STOCKS—The features of to-day's stock market has been a heavy decline in Union Pacific, accompanied by heavy trading in stock, sales aggregating 74,760 shares, or over 21 per cent of the day's business in all stocks. The early publication of the Union Pacific statement for the month of July, showing a loss in gross earnings of $70,769 at the same time that there was an increase in operating expenses of $157,359, making a total loss for the month, as compared with the same time last year, of $228,308, had a depressing effect upon prices, and everybody appeared willing to sell both for long and short account, and all that the market would take. After opening at 49½c, there was an advance of ½c, and after that a persistent decline, which continued until late in the afternoon, when the price touched 47½c, and in sympathy with the rest of the market, rallied in the last hour 1 per cent, closing with a net loss of 1½ per cent. The market finally closed about steady and within small fractions of last evening's final figures.
