GRAIN AND PRODUCE MARKET

Sentiment Favors the Bears at the Opening on Wheat.

CORN IS STRONG AND HIGHER

Receipts Are Light and the Cash Demand is More Active, Giving the Market a Snappy Tone.

OMAHA, March 10.

Cables on wheat were lower at the opening and sentiment was favoring the bear side of the market, but millers were reported to be better buyers of the cash because of an improvement in the flour business. There were also complaints on slow seed germination in the south and some Hessian fly damage talk from Illinois and Indiana.

Corn is a fighting market at this level. The probability that the greatly discounted cash prices will work higher owing to the light receipts is the feature of the bull argument, while sellers are relying on the depression of other grains to aid in a decline.

While there was no general awakening in the cash situation wheat buyers had orders of good character and shorts were numerous after the first advance and forced the market higher. Offering of cash stuff on the floor was light and was taken by receivers.

Corn ruled strong and higher, helped by the advance in wheat. Receipts are light and the cash demand was more active, giving the market a snappy tone with values ¼@¾c higher.

Oats and shipments were 319,000 bushels, against receipts last year of 656,000 bushels and shipments of 354,000 bushels.

Primary corn receipts were 256,000 bushels and shipments were 129,000 bushels, against receipts last year of 521,000 bushels and shipments of 460,000 bushels.

Clearances were 327,000 bushels of corn, 1,000 bushels of oats and wheat and flour equal to 95,000 bushels.

Liverpool closed ¼d lower on wheat and unchanged on corn.

The following cash sales were reported:

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, March 10.—Fear concerning the Hessian fly in parts of Illinois and Indiana sent wheat soaring today. Texas reports of abnormally hot weather had a similar effect. In consequence the market closed strong 1½c to 1¾@1¾c higher than last night. Latest figures showed an advance, too, in every other leading staple—corn, ¾@1¼c; oats, ½c to ¾@¾c, and hog products 2½@5c to 17½@20c.

Good buying of wheat was in evidence all day. Shorts, who oversold on yesterday's slump, were uneasy from the start. In addition, larger professional speculators took advantage of the opportunity and followed the course of commission purchasing, which in itself reached a big total. New investors directed their efforts in the main to the July delivery. As a result that month made a better relative gain than May. Primary receipts and the world's supply exhibited a substantial reduction as compared with last year. And there was only the faintest response by Liverpool to yesterday's hard smash at prices in America. From the opening until the pit was cleared the advance suffered no important stop. May ranged between 90¾@92½c, closing like 90¾c.

Cash corn advanced 1c in the sample market, eastern demand improving a little. May fluctuated from 46¾@46c and closed steady at 46¾c, a rise of 1@1¼c over last night. No. 2 yellow closed at 47¼@47½c.

Oats rose in sympathy with corn. High and low limits for May were 35¼c and 35¼@35½c, with the close ¾@⅞c above the figures of the last sales current twenty-four hours before.

Higher hogs and grain and better call at the south made provisions firm. The final outcome was a gain all around—pork, 5c to 17½@20c; lard, 2½@5c, and ribs, 5c to 7½@10c.

WEATHER IN THE GRAIN BELT

Temperatures Fall in Upper Valleys of Rivers.

OMAHA, March 10, 1911.

The weather continues unsettled in the extreme upper portion of the Ohio valley and the eastern states. Light precipitation was general over that section within the last twenty-four hours and light rain is falling in New York City this morning and light snows are reported in the St. Lawrence valley. Except considerable cloudiness that prevails in Nebraska, the weather is generally clear throughout the central valleys. It is still unsettled in the western portion and light and scattered precipitation occurred within the last twenty-four hours in the southwest and along the Pacific coast. Temperatures are lower this morning in the upper lake region, the upper Mississippi and upper Missouri valleys and along the middle and southern Rocky mountain slope and are higher in the eastern and south Atlantic states and on the Pacific slope. A depression of decided energy has appeared in the extreme northwest and is extending down toward the central valleys and will cause cloudy and somewhat unsettled weather in this vicinity tonight and Saturday, with no important change in temperature.

NEW YORK STOCKS AND BONDS

All Issues Hold Close to Prevailing Level of Week.

MISSOURI PACIFIC IS FIRMER

Better Understanding of Mexican Situation Results in Some Improvement in Shares of Railway.

NEW YORK, March 10.—Stocks held close to the prevailing level of the last week through today's session. It was another dull day and the total of sales, established another low record. In such stocks as Baltimore & Ohio, Denver & Rio Grand, common, Louisville & Nashville and Western Union there was not a sale during the session. Canadian Pacific was strong all day, rising to a new high record.

Holders of Missouri Pacific were disposed to exact better prices on account of indications that control of the property may not have been settled so definitely as was believed. Better understanding of the Mexican situation resulted in some improvement in Mexican railway shares.

The United States Steel corporation's report of unfilled orders at the end of February showing a gain of nearly 250,000 tons, was accepted favorably.

Traders bought steel shares freely during the morning expected a more marked increase than was shown and steel common sold off on publication of figures. The drop in steel arrested the slow improvement which was in progress through the rest of the list.

Known money movements of the week indicate a loss in cash by the banks, the first in several months. The loss in interior points and to the sub-treasury is estimated at more than $4,000,000.

Bonds were steady; par value, $2,112,000.

United States bonds were unchanged on call.
