well developed demand.

Receipts of corn are moderate, but there is a better demand and eastern inquirers are developing, which should decrease stock shortly. Liquidation is heavy in the May option, but no decided decline is expected.

Wheat was strong, but ruled nervous, advancing and declining 1c rapidly, with a trend upward. Cash wheat brought record prices and offerings on the floor were snapped up at prices unheard of on this market. May wheat opened at $1.20 and closed at $1.21¼.

Corn ruled steady, with no material change. Country shippers are doing practically nothing, while spring farm work is being pushed, with no deliveries being made. Cash demand is better and with light receipts should advance prices. May corn opened at 62⅛c and closed at 62½c.

Primary wheat receipts were 430,000 bu. and shipments were 421,000 bu., against receipts last year of 242,000 bu. and shipments of 309,000 bu.

Corn receipts were 319,000 bu. and shipments were 369,000 bu., against receipts last year of 412,000 bu. and shipments of 378,000 bu.

No cables, holiday.

### CHICAGO GRAIN AND PROVISIONS

#### Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, April 12.—Wheat prices on the board continued the record-breaking advance today, all deferred futures rising to new high marks for the season, while the May delivery equalled the previous best mark. At the top July sold at $1.10⅝, and September at $1.09. Corn closed firm, oats steady and provisions strong.

It was a fierce speculative market in wheat during the greater part of the day and prices moved over a range of 1c to 2⅝c. Interest again centered around the more deferred futures and trade in May delivery was light. Despite beneficial rains in the southwest sentiment regarding the new crop months was extremely bullish and prices were easily forced more than 1c above the previous high point for the season. The market opened irregular, with prices ⅜c higher to ⅛c lower compared with Saturday's close, July being at $1.14⅜@1.15 and September at $1.07⅛@1.07½. There was considerable selling based on the wet weather in the winter wheat territory, and early in the session July dropped back to $1.14⅜c. Before the end of the first half hour, however, leading bulls began to buy, and prices advanced rapidly. There was also a big investment demand from outsiders. The market was bullishly affected by an active demand for the cash grain, local sales aggregating 215,000 bu. The top for July was reached at $1.16⅝, and for September at $1.09. During the day May sold between $1.25⅝ and $1.18⅝. Trade quieted down during the final half hour for the session and prices reacted materially from the top on realizing sales. The close was rather slow, with net gains for the day of ⅜c to 1¼c, with July at $1.16¼ and September at $1.08⅝@1.08¾. May closed at $1.26¼.

Trade in the corn market was dull and sentiment in the pit was quite heavy at times, although the close was firm at net gains of ⅛@⅜c compared with Saturday's final quotations. May ranged between 66⅛c and 66⅝@66⅜c and closed at 66⅜c.

The feature of trade in the oats pit was heavy selling of the May delivery by commission houses in general. The close was small, the May delivery being easy, while the new crop months were firm. May closed at 54⅝.

Provisions were strong throughout the entire day. At the close prices were 2½@5c to 17½c higher than Saturday's final quotations.

The leading futures ranged as follows:

# NEW YORK STOCKS AND BONDS

## Operations for an Advance Are Renewed with Fresh Confidence.

## UNITED STATES STEEL LEADS

### These Issues Advance Because of Proposed Action of Senate on Duty on Iron Ore—Close Irregular, with Net Gains.

NEW YORK, April 12.—Speculative operations for the advance were renewed with fresh confidence today in the stock market and prices were carried comprehensively upward on a large and varied volume of business. The hesitation manifest last week on account of the approach of the three days' vacation was largely dissipated with the passing of the holiday, although the great foreign markets were still in recess and took no part in the day's dealings in this market. This deducted a considerable volume of activity from the market, the operations for foreign account having constituted an important influence in the market for some time past. The speculative element at home seemed content to carry forward the movement without waiting for the foreigners to declare themselves.

The industrials and specialties still held a conspicuous place in the day's most notable movements, but not so entirely to the exclusion of the standard trading stocks as was the case on Thursday before the holiday. There was appreciable improvement in the market in this respect, with the course of the day. The prompt emergence from the senate committee on finance of the amended tariff bill created a good impression, without much regard to the changes in the rates proposed, the promise of dispatch in the progress of the bill being more considered than the substance of the changes. The restoration of iron ore to the dutiable list, as proposed in the senate amendment, induced an active demand for United States Steel, and this had a sympathetic effect in reviving demand for the whole list. Another wave of activity was set in motion by the news that the supreme court's decision on the validity of the commodities clause of the Hepburn law was still withheld. Reading rose vigorously, as has become the rule with the weekly passing of the expected delivery of this opinion. Reading was helped also by the belief that satisfactory terms would be made with the anthracite miners in the negotiations now going on for an agreement on wages. The feeling regarding the steel trade was improved in sympathy. The statistics of surplus cars compiled fortnightly by the American Railway association made a less favorable exhibit of trade conditions, the number of idle freight cars having increased again for the half month ending March 31 to the number of 5,182. This was in spite of a reduction of upward of 14,000 in idle coal cars, owing to the rush to stock up coal in face of a possible miners' strike. The falling off in the general merchandise movement and other traffic, therefore, must have been considerable. Some of the day's reports from the crop regions were disliked in connection with the continued firmness of the wheat market. The tone of the market developed considerable irregularity in the late dealings, but many substantial gains were left for the day's showing.

Bonds were active and strong. Total sales, par value, $8,350,000. United States bonds were unchanged on call.
