Most of those who say they do the years.

A LIBRARY ON

HE development of the free circulating library is one of the outstanding features of this age. Mr. Carnegle and others have scattered libraries so freely throughout the land that there is now scarcely a town or village that has not some sort of a library. But it has remained for the Washington County library of Hagerstown, Md., to develop the limit of usefulness for the collection of books, and to demonstrate in

a very practical sense that books are published to be read, not to be stored The Radium institute of Heidelberg, on shelves. The Washington County library does not wait for readers to to be opened before the end of the come to it; it sends out a colporteur, not only to carry books, but to spread

year, will be the first of its kind to the gospel of literature in isolated rural regions.

The itinerant library, drawn by a pair of sturdy horses, has become a familiar sight in the Washington County section of the Blue Ridge. Like After having been in use since 1750, the semi-annual appearance of the tin peddler's cart, its approach is an octhe Testament used at the Essex sest currence quickly heralded throughout the neighborhood. The housewife sions court at Shelmsford, England, throws a sunbonnet over her head, and, followed by one or two barefooted has now been replaced by a new one, children, runs out to the roadside to see what the good-natured bookman has brought on this round. The chickens follow hotfoot, certain that such The bottle that keeps its contents a commotion can only mean that some appetizing dainty is about to be hot or cold for hours was no catch- distributed. In the middle of this scene of domestic activity the itinerant

and your other girl may be interested in it. Wouldn't you like to have it, Mary?" he inquires, turning toward the larger of the two barefooted girls with a genial smile. The smile completes the book missionary's conquest, and the barefoot miss looks up from beneath her sunbonnet, extends a hand for the book and takes it with a whispered "Thank you."

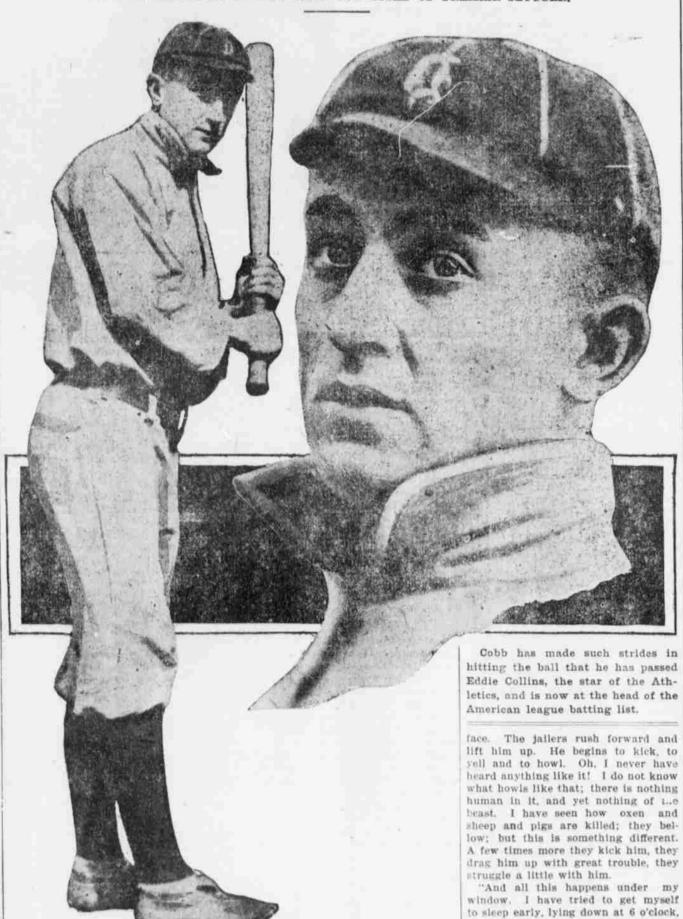

The itinerant librarian takes the name of the person to whom the book left on the last visit has been transferred, shuts the doors over his shelves, climbs to his seat, unwinds his reins and, the chickens being no longer under foot owing to the discovery that books are not good to eat, drives off up the dusty road. So he goes up and down the mountains, day after day, helping a farmer to pick out a book which will be of benefit to him in his work and opening windows upon scenes in many lands and times to the uncultivated imaginations of the young people.

Work of the Past Year.

In the course of the last nine months of 1908 each of the sixteen routes in the county was traveled twice, and some of them three or four times. Several of them require four days for the journey, while others can be covered in two or three days. Only a few can be covered in a day. New routes are constantly being mapped out, and it is expected that a second wagon will be required soon. Last year 3,700 books were circulated by the wagon. It was estimated that each of the volumes was read twice, and some of them three or four times, as it became the habit in some neighborhoods for the households to exchange with one another. When the wagon does not contain the book desired a memorandum is made and it is forwarded

The zeal of the Washington County library in spreading the use and love of books has found expression in many other ways. The Hagerstown school children were first sent to the library once a week to listen to stories read by an assistant. Then a school circulating library was started, and the teachers throughout the county were invited to enter a race as book circulators. The school at the village bearing the startling name of Rohrersville last year carried off the palm, having circulated thirty books 387 times among its pupils. The county, at the instance of the Hagerstown book propagandists, established seventy-three deposit stations throughout the county for adults. As a result, according to a careful statistician, the mountaineers in 1908 perused the contents of 11,156 books 22,569 times. The library also received assistance in developing its circulation from sixteen Sunday schools.
