

# WOMAN'S BACKACHE

The back is the mainspring of woman's organism. It quickly calls attention to trouble by aching. It tells, with other symptoms, such as nervousness, headache, pains in the loins, weight in the lower part of the body, that a woman's feminine organism needs immediate attention.

In such cases the one sure remedy which speedily removes the cause, and restores the feminine organism to a healthy, normal condition is **LYDIA E. PINKHAM'S VEGETABLE COMPOUND**

Mrs. Will Young, of 6 Columbia Ave., Rockland, Me., says: "I was troubled for a long time with dreadful backaches and a pain in my side, and was miserable in every way. I thought until I was discouraged and thought I would never get well. I read what Lydia E. Pinkham's Vegetable Compound had done for others and decided to try it; after taking three bottles I can truly say that I never felt so well in my life."

Mrs. Augustus Lyon, of East Earl, Pa., writes to Mrs. Pinkham: "I had very severe backaches, and pressing-down pains. I could not sleep, and had no appetite. Lydia E. Pinkham's Vegetable Compound cured me and made me feel like a new woman."

**FACTS FOR SICK WOMEN.** For thirty years Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has been the standard remedy for female ills, and has positively cured thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration.

## THE ETERNAL FEMININE.

Western Woman in New York Loses \$5,000 From Her Bustle.

The last article of woman's wearing apparel which has done duty as a bank has failed. In the course of years feminine ingenuity has devised many ways of carrying money with more or less safety, but it remained for a western woman to use a bustle for a bank, as the following advertisement in a New York paper revealed:

LOST—\$5,000 by a self-supporting woman; a liberal reward will be paid. TROTH, 148 W. 46th st.

The \$5,000 of the advertisement was sewed securely by Mrs. Troth, of Denver. Into a little pad stuffed with curled hair, which, with the modern woman in her close fitting tailor suit, is the only thing in the way of a bustle worn. How or when the money disappeared no one knows. It was the savings of years. When the owner discovered that there was a little rip in the top of the pad she investigated and found the money was gone. That is all she knows about it. Mrs. Troth, who is a young woman, went to New York three months ago to perfect herself in tailoring that she might return to Denver and be fully fitted to open a millinery and dress-making establishment. The money which she was afraid to trust to a bank, was her capital with which she intended to go into business.

**The Necessary Shock.** A college professor had been seriously ill of a fever for several weeks, but the fever had left him at last, and he lay in a stupor, utterly exhausted.

"This is the really critical period," the attending physician said to the watchers in an undertone. "If he has sufficient vitality to carry him through this—and I am strongly disposed to hope he has—he will recover. At present there is nothing we can do but be patient and give nature a chance, watching in the meantime for an opportunity to awaken his interest in what is going on about him."

One of the attendants, who happened to be standing near the window looking at the rosy sunset, remarked to the doctor:

"See what a lurid sky there is." The sick man opened his eyes and turned his head in the direction indicated. "Lurid!" he exclaimed, in a tone of disgust. "If you will consult your dictionary, madam, you will find that lurid means gloomy, ghastly, dismal." "He will recover!" announced the doctor, triumphantly.

## People Tell Each Other About Good Things.

Twelve years ago few people in the world knew of such a preparation as **Powder for the Feet**. To-day the genuine merit of Allen's Foot-Ease has been told year after year by one grateful customer to another, there are millions who would as soon go without a dentifice as without Allen's Foot-Ease. It is a clean, wholesome, healing, antiseptic powder to be shaken into the shoes, which has given rest and comfort to tired and aching feet in all parts of the world. It cures while you walk. Over 30,000 testimonials of cures of smarting, swollen, perspiring feet. It prevents friction and wear of the stockings and will save in your stocking bill ten times its cost each year. Imitations pay the dealer a large profit, otherwise you would never be offered a substitute when you ask for Allen's Foot-Ease, the original powder for the feet. Imitations are not advertised because they are not permanent. For every genuine article there are many imitations. The imitator has no reputation to sustain—the advertiser has. It stands to reason that the advertised article is the best, otherwise the public would not buy it and the advertiser could not be continued. When you ask for an article advertised in this paper, see that you get it. Refuse imitations.

**Uncle Sam Wants Flying Machines.** The United States government is advertising for bids for heavier-than-air flying machines. Acceptable machines must be able to carry two persons of a combined weight of 350 pounds on a flight of 125 miles. The machine must be able to make at least 40 miles an hour. They must be able to start from any open field and land in like surroundings without damage.

**Confidential Friend**—One of your constituents, the editor of the Plunkville Post, printed a statement last week that you give away in charity every year ten times the amount of your senatorial salary. Anything in it?

Senator Lotman—O, yes; I reckon I'll have to give him a postoffice.

