

WORTH MOUNTAINS OF GOLD

During Change of Life, says Mrs. Chas. Barclay

Graniteville, Vt.—"I was passing through the Change of Life and suffering from nervousness and other annoying symptoms, and I can truly say that Lydia E. Pinkham's Vegetable Compound has proved worth mountains of gold to me, as it restored my health and strength. I never forget to tell my friends what Lydia E. Pinkham's Vegetable Compound has done for me during this trying period. Complete restoration to health means so much to me that for the sake of other suffering women I am willing to make my trouble public so you may publish this letter."—MRS. CHAS. BARCLAY R.F.D., Graniteville, Vt.

No other medicine for woman's ills has received such wide-spread and unqualified endorsement. No other medicine we know of has such a record of cures of female ills as has Lydia E. Pinkham's Vegetable Compound. For more than 30 years it has been curing female complaints such as inflammation, local weaknesses, fibroid tumors, irregularities, periodic pains, backache, indigestion and nervous prostration, and it is unequalled for carrying women safely through the period of change of life. It costs but little to try Lydia E. Pinkham's Vegetable Compound, and, as Mrs. Barclay says, it is "worth mountains of gold" to suffering women.

U. S. Government Irrigated Land, In Idaho. Adjoining the famous Twin Falls tract. Best soil and climate, abundance of water. Address, Will J. Jones, Security Development League, Keyburn, Idaho.

The Army of Constipation

Is Growing Smaller Every Day. CARTER'S LITTLE LIVER PILLS are responsible—they not only give relief—they permanently cure Constipation. Small Pill, Small Dose, Small Price. Genuine—must bear Signature.

Budgeting Him. "I will ask you, Mr. Arbogast," said the lawyer, proceeding to cross examine, "—"

"Arbogast, sir." "Ah, yes, Arbogast. Mr. Arbogast, did you ever—" "Arbogast." "Oh, well, we'll call it Arbogast. I will ask you, Mr.—Arbogast, if you ever served a full term in the penitentiary?"

"No, sir!" said the witness, surprised and indignant. "Were you pardoned out?" "No, sir!" "Ah! Then you escaped, did you?" "No! I never was—" "Perhaps you were paroled, Mr.—Arbogast?" "I wasn't paroled, either! I never in my life was in—"

"Oh, well, it isn't important anyway, Mr. Arbogast, how you got out. That's all. Mr. Arbogast, you may stand aside."—Chicago Tribune.

Cuban Statistics. In 1907 Cuba had a population of 2,045,960, an increase of 30 per cent from 1899. Havana, the most thickly populated province, has 538,014 people. Over one-half of the island's population lives in the rural districts, the 134 towns and cities containing 900,000 inhabitants, or 43.9 per cent of the total population. Havana, the largest city, has 297,159 people. There are 1,074,582 males and 974,098 females; the average number to a family is slightly less than five, and an area of 44,164 square miles allow of an average of 46.4 per square mile.

The sick list of the London police force averages 600 men every day.

Shear Nonsense

"How do you keep your razor sharp?" "Easy enough. I hide it where my wife can't find it."—Cleveland Plain Dealer.

"How Tillie's clothes hang about her! Why, they don't fit at all." "But think how much worse she would look if they did!"—Litt.

Guest—Gracious! What long legs the new waiter has! Host—Yes, I engaged him specially for the dinner who are in a hurry.—Magendortler Blatter.

Mrs. Kidder—Ssh! Carrie has dyed her hair black. Don't tell anybody. Miss Askitt—Is it a secret? Miss Kidder—Yes; she wants to keep it dark.—Boston Globe.

"What part of the railway train do you regard as the most dangerous?" "Inquired the nervous man. "The dining car," answered the dyspeptic.—Washington Star.

"I'll be ready in a minute," she said to her husband. "You needn't hurry, now," he called up some time later. "I find that I shall have to shaver again."—Detroit Free Press.

"I thought you said you told your wife everything you did." "I do." "It's mighty strange." She hasn't said a word to my wife about the \$10 you borrowed from me."—Washington Star.

"Patience—They say she got all her furniture on the installment plan? Patience—She did. She had four husbands, and she got a little furniture with each one.—Yonkers Statesman.

A good rack for feeding sheep can be made by almost any sensible farmer. About all that is needed is a support for the hay and that it shall not fall to the ground and be wasted and also be handy for the sheep to get at.

