GRAIN AND PRODUCE MARKET

Market Extremely Strong Because of Lack of Rain.

DRY WEATHER IN NORTHWEST

Corn is Strong and Some Higher with the Advance in Wheat—Shorts Cover Heavily—Closing Quotations.

OMAHA, June 21, 1910.

Dry, hot weather continues in the northwest. Spring wheat is deteriorating every day and severe damage is already feared.

The market opening was extremely nervous and values ranged widely for the first half hour's trading, being well above yesterday's close.

The weather is still dry and warm in the corn belt. While damage to corn at present is very small, if any, the drouth may reach further south and this feeling has stopped short selling.

Wheat was sensationally strong again today on the lack of rain and extremely hot weather in the northwest. The market was bare of offerings and commission houses had large buying orders. This advance has been heavy for two days' trading.

Corn ruled strong and higher with the advance in wheat and covering by shorts was heavy. Cash corn was ½@¾c higher on good demand. Receipts light.

Primary wheat receipts were 233,000 bu. and shipments were 432,000 bu., against receipts last year of 302,000 bu. and shipments of 471,000 bu.

Primary corn receipts were 578,000 bu. and shipments were 712,000 bu., against receipts last year of 481,000 bu. and shipments of 517,000 bu.

Clearances were 34,000 bu. of corn, 1,000 bu. of oats and wheat and flour equal to 17,000 bu.

Liverpool closed 1½@1¾d higher on wheat and ¾d higher on corn.

CHICAGO GRAIN AND PROVISIONS

Features of the Trading and Closing Prices on Board of Trade.

CHICAGO, June 21.—Temperatures of 100 and 110 degrees, dust clouds preventing sight twenty rods ahead and total absence of rain—that was the picture today of the drouth stricken wheat country to the northwest presented by traders on 'change here today. A whirlwind market resulted and higher prices of the session were made near the close. Final quotations showed a net advance of 2⅝@2⅞c to 3⅜@3½c, as compared with last night's figures. Corn finished ½@¾c to ⅞@⅞c up, and oats 1@1¼c higher. Provisions closed 5c higher to 20c lower.

By far the greatest speculative strength in wheat for months was shown. Alarm over the spring crop and the sensational advance in prices in northwestern markets was almost the sole cause back of the extraordinary buying here. The scare which has been on for several days in regard to the late sown wheat developed into a semi-panic at the outset today. It appeared as if nobody wished to sell the grain at any price. Commission houses were filled with stop-loss buying orders. Profit taking by holders gave the market only a few temporary setbacks. A decrease of 4,300,000 bushels in the world's visible supply was taken some notice of, although chiefly as bearing some relation to the acute situation in the American northwest. Even Winnipeg reported extreme heat and sent predictions that without heavy rains soon the crop would be only half a crop. September ranged from 95c to 98⅛@98¼c and closed strong at 97⅞@98c, a net gain of 3⅝@3¾c.

Business in the corn pit was of large dimensions. September fluctuations were between 60⅝c and 61¼c, with the close strong at 61c, a net advance of ⅝@¾c. The cash market was firm. No. 2 yellow closed at 60⅝@61¼c.

Oats conditions were a reflection of the doings in other cereals. The variations in the price of the September delivery were bounded by 38⅛c and 39¼c. Last figures were 39⅛@39¼c, a rise of 1⅛@1¼c above the previous close.

July pork alone retained 5c of a moderate advance, which all products shared early. September pork finished 20c net lower and other articles down 5@12½c.

Leading futures ranged as follows:

Oats, bu	3,000	8,000

WEATHER IN THE GRAIN BELT

Continued Fair is the Prediction for Wednesday.

OMAHA, Neb., June 21, 1910.

The weather continues very warm over the central valleys and throughout the eastern and southern states. Temperatures reaching 100 or more were recorded in North Dakota and Montana during Monday. The highest reported was 105 degrees at Miles City, Mont. They continued well up in the 90s throughout Nebraska and 100 degrees was again recorded at Culbertson. The highest recorded at Omaha was 96 degrees, being the highest of the year. Scattered rains occurred at points in the Ohio valley and southern states, but no precipitation worthy of note occurred in the other sections east of the Rocky Mountains. An area of high pressure, accompanied by cooler weather, is moving in over the Pacific slope and conditions are favorable for cooler weather in this vicinity by Wednesday. The weather is unsettled in the extreme northwest and rains are falling in western Montana and west to the coast. This condition will probably affect the central valleys within the next few days, but fair weather will probably continue in this vicinity tonight and Wednesday.

The minimum temperature and precipitation compared with the last three years:

	1910.	1909.	1908.	1907.
Minimum temperature	76	67	75	67
Precipitation	.00	.92	.00	.82

Normal temperature for today, 73 degrees.

Deficiency in precipitation since March 1, 9.42 inches.

Deficiency corresponding period in 1909, 3.29 inches.

Excess corresponding period in 1908, 2.94 inches.

L. A. WELSH, Local Forecaster.

NEW YORK STOCKS AND BONDS

Apathy Overcomes Stock Market and Apathy Reigns.

SPECULATORS WATCH CROPS

Are Peculiarly Sensitive to Signs of Danger—Discount Rates Recede in Lonton and in Berlin.

NEW YORK, June 21.—Apathy overcame the stock market again today, and the dealings dropped back to near the point of idleness. There was a diversion of speculative activity to the wheat markets, and the reports circulated in that market of damage to the spring wheat crop were not heard without solicitude in the market. The considerable rise in prices at the close yesterday after the almost inert market for a long time past prompted to some profit-taking sales on the part of the professional element.

Speculative sentiment is peculiarly sensitive to even a suggestion of danger of impairment of the full return of agricultural products which have been counted on.

The refusal of the stock market to take great alarm over the spring wheat situation was due partly to the moderation with which the subject was touched in the weekly bulletin of the government weather bureau, which announced that the hot, dry weather of the week was very trying to vegetation already deficient in vitality on account of previous adverse weather conditions in Wisconsin, Minnesota and the eastern part of the Dakotas and northern Iowa. This specialization followed the opening summary of the bulletin, holding that "for the country as a whole the weather of the last week was the more favorable for the agriculturist of the season to date."

A sustaining influence in the stock market is the easing tendency of money markets. Discount rates receded in London, and Berlin today. The foreign enchange market in New York is declining. The $22,500,000 equipment trusts of the New York Central lines, which were offered in New York today are to be offered in foreign markets at the same time. The bond department of the stock exchange remains flat. Attention was attracted by an announcement that a cut in prices by a leading New England cotton mill interest was to be followed on July 1, by an advance in the same product, thus intimating a period to the concessions.

Bonds were irregular. Total sales, par value, $1,148,000. United States 2c coupon, advanced ¼ per cent in the bid price on call.
