GRAIN AND PRODUCE MARKET

Wheat Opens Steady, with Bears Free Sellers on the Bulges.

BEARS IN COMPLETE CONTROL

Corn is Weak Because of Heavy Slump in Wheat—Prices Hold Better—Considerable Support on the Breaks.

OMAHA, May 26, 1910.

With firmer Liverpool cables wheat opened steady. Bears were free sellers on the bulges. Liquidation by longs followed and values broke sharply and it turned into a runaway bear.

Market bulls have been badly trimmed. Bears have complete control and will likely press their advantage.

While corn was weak owing to the heavy slump in wheat, prices held better and considerable support was in evidence on the breaks.

Immediately after the opening leading longs sold their holdings and values turned sensationally weak.

The market was devoid of support and the weakness that has prevailed for some weeks gave shorts the advantage they have waited for.

Corn was weak and lower with the wheat, compared with the wheat selling. Longs There was little liquidation in corn as held firm and values ranged 1c lower against a 4c break in the wheat.

Primary wheat receipts were 317,000 bushels and shipments were 400,000 bushels, against receipts last year of 199,000 bushels and shipments of 462,000 bushels.

Primary corn receipts were 406,000 bushels and shipments were 518,000 bushels, against receipts last year of 653,000 bushels and shipments of 274,000 bushels.

Clearances were 2,000 bushels of corn, none of oats and wheat and flour equal to 450,000 bushels.

Liverpool closed ½d to ¾d higher on wheat and ¼d to ½d higher on corn.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, May 26.—It was like a market in war times today on change. Leading longs unloaded more than 8,000,000 bu. of September wheat in lots of 500,000 bu. One house alone purchased a line of 6,000,000 bu. Prospective retirement, at least temporarily, of one of the most conspicuous speculators in the world was among the causes. Another was the almost simultaneous settlement of big dealings in May wheat whereby other traders of prominence apparently have ended an exciting experience. The close was demoralized and at times the lowest figures of the day were 4½@5½c under the quotations current twenty-four hours previous. Corn showed a net loss of 1c to 1¼@1½c and oats 3c to 1¼@1¼c. Provisions closed unchanged to 12½c lower.

General opinion regarded the day's happenings as the end of a bull campaign which was headed by the speculator who retired and in which, if the trade guesses are correct, the leader's losses are great. First transactions in September, 1910, wheat were made on December 23, 1909, when sales ranged from 97¾c to 97½c. On March 24 the option sold up to $1.07½ and today sold down to 92¾c. The first the public knew of the impending upheavals had no apparent connection with the veteran leader, but related to extensive operations in the May delivery by other large traders. Nearly 700,000 bu. of No. 1 northern wheat heading down the lakes from Duluth to be delivered by short sellers on May contracts here were diverted suddenly to Buffalo. This made it appear that an Albany, N. Y., operator who has been believed to be the leader in May contracts had arrived at some settlement with prominent bears in that future. Almost immediately the price of May collapsed 2c and September was carried down 1 cent. There was at the moment a good financial incentive for selling September and other new crop months with the return of warm and seasonable weather in the wheat country east of the Rockies and fine rains over night in the Pacific northwest. As prices tumbled the volume of wheat poured on the market seemed to constantly increase and over-shadowed all other tradings. Much buying, however, was of a deliberate character and on a scale paralleled on a runaway market. Nevertheless each ¼c rally was the signal for the reselling of wheat. A good deal of the purchases were attributed to eastern shorts, as well as to Chicago and foreign operators. Extreme weakness marked the close, which showed a net loss of 4¼c for September and 5¼c to 5⅝c in May.

Corn was fairly steady for a time, but finally gave way because of the weakness of wheat and the warm weather in the corn belt. September ranged between 58⅞c and 60¼c, closing weak at the low point of the day, a loss of 1½@1¾c. The cash market also was weak. No. 2 yellow closed at 61@61½c. There was much selling of long September oats by cash houses with coun try connections. Considerable selling of May was also done by the cash concerns. September fluctuated between 36½c and 37½c, finishing a shade up from the bottom, but 1¼@1¼c below the previous close.