Labor-saving devices are appreciated more on the farm than ever before. It seems almost impossible to get help to do the necessary work and, we are obliged to farm differently and use mechanical means instead of hand labor.

To cure the horse of the habit of pawing fasten a short piece of log chain—save five or six links—by means of a light strap, to his leg just about the knee—in the stable, of course—and see how quickly he will leave off the habit.

When Ducks Lay. The duck generally lays at night. It thrives best on soft, succulent food. Strong, vigorous birds can be successfully bred at 4 years of age. When properly fed, when at 8 weeks of age, green ducks will weigh 9 pounds to the pair. At 10 weeks they should weigh 10 to 11 pounds to the pair. The best prices for green ducks are given about May 1. Then the price gradually declines until the month of July.

The Brood Sow. On every farm there is a good deal of waste from different sources, writes D. J. Blyther in Kimball's Dairy Farmer. A brood sow offers a very profitable market for all this, even to the weeds from the garden. It is a good plan when a sow of good type proves herself a prolific breeder and an economical feeder and kind mother to keep her several years. A mature sow requires only food for maintenance, while a growing one needs food for growth. Furthermore, the older one will have a good appetite for waste that a young one would not care for. It is worth considerable to know that at farrowing time, if you do not happen to be around, your pigs are safe, while with an untried young sow you never know what is going to happen to the pigs.

Be Kind to the Toad. A pamphlet recently issued by Secretary Wilson of the Department of Agriculture pays a growing tribute to the toad. According to this high authority, few creatures of its size have suffered more from false witness. It is not true that it causes warts, poisons infants or spoils cows' milk. On the contrary, it has an amiable disposition, a good singing voice—for those who like that sort of thing—and, above all, most commendable industry.

An able-bodied toad eats \$19.44 (wholesale rates) worth of injurious worms and insects every season. It is a most efficient ultimate consumer, and it likes best those things which the farmer likes least. It is homeloving and very fond of children—its own children. No farmer or suburbanite should try to get along without a couple of good toads.

Curing Feathers at Home. Feathers may be cured at home and if handled right secure to the housewife a surplus of pillows and cushions or will bring a good price if sold. Before the chicken is scalded, take the sensors and cut off the soft, downy end of the feathers about the tail. Separate the feathers in picking and dry thoroughly. Immerse the feathers in lime water made by decanting one pound quick lime in one gallon water. Allow the feathers to remain in this two or three days, stirring frequently, then strain the surface of the water and lift the feathers out to drain on a wire sieve.

When drained rinse them first in hot water, then in two cold waters, then place again on the sieve to drain. If an old hammock is at hand stretch it tightly in a warm room near the floor, spread the feathers thinly upon it. Once a day tap the netting lightly with a stick and the feathers that are sufficiently dry will fall through to the floor. White feathers bring a better price on the market than colored and duck and geese feathers better than chicken feathers.

Government Whitewash. Whitewash, as used by the government, is prepared as follows: Take one-half bushel unslaked lime, slake it with boiling water, cover during the process to keep in steam; strain the liquid through a fine sieve or strainer, and add to it a peck of salt previously dissolved by soaking in warm

FARM AND GARDEN

Ten cows that average 300 pounds of butter fat per year produce as much as 20 cows that average only 150 pounds per year.

Garretted milk, caused by garget, which is a diseased and inflamed condition of the cow's udder, causes sore throat, scarlet fever and cholera.

Never start tomato and cabbage plants in the same box, as the tomato likes hotter locations and does not start into growth as soon as the cabbage.

For lice on horses, take half a pint of kerosene in two gallons of water, and wash the horse with this twice, with an interval of two or three days between the applications.

A splinted horse will in the end be made slow and spiritless by constant nagging, twitching of lines, peevish urging and other wearing processes that fretful drivers practice.

A paste of ordinary table salt and vinegar rubbed briskly over the nickel ornaments on the kitchen range when the stove is cool will make them as bright as new. Apply the paste with a dannel rag.

A good rack for feeding sheep can be made by almost any sensible farmer. About all that is needed is a support for the hay and that it shall not fall to the ground and be wasted and also be handy for the sheep to get at.

Labor-saving devices are appreciated more on the farm than ever before. It seems almost impossible to get help to do the necessary work and, we are obliged to farm differently and use mechanical means instead of hand labor.

