Avoid Sedative Cough Medicines. If you want to contribute directly to the occurrence of capillary bronchitis and pneumonia, use cough medicines that contain cocaine, morphine, heroin and other sedatives when you have a cough or cold. An expectorant like Chamberlain's Cough Remedy is what is needed. It cleans out the culture beds or breeding places for the germs of pneumonia and other germ diseases. That is why pneumonia never results from a cold when Chamberlain's Cough Remedy is used. It has a world wide reputation for its cures. It contains no morphine or other sedative. For sale by all dealers.—Advertisement.

A Panama Canal Lighthouse

Photo by American Press Association.

THIS picture shows the lighthouse at Gatun locks used to guide vessels approaching the locks across Gatun lake. Range lights have been established for guidance on long tangents and side lights, spaced about a mile apart, mark each side of the channel. Lighted beacons are also to be used. These are to be built of re-enforced concrete. The sailing lines are marked by range lights except at the entrance to the channel and will be fixed so that a ship will follow a course which will keep it 250 feet from any ship coming in the opposite direction.

HOUSEKEEPERS Must be Watchful

For great efforts are being made in this vicinity to sell baking powders of inferior class, made from alum acids and lime phosphates, both undesirable to those who require high-grade cream of tartar baking powder to make clean and healthful food.

The official Government tests have shown Royal Baking Powder to be a pure, healthful, grape cream of tartar baking powder, of highest strength, and care should be taken to prevent the substitution of any other brand in its place.

Royal Baking Powder costs only a fair price per pound, and is cheaper and better at its price than any other baking powder in the world.
