# PLASTIC SLATE,

FOR

# ROOFING

AND OTHER PURPOSES.

The process of reconstructing Slate Stone from a disintegrated state was

PATENTED FEB. 21st, 1865.

It is a combination of

**Pulverized Slate and Viscous Matter,**

(the latter possessing qualities of geological and chemical affinity for the former,) and is a development of one of the simple but unalterable tendencies of nature

**AS A ROOFING MATERIAL**

IT STANDS UNRIVALLED.

A mastic—It adapts itself to every shape and slope. Non-combustible, impervious, non-expansive and unfoosting.

**Frsto does not Crack nor Heat Dissolve it.**

The only Roofing Material ever discovered that will resist the action of the elements as long as the structure it protects. Being susceptible of little if any wear from exposure and

PERFECTLY FIRE-PROOF.

It is unequalled as a coating for railroad and farm buildings, bridges, bottoms of vessels, vaults, etc.
