

QUEEN OF ACTRESSES PRAISES PE-RU-NA.

"I am glad to write my endorsement of the great remedy, Peru-na. I do so most heartily."—Julia Marlowe. Any remedy that benefits digestion strengthens the nerves.

The nerve centers require nutrition. If the digestion is impaired, the nerve centers become anemic, and nervous debility is the result.

SAMPLE BOTTLE FREE—To demonstrate the value of Peru-na in all catarrhal troubles we will send you a sample bottle absolutely free by mail.

The merit and success of Peru-na is so well known to the public that our readers are advised to send for sample bottle: Address the Peru-na Company, Columbus, Ohio. Don't forget to mention you read this generous offer in the...

If in need of advice write our Medical Department, stating your case fully. Our physician in charge will send you advice free, together with literature containing common sense rules for health, which you cannot afford to be without.

Conceded It. "Colonel, don't you think, as the result of your observation during many years of public life, that the holding of a government position tends to take away a man's independence and make him merely a machine?" asked the inquisitive acquaintance.

"Undoubtedly," said the internal revenue collector. "There was a time, for instance, when, if you had asked me such a question as that, I should have kicked you out of my office, but I have become used to such things now and don't mind them at all."

FERRY DAVIS' PAINKILLER—Summer colds, head aches, cramps, have no terrors in the household where this dependable medicine is kept on hand. 25c, 50c and \$1.00 bottles.

FASHION HINTS

Navy blue marquisette trimmed in white foulard, thickly dotted with navy blue—it was a little dress that made one marvel at its simplicity and style. In one word it was "satisfying."

Why He Led. The angel was making up the list. "I never asked my fellow man if it was hot enough for him," remarked Abou Ben Adhem.

And lo, his name came in under the wire first.—New York Sun.

Another Reason. Max—Jones is the most wide-awake man I know. Dax—You surprise me. I never heard of his being especially enterprising.

Max—Oh, it isn't enterprise that makes him so; it's insomnia.—Tit-Bits.

Children Especially Like

The sweet, "toastie" flavour of

Post Toasties

Crisp, fluffy bits of perfectly ripe white corn—cooked, rolled and then toasted to an appetizing brown.

Served with cream and sometimes fruit, this dainty food pleases the whole family.

Give the home-folks a treat. "The Memory Lingers" Packages 10c and 15c. POSTUM CEREAL COMPANY, Ltd., Battle Creek, Mich.

FACTS IN TABLOID FORM.

More than \$50,000,000 worth of soap is made and sold in the United States every year.

An official estimate places the number of dairy cows in the United States at 21,000,000.

Some varieties of rice ripen in two months after planting, while others require up to six months in cultivation.

Canada has twenty wireless stations and new wireless service is being established between Prince Rupert and Vancouver.

England imported from Argentina in 1907 nearly \$21,000,000 worth of fresh beef and \$11,472,345 worth of fresh mutton.

The New York public service commission will make an extensive investigation of concrete as a deadener of noise on elevated railroad structures.

The highest viaduct in the world recently was opened in France. It stands 144 feet above a river, took eight years to build and cost about \$800,000.

In the last fiscal year experts of the department of agriculture inspected before slaughter 59,544,255 animals at 875 establishments in 240 cities and towns.

Bacteriologists are now using an electrically heated incubator to hatch germs, as the temperature can be controlled for an indefinite period without variation.

New York City has been increasing its birth rate for the last ten years. For the twelve months just passed it has been twenty-eight to the thousand inhabitants.

One of the great intellects of England has stated that not above fifty thousand people in all Britain can read and understand the ordinary London newspaper.

After an exhaustive research an English architect has decided that the leaning tower of Pisa was built at the angle it stands today as a feat of structural bravado.

Experiments in abrasion conducted at a French mint have proved that aluminum coins will be less rapidly worn than coins made of gold, silver or even bronze.

