FIFTY LOTS FOR DONATION!

IN THE

CITY OF ASPINWALL!!

NEMAHA COUNTY, N. T.

The proprietors of Aspinwall are now prepared to donate FIFTY beautiful residence and business lots to

ACTUAL SETTLERS;

Or to those who will erect houses upon and otherwise improve the same. They have also reserved two lots for each of the following Christian denominations viz: *Baptist, Catholic Methodist Reform or Christian Church Episcopal Lutheran Presbyterian and United Brethren.*

Persons in search of homes, or locations for the various branches of business are respectfully invited to visit Aspinwall as it is confidently believed they will be pleased. To those unacquainted with the location of Aspinwall it is only necessary to say it is located on the southwest side of the Missouri River, one mile below the mouth of the Little Nemaha, at a large point recently known as "Neal's Point," whose beautiful and commanding site has for years attracted the attention and excited the admiration of every traveler up or down the Missouri River. At this point the Missouri is unusually narrow; the channel deep; banks solid and unchangeable; Nebraska shore rock bound for one mile above and below the town; all varieties of timber; stone of all kinds on and near the site.

Though but recently surveyed, Aspinwall contains two stores and a population of over fifty inhabitants. All that is desired is an examination of the location; of the natural wharf facilities for a shipping point to the interior; the advantages of the surrounding country &c. No puffing or exaggeration is required to build up a point possessing such natural advantages.

THE NEW YORK

Steam Saw-Mill

AND

MACHINE COMPANY,

Capital $250,000.

This company has been organized with the above capital for the purpose of supplying the demand for the COMBINATION

PORTABLE STEAM SAW-MILL,

AND OTHER IMPROVED MACHINERY.

They have purchased the entire machinery business heretofore carried on by J. M. Emerson & Co., also the Montgomery Works at Yonkers on the Hudson, near this city and with the experience and facilities combined in its organization are prepared to furnish machinery of all kinds at more liberal rates than has ever been offered at any other establishment.

The Combination Saw-Mill was patented October 1856, and is now generally acknowledged to be the cheaper, most practical and efficient lumber manufacturing machine in the world. A large number of them are in successful operation in different sections of this country, Canada Cuba and South America, and whenever their merits have been tested they are being adopted by lumber manufacturers in preference to all other mills.

The following letter expresses the general opinion of those who are using the Combination Mill.

MESSRS. EMERSON & CO—Gentlemen: I have tried the saw-mill purchased of you and will say that it performs well and more than meets my expectations. I am well pleased with its performance. I set it up on a small stream that afforded constant water about as thick as my little finger which was much more than sufficient to supply the boiler. We are able to cut 3 000 feet of beautiful lumber in 12 hours, with something less than one cord of wood. This the very thing we have so much needed in our county for a long time. With a little trouble and expense we are able to move it from five to ten miles per day, and set it up in the hart of the timber, which saves the great burden of hauling the logs a long distance to the mill.

Yours, respectfully. JESSE KERR JR.,
Louisville Tennessee.

The Company have purchased Lindt's Patent Feed Arrangement which is illustrated and described in the Scientific American for October 24. This adds greatly to the efficiency of the mill.

The Combination Mill with all the recent improvements, and steam power of 15 horses, is capable from sawing from 3 000 to 4 000 feet in 12 hours, and is sold for $1 650.

THE NEW YORK CIRCULAR SAW-MILL

Is manufactured only by this Company. It is of superior construction and sold for 25 per cent less than other mills of no greater capacity. A mill with 36 to 54-inch saw can be sold for $450 to $500 and with a 20 horse engine and boiler is sold for $2 200.

Steam Engines and Boilers; Engines of from one to 100 horse power; *Locomotive Tubular Flue* and *Cylinder Boilers* furnished at greatly reduced prices from former quotations.

Drawings, with plans and specifications for buildings and machinery furnished gratis to our customers.

Competent mechanics are sent out to put up and set in operation our machinery when required.

We also manufacture *Shingle Machines, Planing Machines, Super-Mills,* and *Machinery in General.*

Special attention is said to setting up *Sawing* and *Pulleys* for manufactories, and all kinds of *Mill-Wright Work.*

The Company are selling in great numbers a *Patent Conical Burr Stone Mill,* for flour, corn meal and all kinds of feed which is pronounced by experienced millers the best mill ever constructed. It will grind more grain in the same time and with half the power of any mill of the same price in the market.

We also furnish other styles of *Grist-Mills* when required.

WM. MONTGOMERY, President.
No. 371 Broadway New York.

NOTICE

Notice is hereby given to all persons not to buy from James Ferguson now a resident of Brownville Nemaha county Nebraska the following described real estate viz: the south west quarter (1/4) of the south east quarter (1/4) and lot number four (4) of section eighteen (18) in township five (5) range sixteen (16) east, or any portion thereof as I will contest his right of pre-emption therein the same being a portion of a town site. This therefore is to warn all persons against trading buying or in any way to negotiate with the said Ferguson for the above described tracts or parcels of land.
