Mammoth Red Fellows of a Few

Years Ago Now Rarely Seen. The big tomato had its day and sta fate has been settled by that voice which decides what shall and shall not be in most matters of public interestthat is, public opinion-says the Gardener's Magazine. When the man in the street first cultivated his palate up to a point of liking tomatoes, growers set out to provide him with big fruits, which went all right for a time. The new varieties of a few years ago were characterized by the size of their fruit, and there is no telling what pitch we should have got to by now if things had gone on, but the consumer put the veto on big tomatoes, and they have gone under. Perhaps he admired the monsters when on the show board, but when he went to the shop for a pound of tomatoes he didn't want a single fruit, but about four, and market growers soon began to realize this.

Exhibitors have followed in the same line, and to-day one rarely sees monstrous fruits staged, and if they are Dealer. they are generally passed over for medium-sized specimens, for judges, as a rule, have got to treat tomatoes on the show board from a utility point of weddin' presents an' twa wreaths."view.

Again, the cook has had something to do with the triumph of the mediumsized tomato. She plainly indicated to the gardener that he could keep his blg fruits to show, or do what he liked with them, but she wouldn't have them, and now the four or five to the pound variety rules supreme in the private garden, as it does in the market establishment. Raisers, too, have come into line, and the tomatoes of recent introduction which are now popular are varieties which bear large clusters of medium-sized fruits that are bright in color and are not given to cracking. Doubtless we shall have more new varieties as time goes on, but unless they ald. favor the above descriptions and are heavy croppers .they will stand a poor chance, for in the tomate world to-day quantity with quality is demanded the kitchen and saw that cook has rather than individual size.

Greene-A runabout; it kept her valuables, and said to the manager that she wanted to take her box, with its contents, to her lawyer's office for an hour. Could he arrange that for her? The manager assented, and wrapped the box in a newspaper, that it might make an inconspicuous

bundle. The day passed and the woman did not return. The next morning, inquiry revealed the fact that she had gone on her journey. The manager was curious enough to ask her lawyer if he knew anything about the box.

"She left here intending to take it directly to you," said the lawyer.

That was enough to justify a tele gram, as soon as the woman had reached her destination, six days inter. Telegram: "Where did you put your safe ty deposit box?" Answer: "In the vault where it belonged." Telegram: "It is not there. Return at once."

Another week passed in wretched suspense for everyone concerned. When the woman arrived, she was in a state of nervous rage, and ready to accuse the officials of every crime in the calendar. She declared she had driven straight from her lawyer to the vault. The manager had himself let her in. and talked with her. Her story was an English writer, "some are only complete in all its details. But the clever, and many are simply inven-

"You know," she confided, "I do believe some girls would wear sunflowers if they were only fashionable.
