B. B. Burton, who occupied the platform at the M. E. church last Saturday evening as the speaker in the fourth number of the lecture course gave most abundant satisfaction to those hearing him. Mr. Burton was worthy a crowded house. His lecture was entitled "Along the Corridors of Antiquity" and was intensely interesting and instructive. It is the opinion of the Herald that we are quite jocular in our attendance upon the entertainments furnished in this course. This lecture course is organized for the purpose of making money for the local committee but to entertain and instruct the local public and it is entitled to loyal support from all. In the larger centers of population this lecture by Mr. Burton would have been liberally attended at \$1.00 per seat; here, at half that price, was compelled to address but a slender audience. There is something strange about this. Dakota City is an educated and cultured village and it's people should hail with enthusiasm the opportunity of listening to such splendid talent as marks the entire programme of entertainments of the course. Don't neglect the opportunity to hear the next number, which comes early in March.

"The Old World and its Ways." Col. William Jennings Bryan's new book of travel, entitled "The Old World and its Ways," recounts his recent tour around the world and his journeys through Europe. It is profusely and elegantly illustrated with 251 artistic engravings representing men and things seen in various countries of the earth during that noted journey. The engravings are made from photographs taken by him or his party specially for this publication. It is regarded by him as the monumental literary work of his life, and is published under his special supervision.

It is sold only through agents, and following its announcement it has, we are advised, met with a demand that has exhausted in a few months four large editions aggregating over 41,000 copies. By special contract with his publishers he made the retail price low down with the view of putting it within the easy reach of every reader and book buyer.

The book gives his experiences—what he saw and did—Whom he met and his impressions and conclusions. He made a profound study of the nations and of men and things as he saw them around the world. He gives governmental, educational, religious and other conditions, from the standpoint of a student and one profoundly interested in all the peoples of the earth.

The book is in no sense political, but is a brilliant record of travel and observation, from the standpoint of a well informed American citizen, concerning the countries and the people of the earth as seen today. While the pen described the camera pictured the splendid details of this noted journey.

While Col. Bryan traveled as a private citizen he went with a prestige of having made two memorable contests for the presidency of the United States, and he was everywhere recognized and entertained as a great representative American, having a leading part in the direction of American affairs. He was given opportunity for observations never before accorded to any one traveling in private capacity.

If one wants to see the world, and the people who are at the head of affairs in all countries, as well as the masses he has in his book an opportunity of seeing them through the eyes of Col. William Jennings Bryan. It is sold by subscription, and the Thompson Publishing company of St. Louis, Mo., are the fortunate publishers. They offer an especially inviting opportunity to solicitors in another column of this issue.