Stuyvesant Fish, Jr., began in the Illinois Central shops in Chicago at a salary of \$25 a month. Later he worked as station agent at \$60 a month in his eagerness to learn the work from the bottom up.

The Wesleyan conference of England recently passed by a large majority a motion to admit women as lay delegates. This resolution must be approved by the synod before it can become a rule of the denomination.

In 1907 there were about 30,000 barrels of sesame oil shipped to Constantinople, but the cotton seed oil has supplanted this to a great extent, and this season there has been used hardly 1,000 barrels of sesame oil.

The women of Chicago are urging an increase in the number of milk inspectors for that city. They say that it is impossible for the eight inspectors now on duty to make sure that even a small part of its supply is in wholesome condition.

To check New Jersey's destructive forest fires, the state has ordered the railroads traveling its pine forests to clear the ground for fifty feet on each side of the tracks and plow up and gravel ten-foot strips to prevent the growth of brush again.

The Alps show such an extraordinary attraction for Hertzian wave currents that Swiss military aerographers have been able to intercept wireless messages from points 2,000 miles away, while the interchange of messages within Switzerland is unsatisfactory.

At twenty, Tintoretto was one of the most prolific and popular painters in Italy; Schelling had grappled with the philosophy of Kant; Galileo had discovered the use of the pendulum; Lafayette was a major-general, and Garrison voiced emancipation for the slave.

A new electrical alarm clock uses dry batteries to ring a bell, supply a small incandescent light with current and start a fire in an alcohol lamp with a platinum wire, all by completing a circuit when the hour hand touches a third hand set at a designated time.

Making, selling or exporting of red ginseng in or from Korea is now forbidden under fines of from \$50 to \$500 and confiscation of equipment to all parties except the Korean government or firms specially authorized by it. It is highly valued in the Orient for medicinal use.

Queen Ena of Spain (Victoria Ena) is one of the few ladies of the peninsula who can lay claim to horsemanship. Spanish ladies are, as a rule, too indolent to ride. But Alfonso is a daring horseman, and it must please him to have his young wife galloping by his side.

A new Japanese steamship service has been put on between ports of Japan, via Hong-Kong and Valparaiso, Chile, by the Togo Kisen Kaisha Company of Yokohama. The three steamers are subsidized by the Japanese government. Other ports of the west coast of South America will also be used.

The calabar bean is highly poisonous and in foreign countries is used for medicinal purposes. Its effect is opposite that of belladonna and is used for contraction of the eye, in tetanus, neuralgia and rheumatic diseases. It is such a powerful depressant to nervous action that surgeons can only use it in small amounts.

The chairman of the Imperial Tobacco Company of Canada was asked, at Montreal, if the report was correct that they had bought the Ontario tobacco crop. His answer was that tobacco grown in Canada today was superior to the American grown leaf from the same type of seed, for the reason that the soil in the United States had been used for a number of years and the Canadian soil is practically virgin soil for tobacco growing purposes, and therefore produced a better quality. The proof of this is that the consumption is constantly increasing.—Consular Reports.

Trial Bottle Free By Mail

FATS

If you suffer from Piles, Proctitis, Hemorrhoids, Spasms, or have children that do so, my New Discovery will relieve them, and all you are asked to do is to send for a Free Trial Bottle of Dr. May's Epileptoid Cure.

It has cured thousands where everything else failed. Guaranteed by May Medical Laboratory, Under Pure Food and Drug Act, June 30th, 1906. Guaranty No. 14971. Please write for Special Free Trial Bottle and give A. G. R. and complete address. DR. W. H. MAY, 548 Pearl Street, New York.

Useless Study. Mr. Fond Father reproved his little son for having only 75 per cent in arithmetic. "Mathematics, my boy," he said, "is a very useful study, and you must try to do better."

"I thought that was only useful for sailors," said the boy.

"Well, people on land have adding machines, don't they?"—New York Tribune.

On the Safe Side. The Bible says, "Take no thought for the future."