# GREAT INDIAN TRIBES OF THE UNITED STATES

**The Crows.**  
Faithful friends of the white man, comrades of the pioneer and the soldier in battle with the Sioux and the Cheyenne, the Crow, or Absarake, are now passing from the face of the earth, almost forgotten. The tribe inhabits a splendid reservation in southern Montana, and the whites are striving to open it for settlement, which causes protest from the Crows—a protest which will go unheeded. Gratitude for past favors done should protect the Absarake to-day, but when did the white man show gratitude to the Indian who owned good lands?

The Crow, according to some ethnologists, are of the Shooshoni race, while others classify them as a branch of the Dakota. They are probably a mixture of the two races, crystallized into a compact tribe by the exigencies of war and the pressure of powerful enemies. It is doubtful if they ever numbered more than 4,500 souls—that was an estimate placed on them by Catlin seventy years ago—and they now total about 1,700. The decrease among them has been greater in time of peace than when they were at war. In 1884 they numbered 3,226; this number fell to 2,456 in 1888, and has now shrunk to about 1,720. Consumption is mainly responsible for the immense death rate of the tribe.

The Crows are of great stature, and proud, yet courteous bearing. As warriors, they ranked high among the tribes, and, for their small number, did splendid fighting against the Sioux, Cheyenne and Blackfoot. Their Montana hunting range was one of the richest in the country, and the Absarake managed to hold it despite the ceaseless attacks of far more numerous foes. From the first arrival of the white man, the Crow nation was the new-comer's friend. The Crow warriors fought in countless battles with the prairie hordes, and it was a Crow who alone escaped from the slaughter of the Custer massacre.

Of late years the Absarake have taken great interest in farming, stock raising and irrigation. They are fast acquirers of civilization, but are dying so rapidly that only a few of them will be left in another generation.

## SECRET OF AEROPLANE.

**Wright Brothers' Airship is Described by Builders.**  
What purports to be a complete description of the Wright brothers' successful aeroplane has been given out. The description was taken from drawings and descriptions filed with the French patent office when application

was made for patents which the French government issued last January.

To the partial description of the invention given by the Wrights themselves, but one new fact is advanced, the plan by which the aviator is enabled to maintain the equilibrium of the aeroplane despite sudden and variable changes in the equilibrium of the air currents on the wings is increased by the angle of resistance in one wing and decreasing it in the other, the effect of which is to return the machine to an even keel.

Prevention of a rotary movement being given to the machine by the action of the air currents on the wings is effected by a "fish-tail" rudder that is set at the rear of the machine and is connected by cables with a similar rudder on the front of the machine.

Middle picture shows the first Wright "glider," built in 1900. Top picture, the second glider, 1901. Lower picture, the third glider, 1902-3, the first one to contain an engine.

A horizontal rudder is also fixed to the front of the machine.

Orville Wright's description of the machine is quoted as follows: "Approximately it consists of a box-like frame 40 feet wide, 7 feet long and 7 1/2 feet deep, made of spruce and ash. At the center and top front is a front rudder, a feature which the Wrights introduced and which has proved superior to the old method of a rear rudder.

"In the center, to the rear, is the tail of the machine, approximately twelve feet in length, less than one-third the

length of those on French flyers. This consists in different models of one or two vertical cloth-covered frames.

"At the rear, balancing the machine and as near the center as possible, are two propellers. Below the frame work and toward the rear is a skid, similar to the runners of sleds. This is used for landing and differs in this particular from the French machines, which are equipped with wheels. For a portion of twelve feet at each end the upper and lower frame work is provided with a surface of strong cotton cloth.

"In the center of the machine at the bottom is a small double-wheel truck, which, running on a monorail, is used while the machine is acquiring speed enough to leave the ground. The monorail is easily movable in any direction.

"The Wright machine weighs about 800 pounds, and in addition to its own weight, including a four-cylinder motor of between twenty-five and thirty horsepower, devised and made by the Wright brothers, the machine can carry two men and fuel enough to drive the machine 300 miles. It can carry enough fuel with one man aboard to travel 500 miles."

**Women Wear Overalls.**  
A woman can wear overalls any old time in the State of Arkansas and not violate any of the laws, providing that she does not attempt to disguise herself as a man.

This, according to a Little Rock dispatch, is the gist of a decision handed down by Attorney General Kirby, at the behest of woman legislators. Kirby, it is said, admitted in his opinion that the wearing of overalls by women might be desirable at times, but hoped that it may not become a general prevailing style.

But there is a lot of uneasiness all over Arkansas, from the hotel roundabouts of the cities to the front porches of cross-road stores. For it is feared that, in view of the decision, "women's rights" leagues may be started and the members urged to wear overalls if they care to.

