GRAIN AND PRODUCE MARKET

Bearish Government Report Resulted in Heavy Sales.

WHEAT VALUES DECLINE AGAIN

Bears Are Predicting Ninety-Cent Wheat — Conditions Point to Lower Price in Face of Big Spring Crop.

OMAHA, Aug. 10, 1909.

The bearish government report resulted in further heavy selling and wheat values suffered another decline. Bears are predicting 90c wheat now, while the same traders were following the $1.25 bulls a few weeks ago. Everything points to lower prices in face of the excellent spring wheat crop.

Corn was weak and unsteady with wheat and heavy receipts are selling on the cash values. No confirmation is given to the hot weather reports.

Wheat values were unsteady and worked still lower on fresh selling orders. The government report was construed as bearish and was somewhat of a surprise to traders, as the yield was not expected to show as high an average. The decrease in the world's visible put some strength in the closing.

Corn options were unsteady and a shade lower, owing to an increased movement expected. Bad damage from hot weather has not been reported, but a few more days of present conditions will turn the sentiment bullish. Cash corn was weak and in poor demand.

Primary wheat receipts were 1,075,000 bushels and shipments were 845,000 bushels, against receipts last year of 953,000 bushels and shipments of 841,000 bushels.

Primary corn receipts were 548,000 bushels and shipments were 551,000 bushels, against receipts last year of 360,000 bushels and shipments of 340,000 bushels.

Clearances were 5,000 bushels of corn, none of oats, and wheat and flour equal to 40,000 bushels.

Liverpool closed ¼@½d lower on wheat and ½d lower on corn.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, Aug. 10.—Overnight contemplation of the government crop report inspired additional bearishness in the minds of wheat traders on the Board of Trade today and prompted new selling which resulted in still further declines in all deliveries. At the close the net losses were 1@1¼c. Corn closed irregular, oats easy and provisions fairly steady.

The wheat market was steady all day and although there were several moderate rallies, due to covering from influential shorts, prices failed to advance to the level of the previous close. The government crop report was the most potent factor in the situation. Indications that the wheat crop of America will be one of the largest on record brought out general selling throughout the day. Crop reports from the northwest were in line with predictions of the government statistician and, barring wet weather within the next week or ten days, the largest crop of spring wheat ever harvested should be safely garnered. Another encouraging factor from the standpoint of the bulls was the almost entire absence of demand from foreign for the cash grain, there being practically no export bids. Rain, in fact, some cancellations of former sales for export were received. Warmer weather in the Canadian northwest, where the new crop was threatened by low temperatures, and declines at all the leading European grain centers were additional weakening influences. During the day the September delivery sold between 97@98½c, while December ranged between 94⅝@94½c and 95½c. The close was considerably above the lowest point, although a heavy tone prevailed. Final figures for September were 97½c and on December 95@95¼c.

Corn exhibited firmness nearly all day, but the September option was inclined to be weak. At the close the September delivery was down ⅝@⅞c, while other options were up ⅝@½c to ½@⅝c, compared with the previous close.

Prospects for a crop close to 1,000,000,000 bushels inspired liberal sales of oats, which resulted in a weak tone. Prices at the close were 2½c higher to 1½c lower.

The leading futures ranged as follows:

WEATHER IN THE GRAIN BELT

Fair and Continued Warm is the Delightful News.

OMAHA, Aug. 10, 1909.

Showers occurred in the extreme upper Missouri and upper Mississippi valleys and upper lake region within the last twenty-four hours, and continue in the extreme upper Mississippi valley this morning. An area of high pressure overlies the upper Mississippi valley and lake region, and cooler weather prevails from the Mississippi river east over the lakes. Rains have continued quite general along the gulf and on the southwest border. The weather is generally clear west of the Mississippi river to the mountains, with slightly higher temperatures, and it will continue fair and warm in this vicinity tonight and Wednesday.

Record of temperature and precipitation compared with the corresponding day of the last three years.

NEW YORK STOCKS AND BONDS

Market Falls Into Listless and Apathetic Mood.

ROCK ISLAND POINT OF STRENGTH

Increase in Earnings Causes Talk of Resumption of Dividends—Stiffening of Call Loans Hindrance to Operations.

NEW YORK, August 10.—The stock market fell into a listless and apathetic mood today, suggestive of the passing of the influences most relied on to stimulate price movements. The last of these was the crop report and its effect in attractive new demand to the stock market was negligible, judging from today's lethargic trading. The powerful forces back of the market apparently looking to the crop report to afford a basis for selling demand of the accumulation of stocks that has been made in the course of raising prices to their present lofty altitude. In the absence of sufficient demand to absorb profit taking sales, the sales were withheld, thus demonstrating once more the strong resources of the present conductors of the speculation and their indifference to ordinary discouragements. The professionals who attempted to anticipate the expected profit-taking by short sales yesterday were compelled to cover up their shorts today. This bear covering was responsible for a large part of the strength shown in the early stock market today. The covering operations concluded, there was no inclination apparent to push the advance.

The market as a whole fell into semi-stagnation as the day advanced. It is not improbable that the stiffening call loan rate, had an influence in restraining the operations for a further advance in prices. Call loans were made above the 2 per cent rate from the outset and were taken at the rate readily by borrowers. Far as the rates are from money stringency, they represent a distinct charge from the plethoric conditions, which have kept idle funds pressing for employment in the stock market at almost nominal rates for months. Even the heavy money settlements incident to the turn of the half year on July did not make any better rate for day to day loans than 2 per cent. The immediate cause of the higher rate yesterday and today was the weak bank return of Saturday and the heavy payment for customs duties, which were incident to the rush of imports to anticipate the enforcement of the new tariff law. It was expected this drain would prove temporary.

Amongst the special points of strength in today's stock market, Rock Island was conspicuous, and with considerable effect on speculative sentiment owing to the suspected identity of the controlling interests in the property and the most aggressive forces in the present stock market. The growing earnings of the Rock Island company gives occasion for speculation over a resumption of the dividends on the preferred stock, suspended since in the autumn of 1905. The preferential right of preferred stock to dividends, which was limited to 4 per cent when they were paid before, rises to 5 per cent in 1910 and to 6 per cent in 1917. The copper group was strengthened by the July statistics of the copper producers association. The month's reduction in stocks of 32,621,454 pounds represent more than half the total reduction which had occurred from the maximum surplus on April 30 last.

Bonds were irregular. Total sales, par value, $3,438,000. United States bonds were unchanged on call.

Foreign Financial.

LONDON, Aug. 10.—Money was in abundant supply on the market today and discounts were quiet. On the Stock exchange the general settlement is progressing easily, the carry-over rates being light. Those for Americans were quoted at 2½ per cent. Business for the new account was fairly good. Grand Trunk was supported on dividend anticipations and Mexican rails were active on good traffic returns. Kaffirs improved on Paris and professional buying and home rails benefited by better trade returns. American securities opened steady, with prices a fraction over parity. Later, on good support, the market strengthened and at noon was firm and from ⅛ to ¼ of a point above yesterday's New York closing. Canadian Pacific was an exception and declined ⅛. Crop reports caused early selling, but good buying lifted values. New York supported Louisville & Nashville, Union Pacific and United States Steel in the afternoon, but neglected the others and the market finished quietly steady.

PARIS, Aug. 10.—Prices on the Bourse today were firm.

BERLIN, Aug. 10.—Prices on the Bourse today were firm.