"That's all right in theory, but I always buy a return ticket when I go to the races."—Houston Post.

Her Scalp Itched Intolerably. "Just about two years ago, some form of humor appeared on my scalp. The beginning was a slight itching but it grew steadily worse until, when I combed my hair, the scalp became raw and the ends of the comb-teeth would be wet with blood. Most of the time there was an intolerable itching, in a painful, burning way, very much as a bad, raw burn, if deep, will itch and smart when first beginning to heal. Combing my hair was positive torture. My hair was long and tangled terribly because of the blood and scabs. This continued growing worse and over half my hair fell out. I was in despair, really afraid of becoming totally bald."

"Sometimes the pain was so great that, when partially awake, I would scratch the worst places so that my finger-tips would be bloody. I could not sleep well and, after being asleep a short time, that awful stinging pain would commence and then I would wake up nearly wild with the torture. A neighbor said it must be salt rheum. Having used Cuticura Soap merely as a toilet soap before, I now decided to order a set of the Cuticura Remedies—Cuticura Soap, Ointment and Pills. I used them according to directions for perhaps six weeks, then left off, as the disease seemed to be eradicated, but toward spring, eighteen months ago, there was a slight return of the scalp humor. I commenced the Cuticura treatment at once, so had very little trouble. On my scalp I used about one-half a cake of Cuticura Soap and half a box of Cuticura Ointment in all. The first time I took six or seven bottles of Cuticura Pills and the last time three bottles—neither an expensive or tedious treatment. Since then I have had no scalp trouble of any kind. Standing up, with my hair unbound, it comes to my knees and had it not been for Cuticura I should doubtless be wholly bald."

"This is a voluntary, unsolicited testimonial and I take pleasure in writing it, hoping any experience may help someone else. Miss Lillian Brown, R. F. D. 1, Liberty, Me., Oct. 29, 1909."

Lost Fee Inside Patient. Many a surgeon has had to repeat an operation to recover bits of sponge or other medical equipment left in the victim on the operating table. But the story is going the rounds here, says a Paris correspondent of the St. Louis Republic, that a brilliant French surgeon has distinguished himself by leaving his fee in the sufferer's abdomen when he stitched it up.

The patient was a merchant, who saw to all the arrangements himself, up to the commencement of the operation for appendicitis. The last thing he did before going under the anesthetic was to pay the surgeon the fee with a check for \$1,000. The great man tossed it aside on a pile of absorbent wool that was presently in being put in after the operation; he looked for the fee and could not find it. He opened the patient again and found the bundle, according to the story that is diverting medical circles.

Women are supposed to be the slaves of fashion, but it's a mistake. Men are the real slaves, inasmuch as they have to pay the freight.

For Red, Itching Eyelids. Falling Eyelashes and All Eyes That Need Care Try Murine Eye Salva. Aseptic, Tubercle-Free, Size—25c. Ask Your Druggist or Write Murine Eye Remedy Co., Chicago.

Looking Backward. On the night following the Yale-Princeton game last fall, a young man who had slipped and fallen was assisted to his feet by a passer-by.

"Just a little celebration of victory," the young man explained as he waved a bedraggled bit of orange and black ribbon.

"But Princeton lost," the other told him.

The young man looked painfully surprised for an instant.

"How do you know?" he asked.

"Why, it was on the bulletin board an hour ago," the other said. "Yale won to-day's game."

"I wash refrain," said the young man with great dignity. "So th' game of 1903."—Littell's.

Life and Setting Hens. When hens are set they should be carefully dusted with insect powder or otherwise treated and placed on absolutely vermin free nests, preferably in some other house or in a separate room where other fowls cannot come in contact with them. Placing tobacco stems in the bottom of the nest or with the nesting materials will help to keep lice away, yet it is not an infallible remedy.

The setting hen may be dusted at intervals through the incubation period, yet she should never be greased or treated with any liquid preparations that will injure the eggs. Keeping a box of dry dust or ashes, with which is mixed a small proportion of powdered sulphur, where the hens can get at it daily, will very greatly aid them in keeping clean.

