If the "soulless corporation" that transports our paper from Saint Louis don't want to hear from us they had better not keep us waiting as they did last week.

There seems to be, at present, a number of men from the east with money in their pockets looking over this county with a view to buying cheap farms.

Last Saturday the town was full to overflowing, with farmers who had been kept close to home for some time by the storms. They were glad to get to town once more.

Hon. H. S. Kaley, Webster county's representative in the legislature, made a record at Lincoln the present winter of which his constituents as well as himself may well feel proud.

The small-pox is spreading in nearly all the Missouri river towns. While there is not much danger of its reaching this far into the interior, it might be well enough to prepare for a possible visitation of the scourge by getting vaccinated.

We are informed that the Histrionic Association of Red Cloud is rehearsing the beautiful Nautical Drama entitled, "Among the Breakers," to be presented at the court house on Thursday March 10th, 1881, and judging by previous entertainments given by this association, the public may expect a rare treat.

The dishonest louks who are mainly responsible for the exhorbitant taxation imposed upon the people of this county, boast that they will everlastingly beat us up, and drive us out of business because we have exposed some of their disreputable actions. When you have completed the job just let us know, will ye.

The question of procuring seed wheat for some of the farmers has been occupying the attention of some of our business men. Now that spring is here, or nearly so, would it not be well to look after the sanitary condition of the town. Where is the Board of Health, let them see to the matter, or, better still, let everyone consider himself a committee of one to look to the cleanliness of his premises and see that the filth and refuse matter that has been collecting about the premises during the long winter is removed and a general cleaning up inaugerated, it will save much sickness during the summer months.

We are in receipt of the Seed Catalogue of David Landreth & Sons, Philadelphia, Pa. This firm established in 1784, is the oldest in their line in the United States, and is widely known for square dealing. Their Almanac and Rural Register and Catalogue is an improvement upon former editions, their motto seeming always to be *Forward*. It is illustrated with cuts of their farm buildings and the more important vegtables. It contains valuable tables and instructions to market gardners and amateurs. It is mailed, postpaid to all who apply for it.

For the enlightenment of those who are anxious to know what is being done in the matter of an investigation of county matters, we will say that the petition for the same has been circulated and generally signed and will be presented to the board of commissioners at their next meeting which will occur in April. The matter will now be left, of course, with the county commissioners to act upon as they may think best. We believe that the present board of commissioners are gentlemen who will do what they believe to be for the best interests of the people of the county, and with them we, for one, are willing to leave the matter, trusting that it will receive at their hands the attention that its importance and the interests of the tax-payers demand.

That every man should patronize, as far a possible, his home institutions, no one will doubt, but that all do patronize home enterprises is not a fact. For instance, Red Cloud boasts of two as good printing offices as can be found in the west, there is more money invested in the type and material of the two offices here than any other two offices in the state west of Lincoln, with the exception, perhaps, of Hastings. Our prices for job printing are as low as any in the west, and we especially desire to show samples of our work and give prices, and if we cannot do as good work and as cheap as can be had by sending off, everything considered, then we say, send off by all means. Everyone has an undoubted right to buy their goods where they like, but then home papers are expected to labor to build up the town and enhance the value of the property and business interests of the inhabitants and consequently should receive the support of all the business men, who should, at least, call at the local office and get estimates, before sending away for printing. Give us a chance, gentlemen, and we will convince you that it is to your interest to patronize us.

Mrs. G. S. Taylor has opened a dressmaking establishment in the house formerly occupied by Mr. S. C. Smith. The ladies of Red Cloud and vicinity are respectfully invited to call.

Every woman who has experience in bread making knows some thing of the difficulty in always getting the best results during the winter season when the "yeast gets chilled" and the dough won't work just right. The best thing you can do under such circumstances is to buy your bread of Lauterbach who uses *only Red Cloud Patent flour*. C. F. Putnam sells it.

NOTICE TO PARTIES HAVING BORED WELLS.

Notice is hereby given to all persons having bored wells, to call on W. W. Hoye, at Judge Wilcox's old office, first door north of the CHIEF office, and settle for the right to use the same. The undersigned is the patantee of the well auger and extensible rod, and no other person has the right to use them. All persons using bored wells will be required to pay $5 in cash or give a note for $6 due in six months from date, to draw intererst at the rate of ten per cent.

Owners of well augers are also notified to call at the same place to make arrangements for the future use of the same, Red Cloud Jan. 18, '81.

NATHANIEL C. CLARK, patantee.

Mr. N. C. Clark, the patantee, was the first man to conceive the idea of the well-boring machine with the extensible rod, the advantage of which can be seen at a glance, as it has enabled persons settling in this and other western States to obtain an inexhaustable supply of water at a small per cent of what it cost to get the same in the settling of Illinois and Iowa, and it is now conceded to be the only practical way to get water here. The royalty that he charges, he considers to be very reasonable, as the royalty upon the Drive wells is, and has been, from $10.00 to $15.00 per well, therefore he considers that he is justly entitled to the amount charged. 26tf
