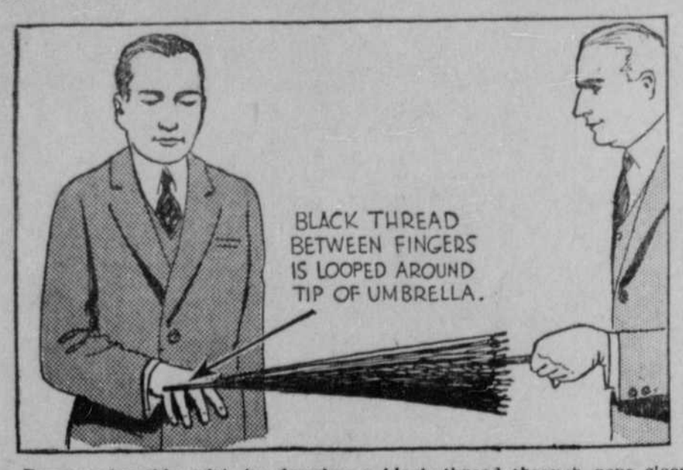
TRICKS of MAGIC EXPLAINED by Will L. Lindhorst

HOW THREAD PREVENTS LIFTING UP AN UMBRELLA



Prepare for this trick by drawing a black thread through your sleeve, fastening one end to a button of your vest, and making a loop in the other and placing it between two of your fingers. Let the loop extend about one-half inch above the fingers and you are ready for the trick. Ask some one to hold an umbrella extended, grasping it in the center of the handle. Extend your hand, back upward, place the tip of the umbrella upon the hand, and while doing so slip the loop of the thread over the umbrella tip. Then ask the person to try and raise the umbrella from your hand. Although it is held by only a thin thread, it will be found practically impossible to budge it. Ask the person to try using both hands, and unless he has unusual strength in his arms, it will be found equally difficult to raise the umbrella. Even if the thread should be discovered, this would be a good trick.

J. F. O'Donnell has recently sold the old Pete McMonagle 160-acre farm four miles west of O'Neill for $42.50 an acre, to Henry Cooke, Jr.; this is one of the best pieces of land along the Elkhorn river. Mr. O'Donnell has also just recently sold a half section of land in the northern part of the county to Wm. Storjohann.

The farmers throughout this part of the state are missing a golden opportunity to make a nice piece of money when they do not grow a few cattle and hogs instead of trying to make money at farming. There has been no money in raising corn and selling it on the open market; the fellow who has money in the bank is the fellow who has raised a bunch of cattle and a few hogs and has fed his corn and other grain. The farmer of Holt county should arrange to raise a bunch of cattle and hogs; they will get rid of the depression as quickly as any other method.

ANTHRAX HAS AGAIN VISITED HOLT COUNTY

Anthrax was discovered last Thursday by Dr. H. L. Bennett when he was called to the Ross Ridgeway farm in the northern part of the county. Saturday Dr. Bennett was called to the E. C. Rector ranch on the Verdigre, twenty miles northeast of O'Neill where the disease was found to have infested the herd of several hundred head of cattle.

At the Ridgeway farm, 2 cows, 2 bulls and 1 horse were wiped out by the disease; at the Rector ranch 10 head of cattle died from the effects of the disease.

Dr. Bennett vaccinated both herds. No cattle have died since they were vaccinated.

Anthrax is a disease that veterinarians know but little about; it is claimed that the germs of the disease will live in the ground for twenty-five years or more.
