"Send 'em by Truck... We Need 'em Fast!"

The scene is the traffic department of any of the hundreds of manufacturing plants in Nebraska. The time is 4:00 p.m. on any day of the week. The traffic manager is talking long distance to a supplier in another state about some parts needed for production.

"Send 'em by truck," he says, as he prepares to hang up, "we need 'em fast!"

He knows from experience that motor transport is the fastest link between shipping and receiving. He knows he can depend on it. In fact, he and thousands of his fellow traffic managers have been the men most responsible for the rapid growth of motor transport. Once they experienced the efficiency and speed of trucks, there was no satisfying them with anything less — and today their companies could not operate successfully without truck transport!

That's something for every wage earner in Nebraska to think about.
