San Francisco Outclasses New Orleans In Every Respect.

The great fight that is being waged between San Francisco and New Orcans for the honor of celebrating the completion of the Panama canal is attracting the attention of the entire country. The fight is no longer a contest between the two cities, but between California and Louisiana, the egislatures of which have each authorized a state tax to raise funds in aid of the proposed international

In financial standing California is so far ahead of Louisiana that its superior ability to finance the fair must be conceded, and if the question of selecting a site for the exposition were to be decided on a basis of the relative wealth of the contestants. congress would have no option, but would be forced to award the coveted honor to San Francisco.

To the unprejudiced observer it is difficult to see wherein New Crieans has any legitimate claim to recognition as the logical point for the exposition, aside from the mere fact that it is located nearer to the center of population. In beauty of surroundings, climatic advantages, ability to handle the hundreds of thousands of prospective visitors, general progressive spirit of its people and record of achievement, San Francisco stands head and shoulders above its rival.

According to the report of the national monetary commission on April 28, 1909, the population of California was 1,732,000, and that of Louisiana 1.642,000, while in the amount of savings deposits California ranked fourth among the states of the Union and Louisiana twenty-fourth, the exact figures being as follows:

Louistana iging \$585.90; Louisiana 163,814, averag-

ng \$254.00.
The total resources as represented in bank deposits were: California, 3842,-969,880.00: average per capita 3486.70. Louisiara, \$158,642,502.00; average per capita, \$96.61.

The following figures are taken from the report of the reports of the California comptroller of currency:

San Francisco—Total savings deposits.
\$153,792,186,05; total individual deposits.
\$223,927,437,67; average, \$740,00.

New Orleans—Total savings deposits.
\$15,856,783,49; total individual deposits.
\$42,979,077,18; average \$500.08.

Increase in resources of National banks, year 1909-1910; San Francisco,
\$103,620,828,96; New Orleans, \$2,870,228,74. In the face of such a showing New Orleans and Louisiana do not appear to be in the same class with San Francisco and California, financially. And California is as much superior to Louisiana in every other respect as she is financially, just as San Francisco is immeasurably superior

make a great and beautiful city. San Francisco is the ideal site for the Panama-Pacific International exposition in 1915. Let congress make

to New Orleans in all that goes to

BURDEN TOO HEAVY FOR NEW ORLEANS

City Aiready Struggling Under an Indebtedness of \$40,916,913.13.

New Orleans is far from being a unit in favor of the proposed state tax to raise a fund of \$6,500,000 in aid of the World's Panama exposition.

The New Orleans Taxpayers' Protective association has adopted a strong resolution, which is being widely distributed in the form of a circular letter, advising its members and bonded to the limit of endurance

The letter quotes the comptroller's report of Dec. 31, 1909, to prove that some improvements made they can the present bonded debt of the city is \$32,521,040, on which the annual interest amounts to \$975,740. In addition to this the water and sewerage board is attempting to sell \$7,000,000 of bonds, bearing interest at per cent and the unpaid ordinances and unfinished contracts for paving amount to \$343,168.33 and \$852,709.80 respectively, bringing the total indebtedness of the city up to the enor mous sum of \$40,716,918.13.

To the above must be added more than \$5,000,000, which must be paid by the city on state bonds now due; the courthouse commission carries a debt of \$750,000, the dock board \$3,000,000, and the levee board \$3,000,000

Continuing, the letter says: "Remember, also, that if the city of New Orleans succeeds in selling her \$7,000,000 of bonds, the water and sewerage board will compel every property holder, to the number of 66, 000, to put in the sewerage and waterworks in their premises at a cost of not less than \$250 per residence, thus making the enormous gum of \$16,000,000 "Where is all this money to come

from? "The taxpayers feel that the interest on the outstanding indebtodness is now over \$1,400,000 and will absorb all the revenue if the debt is

permitted to accumulate."