Provisions were firm at first on the lighter run of hogs, but afterwards were affected by the weakness of the grain list. In the end pork was down 12½c, lard unchanged to 2½c off and ribs unmoved.

Receipts—Today: Wheat, 23 cars; corn, 142 cars; oats, 120 cars. Estimated tomorrow: Wheat, 59 cars; corn, 133 cars; oats, 139 cars.

WEATHER IN THE GRAIN BELT

Unsettled Conditions, with Scattered Rains, Predicted for Friday.

OMAHA, May 26, 1910.

The area of low pressure, attended by rainy and unsettled weather, that has prevailed over the eastern portion of the country for several days past, is disappearing off the upper Atlantic coast. The pressure continues relatively high over the central portion, and generally clear weather prevails in the lake region, central valleys and southern states. The trough of low pressure, overlying the northwest and Rocky mountains Wednesday morning, has moved eastward and now overlies the eastern slope. Unsettled weather, with scattered rains, attends the trough of low pressure, and conditions are favorable for showers in this vicinity tonight or Friday. Temperatures are lower in the east and on the Pacific slope. They are higher west of the Mississippi river to the mountains and the weather will be slightly warmer in this vicinity tonight.

Temperature and precipitation as compared with the last three years:

	1910.	1909.	1908.	1907.
Minimum temperature....	53	49	37	40
Precipitation	.00	.10	.00	T

Normal temperature for today, 66 degrees.

Deficiency in precipitation since March 1, 5.72 inches.

Deficiency corresponding period in 1909, 2.82 inches.

Deficiency corresponding period in 1908, .56 of an inch.

L. A. WELSH, Local Forecaster.

NEW YORK STOCKS AND BONDS

Recovery of Stocks Followed by Violent Break in Wheat.

SHRINKAGE IN BOND PRICES

Small Interest Allowances Thought to Have Prompted Withdrawals of Saving Banks' Deposits—Harvest Outlook Good.

NEW YORK, May 26.—The recovery of stocks today was owing, in large part to the dispersal of the rumors of dangerous developments which came into circulation while prices were falling yesterday. The violent break in the wheat market was much considered, owing to the far reaching complications carried with it.

The technical side of the speculation in wheat was not lost sight of in taking account of the price movement, especially the reports that private settlements had been effected with the shorts in that market. Such settlements, of course, would remove a potential demand for wheat calculated to afford important support to prices and would incite corresponding urgency on the part of the longs in wheat to realize. Even such an incentive for liquidation in the wheat market has an important bearing on the money position and on needed relief of an expanded loan position by the banks of the country.

There was some rumors of proposal to reduce the per cent to New York savings bank depositors. If this movement could be accepted as an index of a falling investment return for capital it might promote a forward movement in prices of bonds and fixed interest bearing securities. But the shrinkage in bond prices which are savings bank investments and the consequent reduction in book value of the surplus of these institutions is the more evident motive. It was contended that reduced interest allowance might prompt some withdrawals of savings banks deposits for direct investment in securities, which now sell on a higher investment return than when the bulk of savings bank holdings were purchased.

The effect of this course of events is already felt in the increasing demand by banks for commercial papers which reports are coming to hand from Chicago. Besides this, opinions of the crop prospects are growing much more confident as shown by the hopeful views expressed by the price current.

Assurances of abundant harvests and with a price adjustment which would revive foreign demand and correct the dislocated foreign trade position would clear up practically all doubtful points in the present outlook. Stocks, therefore, make a ready response to all definite developments promising good harvests.

Engagements of gold today for shipment to Canada emphasizes the importance of the harvests. The Canadian banks are expanded in their loans in quite a striking degree as the banks are on this side of the border and from almost exactly the same conditions. The principal reserve banks of Canada keep large resources in New York and have corresponding power to drown New York resources to meet their home requirements.

There was a renewal of rumors today which pointed to large extension of the sales effected and the belated official announcement of the St. Paul $7,000,000 bond sale was made. The suspension for a year of a stock exchange member asa measure of discipline was supposed to be responsible for some of the liquidation.

Bonds were steady. Total sales par value, $1,265,000. United States bonds were unchanged on call.

Number of sales and leading quotations on bonds were as follows:
