# GRAIN AND PRODUCE MARKET

## Wheat Promises Greater Breadth and Increased Activity.

## COARSE GRAINS ARE HIGHER

### Buying Side of Pit is Much Stronger Than the Selling and Corn Bulls Help Prices with Their Attention.

OMAHA, June 4, 1913.

The fact that the largest wheat short in the Chicago market was a big buyer of the July and September options yesterday, showed that available profits are to be secured right along. This action also reflected the idea of the short referred to as lacking confidence in his position on the short side around the present price level. Some in the trade have volunteered the opinion that this one La Salle street plunger is short anywhere from 12,000,000 to 15,000,000 bushels of July and September wheat and there are others who believe that his shortage is even more than either of the amounts mentioned.

The wheat market has promised much greater breadth as well as increased activity as is always seen at this season of the year, when crop conditions are uncertain, but with one man in control of the situation, as it now seems probable for a time at least, the outsider will become an onlooker instead of an active trader, and there will be a general howl by all of a lack of business.

As soon as it was seen by the Chicago professionals yesterday that the buying was persistent as well as pronounced, a bundle of buying orders appeared in the pit and those wanting wheat were obliged to bid up for it.

Cash wheat was unchanged. Coarse grains were higher yesterday, with the buying much stronger than the selling. The bull crowd in corn gave that grain considerable attention. This was a help not only to wheat, but to oats as well, to be seeded, and in parts of the oats in small quantities and reports from the interior were received from many sections. There is still a great deal of corn to be seeded, and n parts of the oats belt the crop reports were unfavorable. Cash corn was ¼c to ⅜c higher. Cash oats were unchanged to ¼c higher.

Clearances:

Clearances were 8,000 bushels of corn, 71,000 bushels of oats, and wheat and flour equal to 583,000 bushels.

Liverpool closed unchanged to ¼d higher on wheat and ¼d higher on corn.

Primary wheat receipts were 800,000 bushels and shipments 508,000 bushels, against receipts of 258,000 bushels and shipments of 306,000 bushels last year.

Primary corn receipts were 1,321,000 bushels and shipments 311,000 bushels, against receipts of 1,517,000 bushels and shipments of 561,000 bushels last year.

Primary oats receipts were 985,000 bushels and shipments 816,000 bushels, against receipts of 418,000 bushels and shipments of 803,000 bushels last year.

**Carlot Receipts.**

## CHICAGO GRAIN AND PROVISIONS

### Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, June 4.—Wheat prices tumbled today mainly because of the break in the stock market. The close was nervous, ⅞c to 1⅜c under last night. In corn, there was a net loss of ⅛c to ¼@⅜c and for oats ⅛@⅜c to ⅝c. The outcome as to provisions varied from 7½c decline to an advance of 2½c.

Wheat prices at first were higher, but new investment demands were soon satisfied, and when owners evinced a tendency to realize on holdings the market balked. Serious reduction in Kansas and Oklahoma crop estimates led to a temporary upturn at this junction, but the depression in Wall street quickly acted as more than an offset.

Stop loss orders swept a great deal of wheat into the pit, especially in the last hour until some good sized purchases by commission firms just before the close halted the stampede. The rally, however, was not impressive, and attention in the end dwelt most on the financial situation and Washington reports of "free" wheat.

Primary receipts of wheat were large at 500,000 bushels, against 258,000 bushels a year ago. Seaboard clearances of wheat and flour equalled 583,000 bushels.

Corn reacted with wheat after touching the highest level of the season. The early advance was due chiefly to covering by belated shorts. Hedging sales and chances of imports from Canada formed the principal weight on oats.

In provisions, some strength developed owing to the corn bulge. Heaviness was the rule later, though in line with all the other staples on 'change.

The leading futures ranged as follows:
