Safe Home Matches are Wonderfully Cheap

A first-class mechanic could not make, in a day, as many Safe Home matches as you can buy for five cents. Even if he could, the matches would not be of uniform size, shape, length, strength or thickness.

We make Safe Home matches by machinery—millions and millions of them daily.

The wood is treated and cut, the sticks grooved and compressed, and the ends paraffined and

"double dipped"—all by machinery.

You pay no more for Safe Home matches than for the kind you now use. The price is the same—five cents for a large box of perfect matches.

Why perfect! Because non-poisonous. Because non-sparking. Because the sticks do not break when rightly used. Because the heads do not fall off. Because the flame burns evenly. Because Safe Home Matches are impregnated to prevent live charcoal when the flame is extinguished.

All grocers. Five cents a box.