**Strong Winds and Sand Storms** cause granulation of the eyelids. **PETTY'S EYE SALVE** soothes and quickly relieves. 25c. All druggists or Howard Bros., Buffalo, N. Y.

**What is the matter, little boy?** asked the professor. "I've got the measles," answered the boy. "I've got the measles. They're only one of 'em."

**Calculated for Himself.**  
As belittled a man of science, Lord Kelvin was courageous in the extreme, and there was a little known story of him worthy of being placed by the side of the famous anecdotes of Nasmyth, the inventor of the steam hammer, who placed his hand under the mighty weight to show that it could be made to come down gently and remain just above his palm.

This story gains point by the fact that Nasmyth first placed his watch underneath, and by a little misadventure it was smashed to pieces.

Lord Kelvin once told his class that while an electric shock of 3,000 volts or so would kill a man, a voltage of 300,000 would be harmless. He coolly proceeded to illustrate the fact on himself, but the students cried in horror: "Don't; try it on a dog."

The great scientist looked reproachfully at the class and quietly remarked, "Didn't I figure it out myself?" and then turned the tremendous current into himself.—Kansas City Star.

**Food Abundance in Virginia in the Seventeenth Century.**  
Few countries of the world have possessed so abundant and varied a supply of food as Virginia during the seventeenth century. This party explains, writes P. A. Bruce in "Social Century," the hospitable disposition of the people even in those early times.

The herds of cattle, which ran almost wild, afforded an inexhaustible supply of milk, butter, cheese, veal and beef. Deer were shot in such numbers that people cared little for venison. So abundant were chickens that they were not included in the inventories of personal estates. No planter was so badly off that he could not have a fowl on his table at dinner.

Vast flocks of wild ducks and geese frequented the rivers and bays and were looked on as the least expensive portion of the food which the Virginians had to procure. Fish of the most delicate and nourishing varieties were caught with hook or net. Oysters and shellfish could be scraped up by the bushel from the bottom of the nearest inlet or tidal stream.

Apples, peaches, plums and figs grew in abundance. Not only were grapes cultivated, but excellent varieties grew wild through the forest. Such an abundance of wild strawberries could be gathered that no attempt was made to raise the domestic berry.

The watermelon flourished, and in hominy, the roasting ear and corn porridge the Virginians possessed articles of food of great excellence, which were entirely unknown to the people of the old world. There was produced on every plantation an extraordinary quantity of walnuts, chestnuts, hazelnuts and hickory nuts. Honey was obtainable in abundance, both from domestic hives and from hollow trees in the forest.

**Peculiar to Terre Haute.**  
There is just one city in this country where new guests in the two leading hotels drink water just for the fun of it. That is Terre Haute, Ind., says the New York Sun.

It is the joy of the life of the invited to invite an unsuspecting visitor to the hotel to eat. There is always an expectant look on the face of the host as the guest settles himself, and the host who does not get his looked-for laugh is rare.

As the guest settles himself suddenly there descends by his ear down toward the table like a shot a stream of water. Most people jump, according to their jumping abilities.

The stream always safely hits the drinking glass, and as the guest rallies and looks up for the source of the stream there is a grinning colored gentleman holding high something like a small tea kettle with a pretty long spout. The higher the guest jumps the more gratified this person looks.

Almost everybody will drink two glasses of water and signal for a third just to be sure the knight of the tea kettle can hit that glass. Where the custom originated nobody seems to know, but Terre Haute always refers to it with something like pride.

For the colored gentleman who is the smartest one of the bunch at the trick three feet is nothing to fire a stream from the "water can," as it is styled. He will juggle it first close, then farther away, and gradually further and then down again, without spilling a drop. Doctors don't have to advise water drinking to people in those hotels.

A wall flower by any other name would wither just the same.

**ONE WOMAN'S ENDURANCE.**  
Suffered from kidney irregularities, Mrs. A. S. Payne, of 801 Third Ave. So., Columbus, Miss., suffered for years. She says: "The pains in my back, sides and loins were so terrible that I often smothered a scream. Every move meant agony. My rest was broken by a troublesome weakness and the secretions seemed to burn like acid. I was in an awful condition and doctors did not seem to help. Don't's Kidney Pills benefited me from the first and soon made me a strong and healthy woman."

For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

**Mild Punishment.**  
Stranger—in your town they close the front doors of the saloons on Sunday, and open the side doors, do they? Isn't that whipping the devil around the stump?

Native—Yes, and the whipping doesn't hurt him a bit, either.

**Strong Winds and Sand Storms** cause granulation of the eyelids. **PETTY'S EYE SALVE** soothes and quickly relieves. 25c. All druggists or Howard Bros., Buffalo, N. Y.
