### DOING AN IM- MENSE BUSINESS

Probably Largest Stocker and Feeder  
Buyers in the World Now at  
Kansas City Market

The live stock business at the Kansas  
City Stock Yards has recently  
been greatly benefited by the firm of  
John J. Lawler locating, with all  
their force, upon that market.

They have been in the stocker and  
feeder business at the Stock Yards,  
Chicago, for the past twenty years,  
and for many years have been the  
largest dealers in stock cattle and  
feeders in the United States. They  
have a tremendous large following in  
all the territory adjacent to the Chi-  
cago market and their customers are  
numbered by the thousands in all the  
eastern states, as well as Illinois and  
Iowa.

This firm is well established and  
holds a large prestige among all cat-  
tle feeders and grazers, and has earned  
a most enviable reputation by  
many years of conscientious and  
square dealing with the public. The  
name of this firm is almost a house-  
hold word in all sections where cat-  
tle are fed and grazed.

Their sales and shipments during  
the year total any place from 150,000  
to 200,000 head.

As the Chicago market has been  
quarantined against the shipment of  
stockers and feeders, they decided to  
locate at the Kansas City Stock  
Yards, and have large and commodi-  
ous offices on the fourth floor of the  
Exchange Building.

They are buying and selling a larg-  
er number of cattle in the Kansas  
City market than they even did in  
Chicago. In fact, their purchases,  
during recent weeks, have been equal  
to from one-tenth to one-eighth of  
the total receipts of cattle at the Kan-  
sas City Stock Yards, which very  
likely makes them the largest buyers  
in that market.

A large number of cattle are now  
being shipped to the Kansas City  
market by shippers from the north-  
ern states who have formerly sold  
the big bulk of their cattle to John  
J. Lawler at the Chicago market, and  
the very large number of cattle that  
they are selling to their customers  
from the eastern states has given a  
much broader outlet for all of these  
cattle at Kansas City.

Many shippers from all over the  
western country have expressed their  
satisfaction of the much better out-  
let and larger volume of purchases  
made at Kansas City since this firm  
has entered that market. They are  
a great benefit to the market and  
should be given generous support,  
both by shippers and buyers who do  
business in Kansas City.

There is a place in Peru far back  
in the fastnesses of the Andes moun-  
tains where the inhabitants do not  
know yet that there is a war in Eur-  
ope. It is also feared that these un-  
fortunate wretches have never heard  
any Ford stories.
