## FASHION HINTS

This costume could be carried out nicely In cloth and equally as well in a silk, if something for more dressy occasions is wanted. In either case, chiffon cloth would be a good choice for the waist, matching exactly the skirt material.

Law of Compensation.

Bobby (kicking)-Arthur's doughnut is bigger's mine. Mother-But Arthur's has a much larger hole in it that yours has, Bobby.-St. Louis Post-Dispatch.

IT WORKS.

The Laborer Ents Food That Would Wreck an Office Man. Men who are actively engaged at

hard work can sometimes eat food that would wreck a man who is more closely confined This is illustrated in the following

story: I was for 12 years clerk in a store working actively and drank coffee all

the time without much trouble until after I entered the telegraph service. "There I got very little exercise and drinking strong coffee, my nerves grew unsteady and my stomach got weak and I was soon a very sick man. I quit meat and tobacco and in fact 1 stopped eating everything which I

thought might affect me except cof-

fee, but still my condition grew worse and I was all but a wreck. "I finally quit coffee and commenced to use Postum a few years ago and I am speaking the truth when I say, my condition commenced to improve immediately and to-day I am well and can eat anything I want without any bad effects, all due from shifting from

coffee to Postum. "I told my wife to-day I believed I could digest a brick if I had a cup of Postum to go with it.

We make it according to directions, boiling it full 20 minutes and use good rich cream and it is certainly delicious."

Look in pless for a copy of the famous little book, "The Road to Well-

There's a Reason." Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of

OLD AGE AND EMPLOYMENT.

Something About a Serious Condition Difficult to Remedy. Writing in protest against the general reluctance to take on as new members of a working staff men of more than middle age, a correspondent wanted to know yesterday why it would not be just as fair for the public to refuse its patronage to business houses the heads of which are more than 50 years old, on the ground that their wares were likely to be inferior to those produced under the management of men in their prime. the New York Times says. The question was ingenious, but the analogy owed its plausibility to a false as-

sumption-or on several of them.

As a matter of fact, the goods made or sold by a long-established firm are apt-of course, with any exceptions -to be superior to those guaranteed. by one of less experience and reputation. This is the lesson of common observation. Equally well known is it that men of advanced years, while often highly competent in such posttions as those which they would naturally occupy in a house which they had long served, lack the ready adaptsare at night? Rub them with a little Hamilias Wizard Oil. They'll be glad is custom which young men show, and they are likely to be quite unfitted for the subordinate places which alone can be given them by a new employer,

> Were the hiring of an old man a mere matter of paying him for what he can do and of discharging him when he ceased to be useful or sufficiently useful to be profitable, he would find little or no difficulty in getting employment. But what employers dread and avoid is the assumption of responsibilities sure to come soon in the case of the old or elderly man. He cannot be turned out to starve when the fast approaching end of his working days arrives-cannot, that is, without more or less disturbance of conscience and loss of respect, self and other-and the prospect of paying a pension of some sort or form to a man most of whose services have been rendered to another employer is out of harmony with economic instincts.

Of course, all responsibility is not avoided by the refusal to employ worthy men whose only fault is their age, but it is then a divided, vague and unidentified responsibility, resting on the community at large, and, therefore easy to bear-much easier well known in this community. I advise at all events, than is the responsibility of him who has at once granted the old man's application for work. So the world is made. There is something cruelly wrong about the situation, but its remedy is more than difficult.

BED FOR HOSPITALS.

Can Be Adjusted to Give Patient

Change of Position. A boon to the bed-ridden and to thousands of hospital patients throughout the country is the invention of a Kentucky man. This is a bed which can be raised or lowered at the head to any position comfort

able to the nationt and having a rest for the legs in addition. A pair of standards with a crossbar, looking like a horizontal bar on rollers, holds the upper end of the bed suspended. At one side of the standards is a wheel and gear by which the head of the bed may be raised or lowered to chance the position of the person occupying it. Running up from the foot of the bed is a T-shaped bar to be placed under the legs of the patient, so that when the bed is tilted at a steep angle he is kept from sliding downward, the bar beneath his legs giving him the feeling of being in a reclining chair. Any person who has been forced to lie abed for any length of time, unable to change his ing, as the only item carried on the position, will appreciate the reliat such a bed will afford.

Sweets Are Great Buby Savers.

The young, unspoiled human animai has a liking for sugar just as it has for sunlight, for fresh air, for play, for paddling in the surf and plunging in the stream, or for food when it is it received its charter in 1886, but was hungry and sleep when it is tired; and, subject of course to reasonable limitations, as wholesome as any of the others. This is precisely what our specialists in children's diseases, and broad-minded family physicians have a mile, which would seem to be close been urging for decades past, and it to the record for street car lines. In banishment of starchy foods, gruels, the road to operate three cars without and pans from the nursery and the substitution of pure, sweet milk, few things have done more to increase the vigor and happiness of modern children and to cut down our disgraceful infant mortality, than the free and intelligent use in the nursery of sweet fruits, preserves, sugar, taffy and butterscotch.-Woods Hutchinson in Suc-

Horsemanship in Heaven.

What Was His Namet

was his name? I do now know his name only know he heard God's voice and

came: Brought all he leved across the sea, To live and work for God and me; Felled the ungracious oak With horrid toil

Dragged from the soll The thrice-gnarled roots and stubborn rock; With plenty filled the haggard moun-

tain side, And when his work was done, without memorial died. No blaring trumpet sounded out his

fame: He lived, he died. I do not know his name.

No form of bronze and no memorial stones Show me the place where De his moldering bones,

Only a cheerful city stands, Builded by his hardened hands-Only ten thousand homes, Where every day

The cheerful play Of love and hope and cour; re comes; These are his monuments, and these There is no form of bronze and no memorial stone.

