Bank Circulation.

The bridge need d for the present, perhaps al years, and Mr. Lincoln's bial remark about not cross- actually reached applies to In other words, the motto of y seems to be in this connec- othing to-day that can be put to-morrow. The currency however, is different. A grad- has been going on, and seri- ment has resulted, which dial attention.

It was not con- y bank would fail to the privilege of issuing of 90 per cent of the government deposit as circulation. On the con- posed that with few ex- s would go very near llowed by law. But as all the Natianal banks eir deposits to the mini- of them take out no cir- he law now stands, there to prevent the entire wiping national bank circulation al- bonds must be kept on deposit for security, and it is quite possible, al- hough not probable, that such a total disappearance will occur. It is certain that the amount of the volume of Na- ional bank circulation is dwindling ay gradually. This is a feature of financial situation which ought not e ignored or underestimated in its vity as a factor in the momentary blem of the period.

The latest report of the National banks ave the total capital as $650,447,235. At the time the National bank act was assed it would have been estimated that with a National banking capital of six hundred and fifty millions there would e an actual National bank circulation f at least five hundred and fifty millions et instead of that the exact figures are 128,005,418. There is thus an immense- y wide margin between what would hen have been estimated and what have roved to be the actual facts in the case.

Some way must be devised to supply this deficiency in the currency. There would be some relief afforded by the banks themselves if allowed to issue to the full par value of their bonds, but not much. An increase of ten per cent would be the utmost, and that would be only about thirty millions, a small frac- ion of the margin explained in the fore- going paragraph. There is in this mat- er an opportunity for non-partisan state- manship.

The Majority

Of so-called cough-cures do little more than repair the digestive functions and create bile. Ayer's Cherry Pectoral, on the contrary, while it cures the cough, does not interfere with the functions of either stomach or liver. No other medicine is so safe and efficacious in diseases of the throat and lungs.

"Four years ago I took a severe cold, which was followed by a terrible cough. I was very sick, and confined to my bed about four months. I employed a physician most of the time, who finally said I was in consumption, and that he could not help me. One of my neighbors advised me to try Ayer's Cherry Pectoral. I did so, and, before I had finished taking the first bottle was able to sit up all the time, and to go out. By the time I had finished the bottle I was well, and have remained so ever since."—L. D. From a Photograph taken in London, England, 1888.

Dear Sir—We returned home April 9, 1890, from a tour around the world, visiting Europe, Asia, (Holy Land), India, Ceylon, Africa (Egypt), Oceanica, (Island of the Seas,) and Western America. Yet in all our great journey of 33,184 miles, we do not remember of hearing a piano or an organ sweeter in tone than Beatty's. For we believe we have the sweetest toned instruments made at any price. Now to prove to you that this statement is absolutely true, we would like for any reader of this paper to order one of our matchless organs or pianos, and we will offer you a great bargain. Particulars Free.

Satisfaction GUARANTEED or money promptly refunded at any time within three (3) years, with interest at 6 per cent, on either Piano or Organ, fully warranted ten years. 1870 we left home a penniless plowboy, to-day we have nearly one hundred thousand of Beatty's organs and pianos in use all over the world. If they were not good, we could not have sold so many. Could we? No, certainly not. Each and every instrument is fully warranted for ten years, to be manufactured from the best material market affords, or ready money can buy.