Electricity from Wind. The machinery of a modern windmill is just as far advanced over the rude machinery of the windmill of fifty years ago as is the works of a

Most shepherds believe that the blood that goes to maintain a long tail should go into the body of the lamb.

If in any milking a part of the milk is bloody or stringy or unnatural in appearance, the whole mess should be rejected.

The growing pig requires protein and not much corn. It is all right to give a little corn but too much is harmful.

The practical remedy for little pigs that are liable to be troubled with thumps is to provide plenty of exercise and large range.

If you cultivate your orchard, see that the ground is kept finely mulched, in order to conserve the moisture which the trees should have.

Pigs will live and grow on rape without a supplement of grain, but a small addition of the latter is profitable. Dry sows will, however, do well on rape alone.

Many good farmers will keep everything on the place in ship shape all the year except the orchard. These men are always complaining that it doesn't pay to raise fruit.

Be sure fruit trees are set where they will have sufficient drainage. Many a tree is blamed by its owner for being a bad variety, when the fault is in the drainage.

Dairy cows must be treated in accordance with their importance, as a factor of success, and the milk and cream must be handled properly from cow to churn and from churn to market.

Farmers near Marshall, Mo., complain that wolves have been very troublesome during the last winter. They killed twenty-eight pigs recently for one farmer and others have suffered losses of lambs, pigs and poultry.

Estimating Wall Paper. In estimating the amount of wall paper needed during the spring house-cleaning, it may be well to know that the ordinary roll of wall paper is 8 yards long and 18 inches wide. A double roll is 16 yards long. Cartridge paper is usually 36 inches wide. Borders are usually 18 yards long and either 9 or 18 inches wide.

Combination Food for Hogs. For supplying a large amount of early pasture for hogs I find that oats, peas and rape make a very excellent combination crop. This is, more strictly speaking, a forage crop, and under ordinary conditions will grow to pasturing maturity within eight weeks after sowing. I shall this season sow several acres of this combination crop during the early part of May for summer pasture. If best results are desired in producing a combination crop considerable attention should be paid to selecting fertile soil possessing a ready amount of available plant food, as this crop, in order to produce good forage, must grow rapidly.—Agricultural Epitomist.

Ducks. Ducks are profitable as layers for three years, and the drakes are fit to use as breeders for eight. They fatten readily and bring good prices. Their feathers are quite valuable and net a substantial revenue.

Yards 24x100 feet will accommodate a pen of thirty layers, thus minimizing space. The houses need not be costly or especially built for warmth, but should be dry. Eggs are usually stored and can be hatched in incubators. Being such wonderfully prolific and persistent layers, you can contract your output to hotels, cafes, etc., and take advantage of the special prices with the assurance of being able to fill the demand and rake off some splendid profits.

Advice to Boys. A New Jersey judge, speaking to the Orange high school boys as prospective lawyers, gave them some good advice. "You boys who are growing up to be lawyers," said the judge, "always remember that the most successful lawyer is the one who, when a client comes to him fighting mad, investigates thoroughly every detail of the case and then brings both sides to a satisfactory agreement. That's the highest service a lawyer can perform, for he not only represents the people he is defending, but he is uplifting the whole legal system of the country." There may be lawyers who will consider advice to lawyers to keep out of court as unprofessional.—Boston Daily Advertiser.

How to Use Commercial Fertilizers. If fertilizers are used, the following general rule should govern: On rich lands use mainly fertilizers that will stimulate the fruit and not the stalk growth. On lighter lands use more of the elements to force growth, combined with others which will mature the fruit.

High grade 14 per cent acid phosphate may be considered a basis for increasing fruit and hastening maturity of crops. Even on the richest land it has been demonstrated that a small percentage of nitrogen added to the acid phosphate gives better results.

