320 Acre Free Homestead

Wyoming, Colorado and Montana.—The Mondell Homestead law makes provisions for 320 acre homesteads in certain localities, instead of the usual 160 acre tracts. The requirements of the law are practically the same regarding residence, improvements and cultivation. These lands are going fast; if you want a homestead close to the railroad, you should act now.

Crops and Rain Fall—Visitors to the Omaha Corn Show will remember the magnificent display of farm products from West-on county, Wyo., grown on exactly the same kind of land that can now be taken in 320 acre homesteads. The Mondell Act includes lands that receive from 16 to 21 inches of rain fall annually and you only need to see the crops grown by the farmers already located there, to be convinced. These homesteads can be taken along the Burlington's new line now building in Wyoming.

I personally conduct excursions the first and third Tuesdays of each month to these lands, and am employed by the Burlington to answer all inquiries, and to assist you in every possible way to locate along the Burlington Lines. Write for new folder and map of these lands.
