GRAIN AND PRODUCE MARKET

Wheat Market Breaks and Closes Below Yesterday.

GOVERNMENT REPORT IS BEARISH

Lighter Corn Receipts Cause Better Prices in that Cereal—Oats Strong Through Session—The Foreign Situation.

OMAHA, AUGUST 1, 1905.

The government weekly crop report, issued at noon, was bearish on spring wheat. It caused September wheat to close about ¼ cent below yesterday. The opening was a little easier than yesterday's close, but there was little wheat offered at the figures, and a better tone developed, September reaching 86⅝c at the high figure and December 87½c. With rust talk and reports of Russian crop failure there was a general uneasiness about the market, but any tendency to higher prices was offset by the large receipts and the prospect for as large a quantity tomorrow. The government report came, the market broke, September closed at 84⅝@84½c, December at 86c and May at 88⅝c.

Lighter corn receipts were largely responsible for strength in that market. September closed at 52½@52⅝c, old September at 53⅝c, December at 45⅝c, old December at 47⅝c and May at 46⅝c.

Oats held better throughout the session. September finished at 27⅝c, December at 28½c and May at 29½@29c.

Liverpool closed ½d higher on wheat and ½d lower on corn.

Foreign crop prospects are beginning to be a factor and may be more in the future. Russian crops are almost a failure in some provinces. The trade had a report yesterday which puts the situation in a serious way. It is believed that the foreign situation will make better prices. The Russian wheat yield is estimated at 90,000,000 bushels short.

Total stock of wheat in all positions in Chicago were 2,118,000 bushels, an increase of 1,014,000 bushels. Corn stocks are 2,523,000 bushels, an increase of 208,000 bushels. Oats stock are 2,599,000 bushels, an increase of 63,000 bushels. Deliveries there on July contracts yesterday were 700,000 bushels of wheat, 700,000 bushels of corn and 200,000 bushels of oats. Kansas City reports 150,000 bushels of wheat delivered there. Primary receipts of wheat were 1,175,000 bushels, against 1,720,000 last year. Primary receipts of corn were 456,000 bushels, or 10,000 bushels less than last year. Shipments of wheat were 762,000 bushels as compared with 560,000 bushels last year and corn shipments were 346,000 bushels as compared with 234,000 bushels last year.

Lake freights are up ¼c and boats are scarce. Rates have been so low that vessels have sent their boats for ore rather than take corn at 1c, as the ore pays better. There were charters yesterday of 400,000 bushels on the basis of 1⅛@1¼c for corn to Buffalo.

Pringle, Fitch & Bankin at Minneapolis sent the following wire to the George A. Adams Grain company: "Hokason of Hector 'phoned me the wheat fields there were ripening since Saturday with nothing in the heads." The same firm got other reports from Minneapolis that the northwest crop is the best in twenty years.

Snow, Minneapolis crop expert, issued a report today. He says: "I find black rust in practically every section of the northwest, but it should not develop with more intensity than is now apparent the crop loss will be insignificant. There is a good stand and a generally vigorous plant, so that, aside from rust probability, the present prospect is for at least a full average crop. Conditions are favorable for maturing the crop ahead of full rust development."

WEATHER IN THE GRAIN BELT

Light Showers General in Nebraska; Good Rains in Nebraska.

OMAHA, Aug. 1, 1905.

Light showers were quite general in the mountains within the last twenty-four hours, and thunderstorms, with fairly good rains, are reported in central Nebraska this morning. Conditions are favorable for light local rains in the Missouri valley tonight and probably Wednesday with no important change in temperature.

The weather is slightly cooler east of the Mississippi river and in the southern portion; it is slightly warmer in the Missouri valley and west to the mountains.

Omaha record of temperature and precipitation, compared with the corresponding day of the last three years:

	1905.	1904.	1903.	1902.
Minimum temperature	70	67	60	62
Precipitation	.00	.00	1.15	.00

Normal temperature for today, 76 degrees.

Deficiency in precipitation since March 1, 7.71 inches.

Deficiency corresponding period in 1904, 8.78 inches.

Deficiency corresponding period in 1903, 4.83 inches.

Visible Supply of Grain.

NEW YORK, Aug. 1.—Special cable and telegraphic communications received by Bradstreet's show the following changes in available supplies as compared with last account:

Wheat—United States and Canada, east Rockies, increased 2,235,000 bushels; afloat for and in Europe, decreased 2,100,000 bushels; total supply increased, 135,000.

Corn—United States and Canada, east Rockies, decreased 962,000 bushels.

Oats—United States and Canada, east Rockies, decreased 781,000 bushels.

The leading increases reported this week are 216,000 bushels at the Chicago private elevators; 137,000 bushels at Louisville; 107,000 bushels at depot harbor and 97,000 bushels at Nashville.

Peoria Market.

PEORIA, Aug. 1.—CORN—Unchanged; No. 2 yellow, 54c; No. 3, 54c; No. 4, 53c; no grades, 52c.

OATS—Lower; No. 3 white, 29c; new No. 3 white, 27½c; No. 4 white, 26c; new No. 4 white, 27½c.

WHISKY—On the basis of $1.27 for finished goods.

Milwaukee Grain Market.

MILWAUKEE, Aug. 1.—WHEAT—Steady; No. 1 northern, $1.11; No. 2 northern, $1.09@1.09; September, 84½@84¾c asked.

RYE—Quiet; No. 1, 80c.

BARLEY—Firmer; No. 2, 51c; sample, 44@49c.

