FINANCE AND COMMERCE.

[For some unknown reason the telegraph company failed to furnish all the regular market reports last night. Below will be found those received up to 1 a. m.]

FINANCIAL.

NEW YORK, October 1.

Money—Easy at 2@2½ per cent., closed at 3½ per cent.

Prime Paper—6@7 per cent.

Exchange bills—Firm at 4.82½; demand, 4.85½.

Governments—Strong.

Stocks—The market was dull throughout the day. Before the first call there was an improvement of ¼ per cent, Northwestern, Northern Pacific, Oregon Transportation and Western Union leading, followed by a reaction later on. Western Union developed marked strength, moving up to 80⅝ against 79⅞, early dealings. This stock closed at 80⅝ at the Stock Exchange but 80⅞ was bid on the street after 4 p. m.; the advance being due to an impression that a decision now pending before the Court of Appeals regarding the legality of $15,000,000 stock to be in favor of the company. As compared with Saturday's closing sales, stocks were ⅛ to ⅞ per cent higher, the latter in Western Union. Oregon Transportation, after declining to 23, advanced to 25½ bid.

GRAIN AND PROVISIONS.

Special dispatch to THE BEE.

CHICAGO.

CHICAGO, October 1. Trading in all board of trade commodities except certain of the hog products, was only moderate to-day. Business was chiefly confined to local speculators, there still being large absence of country orders. Receipts of everything were large and shipments free. The amount in store, however, remains heavy. Cables reported a firm feeling abroad. Wheat opened a fraction higher and throughout the day was generally firm, except for occasional fractional breaks. The fluctuations were confined in a narrow range and was about ⅜c higher than Saturday, with an undertone of some strength. Corn was quiet with lower tendencies. Prices varied but slightly, opening a shade higher, then declining gradually ⅜@½c for various months and finally closing about ½c lower then Saturday. Deliveries on October contracts reported small. Oats quiet and steady. The firmness at the opening gave way and the market receded, but the changes were unimportant. In hog products there was a very good business. The feeling was unsettled and prices fluctuated considerably. Mess pork was the most active of the list, opening stronger and advancing under fair demand 15@20c. Later the market weakened and the improvement was lost, but towards noon a steadier feeling was manifest and prices rose 5@10c. Receipts of hogs were liberal but the quality was not so good.

THE NECESSITY
FOR THE SPECIALIST,
DR. H. WAGNER,
Has long been acknowledged and more so at this day than any other. The vast field of medical science is ever increasing, and its numerous branches are brought nearer and nearer to perfection, and no one man can any longer grasp them all. Hence the necessity for dividing the labor. And it is true beyond all doubt that disease, affecting the genito-urinary organs need special study more than anything else, if we would understand and know how to treat them properly.
DR. H. WAGNER is fully aware that there are many physicians, and some sensible people, who will condemn him for making this class of diseases a specialty, but he is happy to know that with most persons of refinement and intelligence a more enlightened view is taken of the subject, and that the physician who devotes himself to relieving the afflicted and saving them from worse than death, is no less a philanthropist and benefactor to his race than the surgeon or physician who by close application excels in any other branch of his profession. And fortunately for humanity, the day is dawning when the false philanthropy that condemned the victims of folly or crime, like the lepers under the Jewish law, to die uncared for has passed away.

A Few Reasons

Why you should try the celebrated Dr. H. Wagner's methods of cure:
1. "Dr. H. Wagner is a natural physician." O. S. FOWLER, The Greatest Living Phrenologist.
2. "Few can excel you as a doctor." DR. J. SIMMS, The World's Greatest Physiognomist.
3. "You are wonderfully proficient in your knowledge of disease and medicines." DR. J. MATTHEWS.
4. "The afflicted find ready relief in your presence." DR. J. SIMMS.
5. "Dr. H. Wagner is a regular graduate from Bellevue Hospital, New York city, has had very extensive hospital practice, and is thoroughly posted on all branches of his beloved science, especially on chronic diseases." DRS. BROWNELL & EWING.
6. "Dr. H. Wagner has immortalized himself by his wonderful discovery of specific remedies for private and sexual diseases."—Virginia City Chronicle.
7. "Thousands of invalids flock to see him."—San Francisco Chronicle.
8. "The Doctor's long experience as a specialist should render him very successful."—Rocky Mountain News.

Plain Facts Plainly Spoken.

At one time a discussion of the secret vice was entirely avoided by the profession, and medical works of but a few years ago would hardly mention it.

To-day the physician is of a different opinion; he is aware that it is his duty—disagreeable though it may be—to handle this matter without gloves and speak plainly about it; and intelligent parents and guardians will thank him for doing so.

The results attending this destructive vice were formerly not understood, or not properly estimated; and no importance being attached to a subject which by its nature does not invite close investigation, it was willingly ignored.

The habit is generally contracted by the young while attending school; older companions through their example, may be responsible for it, or it may be acquired through accident. The excitement once experienced, the practice will be repeated again and again, until at last the habit becomes firm and completely enslaves the victim. Mental and nervous affections are usually the primary results of self-abuse. Among the injurious effects may be mentioned lassitude, dejection or irrascibility of temper and general debility. The boy seeks seclusion, and rarely joins in the sports of his companions. If he be a young man he will be little found in company with the other sex, and is troubled with exceeding and annoying bashfulness in their presence. Lascivious dreams, emissions and eruptions on the face, etc., are also prominent symptoms.

If the practice is violently persisted in, more serious disturbances take place. Great palpitation of the heart, or epileptic convulsions, are experienced, and the sufferer may fall into a complete state of idiocy before, finally, death relieves him.

To all those engaged in this dangerous practice, I would say, first of all, stop it at once; make every possible effort to do so; but if you fail, if your nervous system is already too much shattered, and consequently, your will power broken, take some nerve tonic to aid you in your effort. Having freed yourself from the habit, I would further counsel you to go through a regular course of treatment, for it is a great mistake to suppose that any one may, for some time,
