Something New!

The FIRST NATIONAL BANK of Loup City hereby gives notice that they have purchased one of the world famous "TISCO" Manganeese Steel Safes, recently tested at Canton, Ohio, in the presence of one of their officers by experts cunning in the art of Burglary.

Also, that they have ordered a new system of SAFE DEPOSIT BOXES to be placed in their strictly fire proof vaults as soon as received from the factory.

Further notice will be published in this space within a few weeks that this new equipment has arrived and we then promise to show our friends and the public one of the best protected banks in the state of Nebraska.

Yours respectfully,

L. HANSEN. Cashier.

William Rolph, the Council Bluffs burglar, who was captured here last April by Sheriff Williams, was last Friday sentenced to an indeterminate period of five years in the penitentiay at Fort Madison, Iowa. His young wife repudiated him after she learned the truth and has since secured a divorce and resumed her maiden name.

Last Monday evening a windstorm, accompanied by rain and some hail visited this vicinity. The J. W. The ice house will undoubtedly be rebuilt, this making the second time it has been blown down.

The editor returned yesterday noon from the bedside of his aged mother at Des Moines, where he was called last Thursday by her fatal illness. He left her slowly passing into the Great Beyond, where perhaps as you read this her spirit may have taken its flight. We know it is but a few days or hours at longest she will remain and those are filled with deepest pain and distress and death will come as sweet relief. She is nearing her 87th birthday and the past two years have been constant pain and sickness and we could not wish otherwise than for the relief she prays for daily.

Those folks who have been so fearful about the corn crop may be reassured. According to the latest government crop bulletin the condition in Nebraska is but four points below the October average for the past ten years, four points better than it was last month and three points better than at the same time a year ago. The favorable weather permitting late planted corn to mature is the explanation. The oats crop is very much larger and the yield greater than last year. The government men figure an average yield this year af 28 bushels to the acre, and a total yield of 72,716,000, putting the state fourth in the list of oat-growing commonwealths. Last year the average per acre was but 25 bushels and the total production but 61,825,000, while the quality was much poorer.

Fritz Bichel has bought a large Franklin touring car for his own use and also purchased an auto for his son.

Roland Goodwin, Claude and Harold Burt attended church at Loup City Sunday evening.

Pete Ogle had one of the most exciting times while threshing for Robert Dinsdale last Saturday evening of any of his experiences while threshing. In some way the straw wrapped around the cylinder so tightly that it set the separator on fire on the inside. By prompt work the fire was put out before the separator was damaged, but some of the blazing straw was carried out on the straw stack which burned up. Pete got both hands badly blistered. After the fire they still continued to thresh. He had sixteen stacks to thresh Monday and was seen busily engaged on them.

Mr. and Mrs. Carl Squires' baby, who was reported last week as being very sick with lung fever, died last Sunday morning about 2 o'clock. It was their only child, a bright little boy 3 years old. He was taken sick some ten days' ago with stomach trouble and had almost recovered when taken with lung fever, and after untold suffering passed away. The funeral was held Monday afternoon at 2 o'clock at the M. E. church in Loup City, a large number of the neighbors and friends of the sorrowing parents being in attendance, and the little one laid to rest in Evergreen cemetery. Mr. and Mrs. Squires have the deepest sympathy of all. They desire to extend their heartfelt thanks to the neighbors and others for their assistance during the illness and subsequent death of their darling boy, also for their sympathy evidenced by the beautiful flowers.

Last Thursday evening some fifty people on Wiggle Creek completely surprised Mr. and Mrs. J. E. Roush on W. H. Gunn's ranch, who expect to move to Loup City the last of this month for a short stay. Mr. and Mrs. Roush are fine people and all regret to see them leave. They are a hard working couple and it will be hard for Mr. Gunn to secure anyone who will take the interest they did in his ranch.

While Mr. and Mrs. Hans Obermiller and little son were on their way to Loup City last Thursday they narrowly escaped serious injury in an accident. In passing a team in front of W. O. Brown's their team shied at the canvas covered wagon. Hans struck one of the horses with the whip and it jumped forward, but the other one refused to go, so he struck it with the whip also, which caused it to jump forward, breaking the singletree, letting the tongue come down, and when the wagon struck their heels one of the horses commenced to kick. Hans held to the lines and was dragged over the dashboard, striking the ground on his right shoulder and side. The team then started on a wild run across the bridge, where at the north approach one of them struck one wheel of the carrier's rig, forcing the other horse into the ditch on the side of the road. They soon recovered themselves and started to run for the city. Mrs. Geo. Peterson saw them and ran out to stop them, when they started after her. A wire fence is all that saved her, as they were close enough to brush her dress. They were finally caught at the Farmers' elevator without doing themselves any damage. Hans was found to be badly hurt and was taken to Loup City, where it was found that no bones were broken. He expected to go home that night, but was taken suddenly worse and had to remain at Loup City over night, and was taken out to his home Friday morning, where he is slowly recovering. Mrs. Obermiller and boy were not injured.

Patent panic exit doors will be used exclusively in the new public school being built in Atlanta, Ga., and the old schools will be equipped with them as fat as the money will hold out. Every modern school emphasizes the fire drill and thus reduces the danger of panics in the case of fire, nevertheless grave danger still remains on account of the doors getting jammed when the children start to march out in perfect order. This is caused by the pressure of a long line of children making the ordinary lock hard to turn. But the automatic door totally removes this danger. It is worked by a brass bar across the inside of the door, and when merely touched by the weight of a hand it releases the lock and the door is swung back and held open by a stout spring.