And I? Is there some desert or some boundless

Where Thou, the great Go'l of angels. wilt send me? ne oak for me to rend, some so

For me to break, Some handful of Thy corn to take, And scatter far affeld. Till it in turn shall yield

Of grains of gold To feed the happy children of my God? Show me the desert, Father, or the is it Thine enterprise? Great God.

send me; And though this body lie where ocean rolls. Father, count me among ril faithful -Edward Everett Hale.

Better Farther On. As we travel through the desert, Storms beset us on the way, But beyond the River Jordan Lies a field of endless day.

Chorus-Farther on-still go farther, Count the milestones one by one; Jesus will forsake you never; It is better farther on.

Oh, my brother, are you weary Of the roughness of the way? Does your strength begin to fall you. And your vigor to decay?

Jesus, Jesus will go with you; He will lead you to the throne; He who dyed His garments for you And the wine-press trod alone.

Farther on; oh, how much farther? Count the milestones one by one; Know no counting, only trusting, It is better farther on.

Hark! a voice from Eden stealing. Softly in an undertone. Hark! I hear its gentle whisper: "It is better farther on."

At my grave, oh, still be singing, Though you weep for one that's gone, Sing it as we once did sing it: "It is better farther on."

NEW YORK'S HORSE CARS.

Receiver Reports Big Deficit on 28th

and 20th Streets Line. Joseph B. Mayer, receiver of the 28th and 29th Streets Crosstown Railroad Company, filed yesterday with the Public Service Commission the report of the road for the quarter ended March 31, the New York Tribune says. The report shows a deficit for the ing ratio of 230.02 per cent. In other

much to operate as its earnings were. Metropolitan Street Railway Com- that it seemed as though I could tear pany's system over a year ago and my face all to pieces. Paint Durability.

The first thought in painting should, of course, be durability-and durability means simply pure paint properly applied. Pure paint is nure white lead and linseed oil (with or without tint-

ing material). Some years ago the paint-buyer vas likely to get adulterated or counterfeit white lead if he was not familiar with brands. To-day he may buy with perfect safety if he only makes sure that the Dutch Boy trademark is on the packages of white lead that he buys. This trademark was adopted about three years ago by National Lead Company to distinguish the pure white lead made by them from the worthless adulterated and fake goods. It is a guarantee as valuable to the house-owner as the education of a paint expert could be.

Jim's Verneity.

Hogs, as is well known, are remark ably sagacious animals, quick to detect human peculiarities, especially when they affect their own interests, and especially their food supply. A writer in the Kansas City Star tells of a discussion at a village grocery store which brought in this interesting fact. The veracity of old Jim Perkins was under discussion. Presently Uncle Bill Abbott ambled

"What do you think about it. Uncle Bill?" they asked him. "Would you call Jim a Har?"

"Well," answered Uncle Bill, slowly, as he thoughtfully studied the celling, "I don't know as I'd go as far as him.

WISHED FOR DEATH.

Sufferings from Kidney Troubles Were So Acute. Mrs. Josephine Jeffery, 24th and Washington Sts., Marion, Ind. says:

'To look back upon what I have gone through, it seems a miracle that I live and I feel that I owe it to Doan's Kidney Pills. My case devel oped gradually. First, backache, floating spots before my eyes, weakness and exhaustion, then a terrible steady pain over the

kidneys and an extreme nervousness. Doctors finally said there was no hope for me, but I began using Doan's Kidney Pills and gradually recovered my

The profits of the Prussian tirely unreasonable and in excess of state letteries last year amounted to the officers' authority. It was no denearly \$2,000,000.

There could hardly be a better example of the scientific spirit than the recent application of the methods of biometry to those excessive minute animals, the bacteria. C. E. A. Winslow and Anne Rogers Winslow have, according to Professor F. P. Gorham, marked the beginning of a new era in bacteriological classification and nomenclature by their studies in this direction. They have applied the methods used by anthropologists and students of variation and heredity to the definition of the species of bacteria. The results are, of course, technical in their nature, and in themselves only interesting to students of the subject, but they have a broad general interest because they serve to assure the public that advance on strictly scientific lines is being made in the study of those almost infinitesimal creatures that play so important a part in human life and everything that human life depends upon: In an article strongly supporting

medical inspection and treatment of public school children the Lancet says that "pupils have become the property of the nation, and the nation has acquired a right to protect them from the carelessness or ignorance of their parents." The Lancet adds: "The experience of Germany seems to lean to the institution of 'school clinics' as the most ecenomical and convenient arrangement for securing the medical exclaimed and gave themselves up to attention that is required in towns; and it is manifest that such clinics could be easily established in every next day's paper was the account of large town, placed so as to be con- somebody having invented a microschools, and officered by two or three or more of the neighboring general that it would be no time at all until practitioners, with the aid, when neoessary, of dentists and of ophthalmic or aural specialists, whose visits might be made as frequently as the needs of the locality required. But the services of all concerned must be paid for."

## Legal Information

The New York Building Code, sections 153-155, provides that, on the refusal of an owner of an unsafe building to make it safe or remove it, a report of the building shall be made to a court, which, if it finds that the building is unsafe, shall command the commissioner of buildings to take it down or make it safe, and that the expense thereof shall constitute a lien on the premises. Section 157 provides that if a building collapses the city may remove the debris, to be paid for out of the fund, under section 158. In the case of In re Jenkins, 115 New York Supplement, 385, such provisions are construed by the New York Supreme Court, and it is held that the city has no lien on property for expenses incurred in removing debris of a collapsed building and the

bodies of people buried beneath the

ruins, and is directly liable to the