CORN—Firmer; No. 3 yellow, 55c; September, 49½c asked.

Liverpool Grain Market.

LIVERPOOL, Aug. 1.—WHEAT—Spot, nominal; futures quiet; September, 6s 8¼d; December, 6s 7½d; March, nominal.

CORN—Spot, easy; American mixed, 4s 1½d; futures closed steady; September, 4s 3½d.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, Aug. 1.—Official denial of serious damage from black rust caused a weak finish in the wheat market here today. At the close wheat for September delivery was down ⅛@⅞c. Corn is up ⅝c. Oats show a gain of ⅛@⅜c. Provisions are practically unchanged.

Generally clear weather northwest developed evidence of lack of strength in wheat prices at the start, the opening quotations on September being unchanged to ¼c lower at 85¼c to 85⅜c. Sentiment, however, soon became bullish and prices made a quick rally. An official forecast of rain tonight in Minnesota and the Dakotas started active covering by shorts. Numerous reports from private sources were received from the spring wheat district, but advices regarding damage by rust were decidedly contradictory. Some of the reports claimed that the crop would be of exceptionally good quality. Other reports asserted that great damage had already been done by the blight. During the first half of the session offerings were light. As a result the prices of September advanced to 86¼c. Later there was a complete reversal of sentiment, the market during the last hour becoming exceedingly weak. The principal cause for the late weakness was a report made by the weather bureau at Washington relating to spring sown wheat. Commenting on the condition of the crop. The report said:

"Spring wheat harvest is in progress in Nebraska, Iowa and in southern portions of South Dakota and Minnesota. This crop has made favorable progress, no rust damage being reported except from scattered fields in South Dakota where smut and blight are prevalent to some extent."

The publishing of this official estimate seemed to allay all fears for the safety of the wheat crop in the northern states. Heavy profit-taking following resulted in a sharp break in prices, September dropping to 84⅝c. Liberal increase in the world's visible supply, helped to increase bearish sentiment. The market closed extremely weak with prices practically at the lowest point of the day. Final quotations on September were at 84⅝@84¾c. Clearances of wheat and flour were equal to 111,000 bu. The world's visible supply, as shown by Bradstreet's increased 2,250,000 bu. Primary receipts were 1,175,000 bu, compared with 728,000 bu a year ago. Minneapolis, Duluth and Chicago reported receipts of 775 cars against 669 cars last week and 428 cars a year ago.

Sentiment in the corn market was bullish the greater part of the session. Under active support from bull leaders prices made a substantial advance during the first part of the day, but later part of the grain was lost on selling induced by the break in wheat. One of the main bullish influences was the extremely light acceptances of bids sent out by cash houses. Another factor was an estimate of small local receipts for tomorrow. The market closed firm with prices considerably above yesterday's final quotations. September opened ⅝c to ⅞@¾c higher at 52c to 52¼c, sold up to 52⅞c and closed at 52½@52¾c. Local receipts were 295 cars with 51 of contract grade.

Strength of corn imparted a firm tone to the oats market. Shorts were active buyers. September opened a shade higher at 27⅝c, sold up to 27¾c and closed at 27⅝c. Local receipts were 329 cars.

Provisions were steady as a result of a 10@15c advance in the price of live hogs. The market received fair support from packers. At the close September pork was up 2½c at $13.47½. Lard was a shade higher at $7.35@7.37½. Ribs were up 2½c at $8.15.

Estimated receipts for tomorrow: Wheat, 152 cars; corn 149 cars; oats, 142 cars; hogs, 36,000 head.

OATS—To arrive, 27⅝c; on track, 28⅝c.

NEW YORK STOCKS AND BONDS

Wall Street Market Again Demonstrates Its Good Absorptive Powers.

SPECIALTIES ARE FEATURE OF THE DAY

Copper Securities Higher on Advance in Price of Metal—Crop News Favorable to Railway Shares.

NEW YORK, Aug. 1.—The stock market again demonstrated its good absorptive power today during the period when profit-taking sales were being made to meet the new demand. The rather singular tone showed more softness when the selling movements were less sensational, probably accounting for the diminished influence of the special movements on the general tone of the market.

Copper securities were strong in all the markets of the world, based on the advancing price and the extraordinary demand reported for the product. The price of copper advanced sharply in London and in New York the price was marked up ¼c a pound, following a similar advance yesterday. The response in Amalgamated Copper was uncertain and the dealings in that stock were not on an unusual scale. Smelting continued its progress to new high levels by the influence of rumors of an intended increase in the dividend rate. The United States Steel securities were also firm, but sluggish, the second mortgage bonds making the widest movement.

The grainger stocks seemed to be affected by crop uncertainties, although the wheat market was comparatively free from damage rumors. The publication of the weather bureau's crop bulletin was the signal for a general recovery in the market, the condition reported there being regarded as extremely favorable. Money conditions were not perceptibly altered. The payment to the government on the semi-annual maturity of the Central Pacific note makes the subtreasury a large gainer from the market on operations thus far reported, but government interest payable today will operate as an offset. The unresponsiveness of the general surface of the market to the propping up of individual stocks was much as anything else led to the spilling out of stocks in the final hour, which decided the course downward after the varying fluctuations of the day, and the closing was easy, a number of the grain carriers showing point losses on the day.

Bonds were steady; total sales, par value, $3,554,000. United States bonds were unchanged on call.

Quotations on the New York Stock exchange ranged as follows:
