Kansas City Buyers on Chicago Board Affect Corn Prices.

BULLS DOMINATE THE GENERAL MARKET

December Wheat, December Corn and December Oats All Close a Fraction Higher, with Some Provisions.

CHICAGO, Nov. 15.—A strong bullish feeling prevailed in the grain markets today as a result of the heavy demand in the coarse grains. December wheat closed ¼c higher, December corn ⅝@¾c up and December oats ⅜@½c higher. Provisions closed a shade lower to 2½c higher.

Corn traders ignored a heavy Europe situation, as indicated by lower cables at the opening and started December unchanged to ¼c higher at 59⅝@59⅝c. The rapidly growing strength that has manifested itself lately in this pit began to dominate the whole board. New arrivals were in great demand and the presence of Kansas City grain men here bidding for the carload offerings for shipment to Kansas and Oklahoma was a dead weight to the bull argument. New corn was bid for far beyond the supplies at hand, No. 4 bringing 59@60c and No. 3 60@61c. Bidding at river points also was on the basis of 2½c a bushel over Chicago for May. With all these influences to bear on the situation December advanced quickly to 60⅝c. At this price, however, profit-taking was popular and prices eased off somewhat. The greater part of the early trade was by commission houses, though professionals soon became buyers. Shorts seem practically to have quit the market. Toward the end of the session the demand sprang up again and December closed strong, ⅝@¾c up at 60@60¼c. Receipts were 91 cars.

Undoubtedly the greatest support to wheat was the strong bullish tendency of the corn and oats markets. Wheat opened strong, considering the weaker cable list, large receipts and only fair-sized clearances. Early offerings were light, the outside markets were bullish and December, which started unchanged at 72⅛@72¼c, quickly sold up to 72¾c. High prices resulted in considerable liquidation, but the market stood it well. Later reports indicated a poor condition of the winter crop and expressed fear that freezing weather would find the grain too weak to live brought another advance, December closing firm, ¼c up, at 72⅝@72¾c. Local receipts were 72 cars, six of contract grade. Minneapolis and Duluth reported 810 cars, making a total for the three points of 882 cars, against 823 last week and 625 a year ago. Primary receipts were 1,137,000 bu, compared with 697,000 last year. Seaboard clearances in wheat and flour were 521,000 bu. Argentine shipments had decreased materially, this week's report indicating 56,000 bu., against 172,000 last week.

The bull factors in oats were the same as they have been for the last two days, a strong cash market and the corn advance. December opened ⅛c lower, but quickly recovered on active buying and a short demand. Before noon prices had passed yesterday's high mark, May selling at 41⅝c, the highest price in seven years. Selling was scattered until high prices influenced profit-taking. December sold between 39⅝c and 40½c and closed firm, ⅜@½c higher, at 40⅜@40⅝c. Receipts were 193 cars.

Provisions were quiet, with an easy tone and a fairly steady market. Prices were lower on lower prices for hogs, but in the latter the large run of hogs was readily taken by packers and better demand for futures brought a slight advance. January pork closed 2½c up at $15. January lard a shade lower at $8.52½ and January ribs a shade lower at $7.67½.

Estimated receipts for tomorrow: Wheat, 70 cars; corn, 110 cars; oats, 215 cars; hogs, 27,000 head.

CORN FAILURE AS A BLESSING

Dun's Review Says It Prevents Worse Congestion of Shipping.

REGULAR TRADE NEEDS ALL THE CARS

Carriers Have Their Hands So Full They Don't Notice Slump in Grain Shipments—Business Conditions in General.

NEW YORK, Nov. 15.—R. G. Dun & Co.'s Review of Trade tomorrow will say:

A few months ago injury to the corn crop aroused fears that the railroads would be seriously handicapped by the loss of tonnage, yet the season of grain traffic has not only failed to produce decreased earnings, but there is such a scarcity of rolling stock and motive power that numerous industries are badly demoralized. Insofar as these interests are concerned the reduction in corn freight proves a blessing. Railway earnings in October were 11.3 per cent greater than last year and 21.3 per cent greater than 1899, while those roads reporting for the first week of November showed an average gain of 9.8 per cent. A healthy demand is reported throughout the country in all leading lines of merchandise, while sales of winter goods have attained normal proportions and holiday business promises to surpass all records.

In manufacturing there was never before such well sustained activity, with contracts running past the middle of next year. This is especially true in the case of steel rails and many other products of iron, while in building material, felt footwear and most textile branches there is little prospect of idleness.

Money circulates freely, making collections satisfactory in most sections. Bank exchanges in New York for the week were 8.5 per cent larger than a year ago and 32.1 per cent over 1899, while at other leading cities the gains were 9.2 and 10.2 per cent respectively.

In the Commodities.

Unprecedented business in iron and steel is shown by the reports November 1 published by the Iron Age. While shipments of footwear from Boston continue in excess of previous years and factories are well employed, prices are not maintained at a profitable point owing to the prenomenal strength of raw material and the stubborn resistance of buyers. Print cloths at Fall River are quiet. Both buyers and sellers made sufficient concessions on brown goods to secure large export sales. Further gains are recorded in woolens, sales reaching the best of the season.