Air-slaked lime is of value for use on stiff or gummy soils to loosen them up, permit the air to enter and prevent a sour condition of such soils when too wet.

On this or impoverished soils equal quantities of cotton-seed meal and acid phosphate can be used to advantage.

In case the foregoing can not be obtained, a standard-grade commercial fertilizer may be used. These should contain in the mixture 8 to 10 per cent of available phosphoric acid, 2 to 3 per cent of nitrogen and 1 1/2 to 2 per cent of potash, or on some lands a high grade acid phosphate, 14 per cent may be used.

Where lands are greatly worn by years of cropping, more fertilizer should be used to the acre, and it should contain about equal parts of cotton seed meal and high grade acid phosphate. The beneficial effect of commercial fertilizers depends largely upon the presence of humus in the soil, hence the importance of using stable manure and plowing under green crops. In applying the foregoing instructions the farmer must use considerable judgment and modify his practice where necessary to fit local conditions.

The fertilizer should be distributed several days before planting, as there is danger of injuring the seed if brought in immediate contact with strong fertilizer. A very careful mixing of the fertilizer with the soil is necessary for the same reason. On all except very rich, waxy lands it will pay to use commercial fertilizers somewhat liberally.

Where as much as 400 pounds of fertilizer is used for corn, we recommend two applications, one in the furrow before planting, and an application of from 150 to 200 pounds of cotton seed meal in the furrow when the corn is about one foot high.

Where lime is used scatter it broadcast when the land is plowed, using about four barrels of air-slaked lime per acre, or apply in the row about two barrels per acre a short time before planting, mixing it thoroughly with the soil.

A PACKAGE MAILED FREE ON REQUEST OF

MUNYON'S PAW-PAW PILLS

The best Stomach and Liver Pills known and a positive and speedy cure for Constipation, Indigestion, Jaundice, Biliousness, Sour Stomach, Headache, and all ailments arising from a disordered stomach or sluggish liver. They contain in concentrated form all the virtues and values of Munyon's Paw-Paw Tonic and are made from the juice of the Paw-Paw fruit. I unhesitatingly recommend these pills as being the best laxative and cathartic ever compounded. Send in a postal or letter requesting a free package of Munyon's Celebrated Paw-Paw Laxative Pills, and we will mail same free of charge. MUNYON'S HOMEOPATHIC HOME REMEDY CO., 533 and Jefferson Sts., Philadelphia, Pa.

"Rev." Larry Summerfield. The Broadway friends of Larry Summerfield, the wireless wire tapper, were greatly pleased yesterday to learn that their old associate had been selected as organist in the chapel at Sing Sing prison. As there are several sets of services each Sunday, the new job will enable Larry to be away from his cell the greater part of the day.

Of all days the most dreaded by the Sing Sing prisoners is Sunday. They have no work to do then and must remain in the cells except when attending chapel services. There are two chapels—Protestant and Catholic. The prisoners usually attend both, so as to get away from the close confinement on Sunday.

As organist, Summerfield will not only escape the cell confinement on Sunday, but will also have a few "evenings out," as there are services several times a week in the evening. According to the friends of Summerfield, the wire-tapper was brought up amid religious surroundings and there was an organ in his home. It is said that he has been after the job of organist for some time.—New York Sun.

How much better a thing tastes when the doctor forbids the eating of it!

WOMEN'S ILLS. Many women who suffer with backache, bearing-down pain, headaches and nervousness do not know that these ailments are usually due to trouble with the kidneys. Doan's Kidney Pills remove the cause.

Mrs. M. McFadden, Iowa City, Iowa, says: "I would have died had it not been for Doan's Kidney Pills. For years I suffered from terrible backaches. I gradually grew worse until I had to take to my bed, where I lay unconscious. I began using Doan's Kidney Pills after the doctors had failed to help me and was completely cured."

