—Thanks to Edward Harvey of Twin Creek, Wyo., for a very beautiful specimen of petrified fish obtained sixty feet below the surface, on the Oregon Short Line R. R. That country has become famous the world over among geologists for the beauty of its fossils of a great many varieties, and Mr. Harvey couldn't have pleased us better than by sending us this handsome specimen of Nature's handwriting on the rocks.

—The June races of the Columbus Driving Park and Fair Association are to be held on the 6th and 7th of that delightful month. This has heretofore been an occasion of great interest to those who own fast horses and those who like to see them "go"; it is pretty certain that, with favorable weather, the races will be well attended this year.

—The Driving Park and Fair Association have decided to hold their annual fair on the 18th, 19th and 20th of September next. The affairs of this association have been conducted from the first on strictly business principles, thus gaining the full confidence of the community. If the farmers of this and adjoining counties will bring samples of their products, there will be nothing lacking to make the exhibit of 1883 the best ever shown in central Nebraska. Let the spirit of emulation, the spirit of progress have full sway in this matter, and let us show the world, just for once, what central Nebraska can do. Prepare for the fair.

Rising, Butler County.

EDITOR JOURNAL:—A sad accident occurred one and one-half miles south of our village last Saturday; a son of G. R. Ingalls fell on the slippery, frozen ground, hurting his head, but his parents thought not severely, and the bright eyed boy died before morning.

Our bank building is slowly approaching completion, regardless of the weather. It will be quite an improvement to the place, and improvements will be many this spring and summer.

The beet sugar factory is not an assured fact for Rising City, as yet, although it has been published in quite a number of papers, as such; we wish it was.

Last Saturday evening E. M. Stanton Post No. 20, G. A. R. of this place had a public installation of officers, and after the installation a short, warm camp-fire.

But little corn stored here, as it is being shipped about as fast as brought to market, and we judge that two-thirds of the available crop has already gone forward.

Feb. 23d. WHY NOT?

Sparks from Granville.

School will close in district No. 38, March 2.

Mrs. C. D. Cosby has gone to Des Moines, Iowa, on a visit.

Mr. T. J. Cosby and family will move to Plankinton, Dakota, in March.

B. Churchill has gone to the southwestern part of the state, looking for a location.

Rev. A. J. Wright again made his appearance Sunday, after an absence of over two months.

Baptist Eicher is accused of shooting into the house of B. Schroeder, of St. Bernard, a week ago. He has been arrested and taken to Columbus, but the particulars I cannot give, as there are divers stories afloat.

The Literary and Alliance have been very poorly attended of late. Subject debated at the former Friday, was, "Resolved, That it is right to inflict capital punishment." Disputants on the affirmative, A. H. Miller and Mr. Cookingham; negative, G. W. Clark and F. W. Tate. Miss Otis, W. H. Selsor and P. J. Bentz were judges, who decided in favor of affirmative.

YOUNG REPORTER.

Seed Corn.

MR. EDITOR:—I hear there is considerable inquiry about seed corn from parties who live in Illinois, Iowa and Nebraska.

The cause for this inquiry is, of course, mainly that the crop of 1882 was injured, and there is very little of previous crops on hand any where.

The spring of '82 was cold, and no corn came up so early as usual, and when it did come up, it didn't grow to amount to anything until about the last of June or the first of July, when it made a very vigorous growth. This is one reason for the damaged crop of '82. A second is that the corn kept green when it should have ripened, notwithstanding the frost held off quite late in the season. A large portion of the corn in several of the states had green stalks full of juice when the frost came, and a large amount of corn was spoiled for seed at that time. Third, corn that was cribbed before the cob was dry was injured by sweating and steaming. Fourth, corn that would have done for seed was spoiled by being piled on the ground or put into open cribs where it became damp from the snow; and the sleet and the hard freezing, with the thermometer at 32 below zero, makes the corn very doubtful for seed.

No farmer should take the risk of planting doubtful seed corn. There is no doubt plenty of corn that will grow when everything is favorable, that will not if things are unfavorable; for instance, if the ground should be cold and wet, or we should have cold rains, all the corn grown in 1881 that has been properly housed will make good seed, or at least it will all grow. Nearly all the corn of '81 in this state was perfectly dry before there was any frost. Nearly all of my corn was dry enough to crib in September.