To cure the horse of the habit of pawing fasten a short piece of log chain—save five or six links—by means of a light strap, to his leg just about the knee—in the stable, of course—and see how quickly he will leave off the habit.

Once a day tap the netting lightly with a stick and the feathers that are sufficiently dry will fall through to the floor. White feathers bring a better price on the market than colored and duck and geese feathers better than chicken feathers.

Government Whitewash. Whitewash, as used by the government, is prepared as follows: Take one-half bushel unslaked lime, slake it with boiling water, cover during the process to keep in steam; strain the liquid through a fine sieve or strainer, and add to it a peck of salt previously dissolved by soaking in warm

water, three pounds ground rice boiled in thin paste and stirred in while hot, one-half bushel Spanish whiting and one pound clean glue, previously dissolved by soaking in cold water and then hanging over a slow fire in a small pot hung in a larger one filled with water. Add five gallons hot water to the mixture; stir well and let it stand for a few days, covered from dirt. It should be applied hot, for which purpose it can be kept in a kettle or portable furnace. The east end of the White House at Washington is embellished by this brilliant whitewash. It is used by the government to whitewash lighthouses. A pint of this mixture, properly applied, will cover one square yard, and will be at most as serviceable as paint for wood, brick or stone, and much cheaper than the cheapest paint.

Baitons for Ducks. A little lean meat is very beneficial for stock ducks, and should be mixed with the morning feed for mash. Granulated meat, or butcher's refuse, boiled and chopped up, will answer the purpose admirably. The latter gives equally as good results as the former, and is considerably cheaper. Green food should be given liberally to the ducks when they are kept in confinement, those at liberty being able to obtain sufficient for themselves. When green food is scarce, turnips, mangels or potatoes form an excellent substitute. Ducks at liberty can, of course, procure all the drinking water they require for themselves, but those in runs must be well supplied. It is undesirable to allow them to drink a large quantity immediately after eating, as this causes a large portion of the food to pass straight through the body. Half an hour after they have eaten, however, they may have all they want.

Care Hubs Dipping of Danger. The practice of dipping animals to rid them of vermin is coming to be more general on the farm. Sheep dipped as often and as thoroughly as they should be are very little troubled by scab, mange and like diseases. The external parasites are much more easily combated than are the internal ones. In general, keeping the sheep under the most sanitary conditions, and in the best state of health possible, and applying externally and internally medicines, detrimental to the growth of parasites, will even in this day and age, when parasites are numerous, result in keeping a flock free enough from them so that good profits can be made. The man who is willing to exert himself a little along these lines need not fear to enter upon the sheep business or continue it.

Indeed, in spite of its drawbacks there is no other business that can be conducted upon a similar capital that will return as large profits if only it is properly handled. If willing to wage your share of the conflict let not the fear of invading hosts of parasites deter you from sheep growing.

Prof. O. M. Morris of the Oklahoma Agricultural Experiment Station says the whole-root and piece-root grafts each have some advantages over the other, and the climate and variety of the tree should determine which should be used. The whole-root graft requires one seedling for each graft. The piece-root one seedling for every two or three grafts. These are facts that interest the nurseryman more than the fruit grower. The whole-root trees will grow much faster for the first three or four years and will form a more evenly distributed root system than the piece-root graft. It will be better branched and will stand much better when exposed to hard winds than the piece-root grafts. The whole-root graft has a root system already developed for it to begin growth upon. The piece-root graft is reduced almost to a cutting and must grow as such. If the clone of the piece-root graft is made long and set deep in the ground it will often strike roots and soon be up on its own root. This is a great advantage in very cold climates or where the roots winter-kill badly.

No Sign of Ousting Horses. According to the crop-reporting experts of the Department of Agriculture, the number of horses in the United States, at the beginning of the year, was larger by 400,000 than it was 12 months before. That means an increase of about 2 per cent. In the same year the rise in the market value of all the horses in the country was estimated at about \$302,311,000, which means a gain of more than 12 per cent. At the end of 1909 the total value of the horses in the United States was calculated at almost the aggregate value of the swine, the sheep and the cattle. It was five times as great as the value of the hogs, ten times the value of the sheep, and more than half a billion dollars in excess of the market price of all the cattle, including the milk cows.

