GRAIN AND PRODUCE MARKET

Wheat Prices Going Up, Owing to Uneasy News.

CORN—PRICES STEADY AND UP

Farmers Too Busy with Harvest of Wheat and Oats to Deliver Their Surplus Corn and Prices Are Bullish.

OMAHA, July 14, 1910.

Cables were higher again today and reports show great weakness over the Russian crop news. Crop news from the spring wheat belt continues bullish and experts are claiming with the best of growing weather the northwest crop will be a short one. Country offerings are still light and cash premiums are steady to higher.

Despite the very favorable outlook for the growing corn, prices are being well sustained. Farmers are too busy with wheat and oats harvest to deliver their surplus corn and the active cash demand is surprisingly strong.

Wheat futures worked steadily higher throughout the session. Crop estimates on the spring wheat are coming in and the trade is more bullish. With a very light crop in the northwest the pressure of winter wheat is not likely to be felt to any great extent.

The corn market holds firm on the strength in wheat. Corn is receiving good support regardless of the bearish crop reports, and cash handlers are finding it difficult to supply the demand with present light receipts.

Primary wheat receipts were 412,000 bu., and shipments were 525,000 bu.; against receipts last year of 290,000 bu. and shipments of 152,000 bu.

Primary corn receipts were 323,000 bu., and shipments were 798,000 bu.; against receipts last year of 365,000 bu. and shipments of 342,000 bu.

Clearances were 1,000 bu. of corn, none of oats, and wheat and flour equal to 15,000 bu.

Liverpool closed ¼d to 1¾d higher on wheat, and ½d to 1¼d higher on corn.

WEATHER IN THE GRAIN BELT

Indications for Fair and Warmer Tonight and Friday.

OMAHA, July 14, 1910.

Thunder showers were quite general throughout the Missouri valley last night, and rains continue along the river from Sioux City to Kansas City this morning. No heavy rainfalls occurred in Nebraska, as shown by our reports, but the showers were fairly well distributed, especially over the eastern portion of the state. A fall of 1.75 inches occurred at Sioux City, Ia., and 2.12 inches at Lisbon, N. D. Local showers also occurred in the lower Ohio and Mississippi valleys, and some heavy rainfalls are reported in eastern Tennessee and North Carolina. A fall of 1.38 inches occurred at Knoxville, Tenn., and 2.30 inches at Raleigh, N. C. No important change in temperature has occurred in any section since the preceding report. A very slight fall is shown in the middle Atlantic states and extreme northwest, and a slight but general rise is noted from the Rocky mountains east over the central valleys and lake region. While the weather will probably continue somewhat unsettled throughout this vicinity today, the indications are that it will be fair and continued warm tonight and Friday.

NEW YORK STOCKS AND BONDS

Caution Results in Dull Market for Day Without Price Drop.

UNDERTONE OF CONFIDENCE

Copper Stocks Show Relief from Bear Pressure and Remove Depressing Influence from the Market.

NEW YORK, July 14.—Extreme caution was manifest in the conduct of speculative transactions in stocks today. It was into that accounted for the ominous of the market rather than any amounts neglect. Signs of obstacles which appeared in the course of a price movement in either direction discouraged the pursuit of operations for any long time. A rise in prices got away from the level of any effective demand and a sag resulted. When the uncovered bears bid for stocks, however, they complained of difficulty in securing them and cover the market oversold. The demand from this and more substantial sources was effective at price recessions and buttressed the market against a fall and opened the way to successive recoveries. The closing was fairly strong.

The action of the Interstate Commerce commission in favor of suspension was important, and general rate advances proposed by the railroads was discussed more in a strained attempt to interpret its significance towards the final decision on the reasonableness of the advances asked than for its face value. The refusal to suspend the advances in suburban passenger rates out of New York was regarded so far favorable to the railroads, but the determination to assume jurisdiction of the question and to proceed to consider the reasonableness of the advance was against the contention of the railroads. The supposition was prevalent that the postponement of the rate advances might not be the full time for all of these to be considered, different tariffs being passed on and decided serially. This prospect was regarded favorably. There is a feeling of confidence, also, that advances will be allowed ultimately. These assumptions contributed to the undertone of strength in the stock market.

The vote to authorize a strike by Pennsylvania railway employes was reflected only in a neglected and almost motionless state of that stock. A settlement was expected and the belief that wage advances would be conceded was joined to the confidence felt over allowance of advance in freight rates.

The copper industrials showed some relief from the pressure to which they had been subjected recently, and this took out of the general market a sympathetic influence towards depression. The metal in the London market at the same time showed some recovery.

The maintenance of the Bank of England official discount rate proved ineffective in holding the private discount rate, in spite of repayments of upwards of $25,000,000 to market indebtedness to the bank. The renewal of government treasury bonds supplied resources to the money market for this purpose. Further large maturities of treasury bills are in immediate prospect. Sterling exchange declined here to a new low level, in consonance with the condition in London, indicating the prospect of further imports of gold to New York.

Bonds were irregular. Total sales par value $1,892,000. United States bonds were unchanged on call.
