9:00 p. m. Japanese Fireworks. Free.

9:30 p. m. Patterson's Colored Jubilee Singers and Band Concert. Free.

Dance at Opera House.

FURIOUS STORM SWEEPED COUNTRY

Worst Wind Storm in Twenty-one Years in Alliance—Damage Is Done to Growing Crops

"This is the worst wind storm in western Nebraska in twenty-one years," said Postmaster I. E. Tash last Friday, as he and a Herald reporter braced themselves against a wall for support. "In April, twenty-one years ago, we had a storm something like this," continued Mr. Tash. The wind was so severe for several hours that it was impossible for a woman to make any headway against it on the street. Many people who ordinarily eat dinner at home stayed down town at restaurants, rather than face the wind and dust. The wind carried dust into the air for hundreds of feet. Crops were seriously injured at some places, particularly corn which was whipped and cut by flying particles of dirt.

The chautauqua tent, pitched on the hill near the high school, was completely torn to ribbons. The wind was blowing so hard that it was impossible to take it down before it was blown to pieces.

The street sprinkler heroically worked for an hour or so in the morning, but soon gave up and went for shelter. The water had very little effect upon the great clouds of dust which were blown in from side streets and the country.

At the Burlington depot grounds the lawn fronting on Box Butte avenue was almost completely covered with cinders and gravel blown there from the street. Trains from the east, heading against the wind, were late, while trains from the west were carried along almost altogether by force of the wind, it being necessary to use but little steam.

MANY VAGRANTS INFEST TOWN

Movement of Hoboes and Jobless Men Very Strong—Police Are Busy Keeping Moving

For the last few weeks Alliance has been visited by hundreds of jobless men and hoboes. The police officials have had their hands full keeping them moving and seeing that they got out of town as fast as they came in. Chief of Police Jeffers reports having had as many as sixty-five in a bunch at one time. Friday morning twenty-four men who had come in the night before on freight number forty-six washed up,

lined up by twos and marched in a body to the mayor's office, where two of the crowd who had been selected as spokesmen addressed the mayor and asked him for assistance in helping the crowd procure a meal. The mayor replied that there were no city funds for that purpose and that he could not help them. The men then separated and begged from back doors.

About 11 o'clock several of the men congregated in a bunch on Box Butte avenue. They were ordered to move and some refused to do so. It became necessary for the officers to use their clubs freely and there was a general fight for a short time. The men were finally subdued and driven out of the city limits. They were supplied with funds by a kind hearted business man, bought themselves some supplies and left town by the fast freight line as quickly as possible.

WANTED
To contract the putting up of my hay this year, near Alliance.
J. R. PHELAN.

Cooling Milk Without Ice
When it is impossible to secure ice or a supply of ice-cold water, milk, cream, and butter as well as other foods may be kept cold by the use of a pit or shallow well. The dairy department of the Nebraska College of Agriculture advises that such pits may have a temperature of less than 70 degrees when the actual temperature in the shade is 104 degrees F. When these special pits are used for no other purposes, the milk and cream are usually of a much better quality than would be the case if they were stored in the ordinary cave or root cellar containing vegetables of all sorts. It is a well-known fact that milk and cream readily absorb odors from anything that may stand near them. A well or pit suitable for the cooling of cream should be about ten to fifteen feet deep and can be cemented, bricked, or boarded up as seems best under local conditions. A simple hoisting apparatus with counterweight may be used.

PERU NORMAL NOTES
(By Herald Correspondent)
Miss Ruby Page Ferguson, head of the expression department of the Normal, entertained the students and faculty at chapel Monday.

The Brownville baseball team played here Tuesday afternoon against the Normal team. The score was 6-7 in favor of Peru.

The second number of the lecture course was given in the chapel Tuesday night by the Chicago Male Quartet.

We greatly enjoyed hearing Dr. House sing at chapel Wednesday morning.

Many county clubs are being organized by the students from the various counties.

Miss Clara Beck gave an excellent piano recital in the chapel Wednesday night.

day night. She was assisted by Miss Adalyn Blankenship, who sang several solos. Miss Beck is a student of Miss Rita Thomas, head of the pianoforte department.

Pres. Hayes left Peru Saturday morning, returning Thursday evening. While away he attended a meeting of the state board of education.

Miss Lucile aGass, class of 1913, is visiting Miss Koch for a few days. Miss aGass has been teaching in Farnum during the past year and will teach English and Latin in Plattsmouth high school the ensuing year.

Prof. Jean made a business trip to Valentine last week.

Dr. Claude P. Lewis of Council Bluffs gave a fine organ recital in the Methodist church Thursday evening.

Miss Mattie Ellis, head of the history department of the Normal, will leave Friday for Harvard University, where she will attend the summer session of that institution. In her absence Miss Florence Dye, an alumnus of Peru, and teacher of history in the Crete high school, will have charge of the work in the Normal.