These facts show more than the general rise in prices. They furnish proof that the horse market is exceptionally strong and that the increase in the number of horses, although it has been about equal in the rate per cent to the growth of the population, has not been sufficient to prevent a sharp rise in the average market value of horses. In all sections of the country. As long as the value of the horses in the United States can increase more than \$300,000,000 in a year, the farmers and others who raise horses for the market will trouble themselves very little about the competition of automobiles and all other rivals of the horse, in any of the fields where he has been used.

The horseless vehicle is a great success. So is the trolley railroad, and so are traction engines and steam plows in certain fields, but the world evidently needs the horse as much as ever. The modern inventions which have seemed to threaten his banishment have only widened the use of vehicles and increased travel and trade.

ABANDONED IT For the Old Fashioned Coffee Was Killing. "I always drunk coffee with the rest of the family, for it seemed as if there was nothing for breakfast if we did not have it on the table. "I had been troubled some time with my heart, which did not feel right. This trouble grew worse steadily. "Sometimes it would beat fast and at other times very slowly, so that I would hardly be able to do work for an hour or two after breakfast, and if I walked up a hill, it gave me a severe pain. "I had no idea of what the trouble was until a friend suggested that perhaps it might be caused by coffee drinking. I tried leaving off the coffee and began drinking Postum. The change came quickly. I am now glad to say that I am entirely well of the heart trouble and attribute the relief to leaving off coffee and the use of Postum. "A number of my friends have abandoned the old fashioned coffee and have taken up with Postum, which they are using steadily. There are some people that make Postum very weak and tasteless, but if it is boiled long enough, according to directions, it is a very delicious beverage. It has never used any of the old fashioned coffee since Postum was first started in our house. "Read the little book, 'The Road to Wellville,' in pigs. 'There's a Reason.' "Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

FAMOUS DOCTOR'S PRESCRIPTION.

The New England Thanksgiving

dates from 1833, when the Massachusetts Bay colony set apart a day for thanksgiving.

Wanted a Fortune on Skin Trouble. "I began to have an itching over my whole body about seven years ago and this settled in my limb, from the knee to the toes, I went to see a great many physicians, a matter which cost me a fortune, and after I noticed that I did not get any relief that way, I went for three years to the hospital. But they were unable to help me there. I used all the medicines that I could see but became worse and worse. I had an inflammation which made me almost crazy with pain. When I showed my foot to my friends they would get really frightened. I did not know what to do. I was so sick and had become so nervous that I positively lost all hope.

"I had seen the advertisement of the Cuticura Remedies a great many times, but could not make up my mind to buy them, for I had already used so many medicines. Finally I did decide to use the Cuticura Remedies and I tell you that I was never so pleased as when I noticed that, after having used two sets of Cuticura Soap, Cuticura Ointment and Cuticura Pills, the entire inflammation had gone. I was completely cured. I should be only too glad if people with similar disease would come to me and find out the truth. I would only recommend them to use Cuticura. Mrs. Bertha Sachs, 1621 Second Ave., New York, N. Y., Aug. 20, 1909.

"Mrs. Bertha Sachs is my sister-in-law and I know well how she suffered and was cured by the Cuticura Remedies after many other treatments failed. Morris Sachs, 321 E. 99th St., New York, N. Y., Secretary of Deutsch-Ostrower Unt-Verein, Kempten Hebrew Benevolent Society, etc."

COLD IN THE CHEST? A-B-C Linctum will promptly cure it. Buy a bottle to-day from your dealer.

For brewing purposes in the United Kingdom last year 62,971,755 pounds of hops were used.

Pettit's Eye Salve for 25c relieves tired or overworked eyes, stops eye aches, congested, inflamed or sore eyes. All druggists or Howard Bros., Buffalo, N. Y.

If the Mississippi valley were as densely populated as Massachusetts, it would have 350,000,000 inhabitants.

When You Think

Of the pain which many women experience with every month it makes the gentleness and kindness always associated with womanhood seem to be almost a miracle. While in general no woman rebels against what she regards as a natural necessity there is no woman who would not gladly be free from this recurring period of pain.

Dr. Pierce's Favorite Prescription makes weak women strong and sick women well, and gives them freedom from pain. It establishes regularity, subdues inflammation, heals ulceration and cures female weakness.