An official report of the lowest average yield of corn per acre was calculated to strengthen prices, but the phenomenal quotations already prevailing would seem to fully discount government figures. Foreign buyers have been driven out of these markets, the week's exports from the Atlantic coast amounting to only 585,944 bushels, against 3,726,986 a year ago and 3,770,188 in 1899. Wheat rose to the best price of the crop year, partly in sympathy with corn, for which it is still freely substituted. Interior receipts of 7,390,441 bushels, against 4,404,102 last year, indicate that an abundant crop is coming forward and the movement would be heavier if transporting facilities were available. Yet the enormous crop will be readily absorbed, judging with the domestic milling demand and exports for the week of 4,559,295 bushels, against 3,852,857 a year ago. Cotton recovered from the bottom point of the season, though port receipts are heavy.

Failures for the week number 215 in the United States, against 217 last year, and 27 in Canada, against 33 last year.

BRADSTREET'S REVIEW OF TRADE.

Current of Business is Running Full the Country Over.

NEW YORK, Nov. 15.—Bradstreet's tomorrow will say:

Favorable features are still largely in the ascendant and the current of business is running full, the country over. In some directions, indeed, notably in the matter of forwarding of general merchandise, grain, ore, coal, iron and lumber, complaints of insufficient transportation facilities have become more marked. Seasonable weather conditions east, north and west have expanded retail trade and enlarged reassorting orders from jobbers. Weather conditions at the south have, however, not been entirely favorable and complaints of slowness of collections, due to the backward cotton crop or the lower prices paid, therefore have been more numerous.

A favorable feature as regards this latter situation, however, is the turn for the better in prices. Following the active buying by manufacturers some weeks ago at the east has come sustained activity in wool at leading eastern and western markets, without, however, any special gain in prices. An unfavorable feature noted at the west is the continuance of the drouth in some parts of Kansas and Missouri, where live stock is being rushed to market because of insufficient water supplies. Demand for iron and steel is heavy and nearly all lines share in the strength. Pig iron is active at all markets and 25 cents per ton premium is freely paid for immediate delivery. Stocks are smaller than a month ago. Steel billets are also in demand and find ready sale at about $28 per ton at Pittsburg. The call situation is one of special strength, the leading interest being reported as having its output for the entire year 1902 booked. New rail orders at Pittsburg this week aggregate 100,000 tons and rails in the district are sold up to next year. No advance in the price of rails is looked for, and railroads not already booked are not likely to receive their quotas much before late summer. The shortage of cars, restricted furnace operations in the central west and complaints of lack of motive power in addition are heard. Some improvement is looked for when the lake movement of ore and coal stops and the cars employed therein can be released.

Wheat and also flour have weakened, due mainly to realizing upon the late advance, but renewed speculative interest is evident on every decline and though prices are slightly lower on the week the tone of the market is much better than some weeks ago. Wheat, including flour, exports for the week aggregate 4,983,734 bushels, as against 5,469,645 bushels last week and 4,062,029 in this week last year. Wheat exports July 1 to date (twenty weeks) aggregate 117,162,152 bushels, as against 70,117,817 last season. Corn exports aggregate 629,724 bushels, as against 708,264 last week and 2,936,914 last year. July 1 to date corn exports are 18,077,768 bushels, as against 63,440,228 last season.

NEW YORK STOCKS AND BONDS.

Bears on the Board Have Things Less Their Own Way.

NEW YORK, Nov. 15.—There was some further effort by professional bears during the early hours of today's stock market to renew the decline in prices which was in force yesterday, but the evidence was pretty conclusive that the urgent selling to realize profits was completed and the board renewed the covering of shorts, which was a feature of the last hour of yesterday's market. The demand to cover short was a considerable factor in the strength of the market. But there was evidence here and there of renewal of speculation for a rise or of buying of a substantial character for reasons not disclosed. This was notably true in the local traction group, Metropolitan Street Railway rising 5¼, Manhattan 2⅝ and Brooklyn Transit 1⅝. The buying of the Reading stocks was on a large scale and caused sympathetic strength in some of the other coalers. The copper stocks made strong recoveries to the accompaniment of reports of improving conditions in the trade. Amalgamated Copper was lifted over 2 points and Anaconda 1⅝. There was also an advance of 3¼ in American Smelting and of 2¼ in the preferred. The Pacific coast stocks made notable recoveries from recent heavy declines, and there were points of decided strength among the southwesterns.

The more cheerful prospect in the money market was the dominant influence in the recovery of stocks. The loan items of the banks remains to be reckoned with. The market closed firm at considerable net gains.

The railroad bond market was moderately active and irregular in its changes. Total sales, par value, 1,300, $3,275,000. United States bonds were all unchanged on the last call.

The Commercial Advertiser's London financial cablegram says: The stock market was idle and dull today, despite the absence of gold exports. The gale disturbed the telephones. The copper market was nervous, as three months' futures are selling 30s under cash. Americans were flabby, save Union Pacifics. New York bid up prices fractionally, but the close was near the bottom, except Erie, Reading and Ontario & Western. The demand for gold from the continent is slackening and the price of the metal is 77s 10d. Paris exchange is 25.14½.