FINED FOR LAW VIOLATION
Railroads Have Been Fined Large Sums Lately for Violation of Quarantine and 28 Hour

Railroads have been fined \$2,450 and costs for the violation of the live stock quarantine law and the 28 hour law according to recent announcements of the department. Other instances of fines imposed for violations of these laws have been made public in previous announcements of the department.

Of the railroads mentioned in the most recent announcements, the Atlantic Coast Line Railroad Co. suffered the largest total fine. A penalty of \$100 and costs was imposed on this railroad in each of eight cases for violation of the live-stock quarantine law. The Mobile & Ohio Railroad Co. also violated this law and was fined a total of \$500 and costs (\$100 and costs being the fine in each of five cases). Two other railroads were fined in similar violations, the Missouri-ansas & Texas Railway Co. being fined \$100 and costs in each of two cases and the Seaboard Air Line Railway Co. \$100 and costs in one case.

For violating the law which stipulates that live stock shall not be confined in the cars for more than 28 hours without unloading for feed, water and rest, five railroads have been recently fined. The Chicago, Rock Island & Pacific Railway Co.

in Nebraska was fined \$250 and costs of \$4.17. The Pennsylvania Railroad was fined \$100, and the Cincinnati, New Orleans & Texas Pacific Railway Co. was fined \$100 and costs of \$18.95 for breaking the same law. The Union Pacific Railroad was fined in one case \$100 and costs of \$22.42 and in another case \$100 and costs of \$22.88, while the Chicago Great Western Railroad Co. was fined \$200 and costs of \$3.67.

\$4,700 Fine for Railroad
For violations of the law that prohibits the confinement of live stock for more than 28 hours without unloading for feed, water and rest, one railroad has been fined \$4,700. This total represents the penalties in 21 cases against the Pittsburgh, Cincinnati, Chicago & St. Louis Railway Co. In addition, costs of \$30.20 had to be paid by the railroad for two of the cases.

In addition to the above announcement, the Department of Agriculture has just issued notice of a total fine of \$1,250 in six cases against the Pennsylvania Co. for violation of the same law. The total costs in the six cases were \$29.70.

RURAL ENGINEER HIRED
Will Consult With Farm Demonstrators on Drainage and Farmstead Planning

A state rural engineer has been secured for part time by the Agricultural Extension Service of the Nebraska College of Agriculture to consult with farm demonstrators on problems of farm drainage and building plans. Many individual and peculiarly difficult problems confront the progressive farmer which, in some instances, require the attention of an expert agricultural engineer. The man elected is Ivan D. Wood, instructor in farm drainage and rural architecture in the department of agricultural engineering of the University of Nebraska. Mr. Wood will retain his position as instructor, which will require the remainder of his time.

To Search for Fossils
Word comes from New York City that the American Museum of Natural History will soon send out a party under the leadership of Albert Thompson to search the fossil field at Agate, Nebr., for specimens of the ancient moropus, a big-clawed ungulate said to have existed about

1,500,000 years ago. The moropus was a strange appearing creature. In life his body resembled a rhinoceros, but his head and neck suggested the horse. His legs were long and the claws on his feet were somewhat like those on his feet were somewhat like those found on the armadillo.

Agate is near Canton, north and west of Alliance. Many Alliance people have visited the wonderful fossil beds at this point. It makes a good day's auto trip.

PAPER ICE BLANKETS—Hamilton's.

Social Cooperation Advocated
That a spirit of cooperation and brotherhood should be developed in the rural community for the uplift of the rural churches and schools, as well as other social institutions, was emphasized last week at the Rural Short Course at the Nebraska College of Agriculture. The development of the best community spirit was regarded as essential to the best cooperation in business. The centering of social life about the rural school and church was advanced as a means of creating interest in farm life and making life in the country more desirable. Pastors, rural school teachers, and rural leaders from var-

ious parts of the state were in attendance.

IF HAIR IS TURNING GRAY, USE SAGE TEA

Don't look old! Try Grandmother's recipe to darken and beautify faded, lifeless hair.

That beautiful, even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mars the face. When it fades, turns gray, streaked and looks dry, wispy and scraggly, just an application or two of Sage and Sulphur enhances its appearance a hundredfold.

Don't bother to prepare the tonic; you can get from any drug store a 50 cent bottle of "Wyeth's Sage and Sulphur Hair Remedy," ready to use. This can always be depended upon to bring back the natural color, thickness and lustre of your hair and remove dandruff, stop scalp itching and falling hair.

Everybody uses "Wyeth's" Sage and Sulphur because it darkens so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through the hair, taking one small strand at a time; by morning the gray hair has disappeared, and after another application it becomes beautifully dark and appears glossy, lustrous and abundant.

YOU owe it to yourself to give your eyes the best there is for them, by having your glasses fitted by
