Umpire Fined for Assault.

HASTINGS, Neb., Aug. 2.—(Special Telegram.)—Umpire Nugent was attacked by an infuriated fan at the conclusion of today's game. The man struck the official on the face and the latter defending himself against the crowd that swarmed about him, struck George Saunders on the face with his mask, drawing blood. Nugent is the third umpire to serve here in the last four games. His decisions were frequently disputed. Score:

Umpire Nugent was fined $10 and costs by Police Judge Benson tonight for striking George Saunders. Nugent said he was merely defending himself and had no grievance against Saunders.

The police had left the grounds and Nugent would have been mobbed had not Police Judge Benson and the two ball teams gone to his rescue. It was the first time an umpire had been attacked here since the league was organized.

Will Request the Union Pacific to Move Its Tracks

E. J. Cornish, City Attorney Rine, City Commissioner Hummel and W. D. Adams, superintendent of parks, inspected the work of improvement going on at Carter Lake park. Mr. Cornish was well pleased with the progress of the work and believes the park will ultimately be one of the most beautiful places in the city.

An attempt will be made by Mr. Hummel and City Attorney Rine to compel the Union Pacific to move its tracks from the park, these tracks interfering with the improvement plans of the park commissioner.

A conference was held with railroad officials, but no decision was reached. Other conferences will be held, which the park commissioner believes will result in the railroad complying with the city's request to vacate the right-of-way where it interferes with the parking plans.

Recruits Change Their Minds After Taking Their Baths

Cecil Buford and Philip W. Cashman, both young Kentuckians, held a little "bull moose" convention while they scrubbed each other's backs in a bath tub at the army recruiting station, and they then and there decided "to bolt." The vote was unanimous. They resolved themselves into a committee of the whole, waited on the recruiting officers and reported that after due deliberation they had decided three years in the army was too long away from home. The officers are still at a loss to know what prompted the sudden change of mind, for the two Kentuckians walked into the recruiting station a few minutes before and announced their desire to join the army. On examination they were found physically fit, and were then consigned to the bath tub where all the recruits are allowed a thorough scrubbing as one of the first steps. They took to the water like eels and scrubbed each other faithfully with brush and soap, but when they had had their free bath they decided they did not desire army service.

WHEAT ABOVE THE AVERAGE

Reports by Burlington from Fifty-Six Counties Give Great Yield.

MAY BE THE BUMPER CROP

Oats Also Threshing Out Strong—Corn is Growing Fast and Also Gives Assurance of Hav- a Big Yield.

General Manager Holdrege of the Burlington has received from the several superintendents of the lines in Nebraska what is practically the final report on the small grain crop for this season, so far as Nebraska is concerned. This report covers fifty-six counties of the state, taking in the greater portion of the grain growing area and gives the state a better showing than had been anticipated, especially with reference to wheat.

Railroad officials and grain men look upon the Burlington's report just given out as being very close to correct, as special pains were taken in gathering the data. All agents were instructed to secure their figures from farmers and grain dealers in their localities. These figures when secured were forwarded to the division superintendents and by them compiled, the compilation being sent to the general manager's office in Omaha.

The tabulation of the reports from the fifty-six counties through which the Burlington lines pass fix the average yield at 19 3-11 bushels per acre on wheat.

Corn Also Good.

The figures on oats are given in the tabulation, but as some counties are missing it has been impossible to secure the average. While it is too early to estimate the corn crop, all agents report on it, giving its condition on August 1, the date of the compilation. With the exception of a small area in the extreme southwest corner of the state the condition is reported as good, and generally better than an average at this season of the year.

On the Nebraska wheat there is no estimate made on the total yield, but as the acreage is greater than at any time in the history of the state, conservative railroad and grain men place it at around 50,000,000 bushels, while others feel certain that it will exceed this by at least 5,000,000 bushels. It is said that about 48,000,000 bushels is the former high record. And then, too, the quality this year is declared to be superior to the grain of any former year.

Averages for Ten Years.

With an average yield of 19 3-11 bushels per acre, the yield is far ahead of the ten-year-averages of the past, these figures being as follows:

	Bushels per acre.
1866 to 1875	14 8-10
1876 to 1885	12
1886 to 1895	10 8-10
1896 to 1905	15 4-10

Then, too, if the yield runs around 19 3-11 bushels per acre, not taking into consideration the increased acreage, it is going to be up to the yield of most of the years during the last decade, for during these years, according to the government report, Nebraska wheat turned out as follows:

Year.	Bushels per acre.	Year.	Bushels per acre.
1900	12	1906	22
1901	17 1-10	1907	18 1-10
1902	20 9-10	1908	17 2-10
1903	15 7-10	1909	18 8-10
1904	13 6-10	1910	16 8-10
1905	19 4-10		

Yield by Counties.

The counties that make up the report are, together with their average yield, as follows:

Counties.	Average Yield Wht.	Oats	Counties.	Average Yield Wht.	Oats
Holt	24	30	Greeley	20	25
Antelope	24	30	Sherman	20	30

Keep your Face Cool with a Gillette shave every morning

START the day with a quick, soothing Gillette shave—plunge your face into cool water.

It's the stubble of beard that makes the face so feverish in warm weather.

The beard is growing very fast. Nerves are specially active.

Perspiration is excessive—most irritating just when the skin can least stand it.

You can shave every morning with the Gillette Safety Razor and enjoy doing it.

You can *adjust* the Gillette for your individual beard and skin—for a light or a close shave.

These 1912 Gillette Blades are the smoothest and sharpest shaving edge ever made. They slip the beard off clean—leave your face velvet-smooth and cool.