Remember the name—Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

Growing Legumes. There is a gas called nitrogen which is present in the atmosphere in immense quantities, and which is necessary to the growth and thrift of vegetation. It is found in some form in many different substances, and when sold as a fertilizer commands a very high price. It is doubtful if nitrogen can be bought with profit in the form of fertilizer for use in enriching farm lands except under special conditions.

For greenhouse purposes or for the truck gardens, where intensive farming is practiced, it may prove profitable, but the ordinary farmer can not afford it. He can, however, secure an abundance of nitrogen and add matter to humus in his soil by growing some one of the leguminous plants and occasionally plowing under a crop. Perhaps cowpeas are the best for the double purpose, though any kind of clover is equally valuable. One hesitates to plow up a good field of alfalfa for the sake of the nitrogen and the humus that would be added to the soil, while he might not hesitate to plow up a crop of cowpeas or soy beans.—Kansas Farmer.

How to Use Commercial Fertilizers. If fertilizers are used, the following general rule should govern: On rich lands use mainly fertilizers that will stimulate the fruit and not the stalk growth. On lighter lands use more of the elements to force growth, combined with others which will mature the fruit.

High grade 14 per cent acid phosphate may be considered a basis for increasing fruit and hastening maturity of crops. Even on the richest land it has been demonstrated that a small percentage of nitrogen added to the acid phosphate gives better results.

Where as much as 400 pounds of fertilizer is used for corn, we recommend two applications, one in the furrow before planting, and an application of from 150 to 200 pounds of cotton seed meal in the furrow when the corn is about one foot high.

Where lime is used scatter it broadcast when the land is plowed, using about four barrels of air-slaked lime per acre, or apply in the row about two barrels per acre a short time before planting, mixing it thoroughly with the soil.

Dictionary Up to Date.

"Talk about keeping up with the times," said the professor, "the makers of dictionaries have to be up to the very minute. I don't believe a day passes without some new word being introduced into our language. For most of them the originators of slang—delightful original fellows, aren't they?—and the men of science are responsible. I was running over the other day a list of new words assembled for the latest dictionary, and I declare I was amazed at the number that were, in truth, new to me. Did you know, for example, that the potato is the name given to the cross between the tomato and the potato, that a grasshopper destroyer is called a hopperdoozer, and that the scientific term for hookworm is uncinaria? Speaking of slang, I notice that place has been found in the dictionary for rubberneck, stunt, tank up and fan—of course," the professor added somewhat hurriedly, "I mean a baseball fan. And there are hundreds and hundreds more."

When young a girl wonders if she will ever meet a man she would marry; after she gets older, she wonders if she will ever meet one she wouldn't marry.

Allen's Foot-Ease Shake Into Your Shoes. Allen's Foot-Ease, the antiseptic powder for the feet, is cured of corns, bunions, and other foot troubles, and instantly takes the sting out of corns and blisters. It is a constant discovery of the fact that Allen's Foot-Ease is the best cure for itching, burning, and sore feet. It is a certain cure for improving circulation, creating new blood, and giving the feet a healthy, pinkish color. We have over 1,000 testimonials. It is sold in all drug stores. Do not accept any substitutes. Write for a free trial package.

Not Sisters

Now and again you see two women passing down the street who look like sisters. You are astonished to learn that they are mother and daughter, and you realize that a woman at forty or forty-five ought to be at her finest and fairest. Why isn't it so?

The general health of woman is so intimately associated with the local health of the essentially feminine organs that there can be no red cheeks and round form where there is female weakness.

Women who have suffered from this trouble have found prompt relief and cure in the use of Dr. Pierce's Favorite Prescription. It gives vigor and vitality to the organs of womanhood. It clears the complexion, brightens the eyes and reddens the cheeks.

No alcohol, or habit-forming drugs is contained in "Favorite Prescription." Any sick woman may consult Dr. Pierce by letter, free. Every letter is held in strictest confidence, and answered in a plain envelope. Address: World's Dispensary Medical Association, Dr. R. V. Pierce, Pres., Buffalo, N. Y.