Sick women are invited to consult Dr. Pierce by letter, free. All correspondence strictly private and sacredly confidential. Write without fear and without fee to World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y.

If you want a book that tells all about woman's diseases, and how to cure them at home, send 21 one-cent stamps to Dr. Pierce to pay cost of mailing only, and he will send you a free copy of his great thousand-page illustrated Common Sense Medical Adviser—revised, up-to-date edition, in paper covers. In handsome cloth-binding, 31 stamps.

The Right Way

In all Cases of DISTEMPER, PINKEYE, INFLUENZA COLDS, ETC. Of all Horses, Brood Mares, Colts, Stallions, is to

"SPOHN THEM" On their tongues or in the feet put Spohn's Liquid Compound. Give the remedy to all of them. It acts on the blood and glands. It routs the disease trouble no matter how they are "exposed." Absolutely free from anything injurious. A child can safely take it. 50 cents and \$1.00. An ounce the dozen. Sold by druggists, harness dealers, or sent, express paid, by the manufacturers.

SPOHN MEDICAL CO. Chemists and Bacteriologists GOSHEN, IND., U. S. A.

The Overland The Simplest Car

The Overland—hardly more than two years old—has become the sensation of motordom. No expert is needed. And the cost of upkeep is the smallest of any automobile.

Four factories, employing 4,000 men, turn out 140 Overlands daily to meet the overwhelming demand. Then the Overland gives more for the money than any other car in existence. This is due to our enormous production and our automatic machinery.

Texas takes 1,500, Kansas 1,000, Iowa 1,000, Nebraska 750—all for this season's delivery. So it is in every section where this remarkable car has been known for a year.

One reason is that the Overland is almost trouble-proof. The usual complex features have all been eliminated. A child can master the car in ten minutes. A novice can run it and care for it.

More people are buying Overlands than any other car. There must be some very strong reasons, and these reasons will appeal to you. We have two free books which will tell you the facts. Every motor car lover should read them. Cut out this coupon as a reminder to write for these books to-day.

The car almost cares for itself. Many an owner has run from 7,000 to 10,000 miles without even cleaning a spark plug.

One simply pushes pedals forward or backward to get on low speed, high speed or reverse. It is as simple as walking.

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

TRIALS OF THE NEEDLES THIS IS A LOT OF BUSINESS. THESE CANNOT BE KEPT IN THE HOUSE. THEY ARE NOT TO BE TAKEN OUT OF THE HOUSE.

Munson's Paw Paw Pills cure the liver into activity by gentle methods. They do not scour, grip or weaken. They are a tonic to the stomach, liver and nerves; invigorate instead of weaken. They enrich the blood and enable the stomach to get all the nourishment from food that is put into it. These pills contain no cathartics, they are soothing, cooling and stimulating. For sale by all druggists in 10c and 25c sizes. If you need medical advice, write Munson's Doctor. They will advise to the best of their ability absolutely free of charge. Munson's, 531 and Jefferson Sts., Philadelphia, Pa.

Munson's Cold Remedy cures a cold in one day. Price 25c. Munson's Rheumatism Remedy relieves in a few hours and cures in a few days. Price 25c.

Most old people must give the bowels gentle, constant help. One candy Cascaret each day does that. Harsh physic, taken regularly, makes the bowels callous. Cascarets do not. Nearly all old people now use this natural, gentle help.

Vest-pocket box, 10 cents—at drug stores. Each tablet of the genuine is marked C.G.G.

Bargain—800 acres black valley land in the rain belt near Uvalde. Buy the owner for \$12 per acre. Address: C. O. Byrd, Uvalde, Texas.

PATENTS Watson E. Coleman, Washington, D.C. Books free. Highest references. Send for free.

The Overland The Simplest Car

The Overland—hardly more than two years old—has become the sensation of motordom. No expert is needed. And the cost of upkeep is the smallest of any automobile.

Four factories, employing 4,000 men, turn out 140 Overlands daily to meet the overwhelming demand. Then the Overland gives more for the money than any other car in existence. This is due to our enormous production and our automatic machinery.

Texas takes 1,500, Kansas 1,000, Iowa 1,000, Nebraska 750—all for this season's delivery. So it is in every section where this remarkable car has been known for a year.

One reason is that the Overland is almost trouble-proof. The usual complex features have all been eliminated. A
