

This **Overland** is a
Newest Beauty
Model 75 F. O. B., Toledo
\$615.00 Roadster **\$595.00**
Electrically Lighted and Started

Many people prefer a car that is smaller, lighter and more economical to run but with the advantages of a larger and higher priced car.

This Overland Model 75 is a comfortable family car with virtually all the advantages of the larger and higher priced cars at a price which is well within your reach.

It has a powerful motor; electric starting and lighting system; high tension magneto ignition; 104 inch wheelbase; cantilever springs; four inch tires; demountable rims; streamline body design. It is handsomely finished in solid black with bright nickel and polished aluminum fittings.

Five adults can ride comfortably.

The tires are four inch all around because we believe in the advantage of large tires.

They insure greater mileage and comfort than can be obtained from the smaller size used on other cars of similar specifications.

It has demountable rims with one extra.

This car is very easy to handle. It responds quickly. Anyone in the family can drive it.

The electric switches are conveniently located on the steering column. This is the same arrangement used on the highest priced cars.

It has the easy working Overland clutch which any woman can operate. The pedals are adjustable for coach. The steering wheel is large and turns easily.

The brakes are large and powerful.

In short, there is everything that makes this car up-to-date and comparable with many cars costing considerably more money.

You will be delighted when you see it. And when you ride in it you'll know instantly that this is your ideal of a modern automobile at your idea of a moderate price.

Other Overland models are—Model 83 five passenger touring car \$750; the famous Overland Six seven passenger touring car \$1145. All prices being f. o. b. Toledo.

GEORGE F. SNYDER, Dealer

MAYORS REPORT OF CONDITIONS IN CITY AT CLOSE OF FISCAL YEAR

(Continued from page 1)
of unpaid warrants which are drawing 2 per cent interest.

The report of the light department will show that, at the present time, there is a balance in the department of \$16,139.88. For the year ending March 15, 1916, this department had a gross earning of \$32,759.30, with a discount of \$2,182.50, operating expenses \$16,915.16, construction \$1,431.82, making a net earning for the year of \$12,228.82. The net earnings of the plant prior to the 33 1-3 per cent reduction was made was \$14,612.03. It might be interesting to know that the kilowatt output at the plant for the year until April 1, 1916, was 528,900 kilowatts, for the year ending April 1, 1915, was 473,060 kilowatts, making an increase of 55,840 kilowatts. At the present time there are 639 consumers, an increase of 75 over the year ending April 1, 1915. This department for the past year has been handled in a very satisfactory manner, and I feel there is undoubtedly a great deal of credit due to the superintendent for the handling of the electric light department.

The report of the water department for the year ending March 15, 1916, will show the gross receipts of \$8,594.73, which expended \$7,369.72 with \$1,092.72 construction. The number of gallons of water pumped for the year ending March 1, 1915, was 79,410,850; for the year ending April 1, 1916, there were 81,131,250 gallons of water pumped, showing an increase of 1,720,400 gallons over the year 1915. The report of this department would show that there is only a net earning of \$132.39. This is due to the fact that there is no record kept of the amount of water given to park, city hall, sewer and street sprinkling. Were these different items handled and properly charged for, then the water department would show a decided increase in the net earnings. The number of customers in this department at the present time is 590.

During the past year the city caused to be installed 16,425 linear feet of curbing and 4,016 linear feet of gutting, at a total cost of \$8,863.17. Of this amount \$3,148.07 is charged against property owners where the work is done. I would recommend to the council that immediate action be taken to have Box Butte avenue, Second, Third and Fifth streets gutted with the least possible delay. It is especially necessary that this work be done as soon as possible in order to produce drainage of these streets. I would also recommend that all side walks where the streets are at grade be lowered to the established grade as soon as possible. I would also recommend that the following streets be placed to the established grades, namely: Niobrara avenue from Fourth to Fifth street on two sides. There would be approximately 300 feet of sidewalk to be lowered on the west side, east on the same street same amount; Sweetwater avenue,

Third street to Fourth street on the west side approximately 150 feet of sidewalk to be lowered and 300 feet of dirt to be removed. On the east side of this street there is 50 feet of sidewalk to be lowered and 300 feet of dirt to be removed; on Fourth street between Sweetwater avenue and Niobrara avenue on the north and south sides approximately 150 feet of dirt to be removed on each side; Fourth street, Sweetwater to Yellowstone, there are no sidewalks to be lowered, but 300 feet of dirt to be removed. The estimated cost of doing this work, lowering the sidewalks, removing the dirt and lowering the trees, would be approximately \$1,542.

In regard to the general health condition of the city of Alliance: The records will show that for the past year there were ten cases of contagious diseases reported to the Health Board. This is exceptionally good record considering the number of cases of contagious diseases that have been reported in the state of Nebraska for the past year. The records will show that this department, as handled by the city physician, has been handled in a very satisfactory manner, and that he has the confidence and the support of all of the physicians in the city.

The question of the proper disposal of the garbage is receiving considerable attention at this time. The condition of our dumping grounds, also the location, is proving very unsatisfactory from a sanitary standpoint, and that the only proper and successful way of handling or disposing of garbage is by the use of an incinerator plant. These plants are in operation all over the United States. I certainly hope that the council will give this matter serious consideration and I feel that the time is rapidly approaching when the city of Alliance will be compelled to dispose of the garbage in a more satisfactory method. An incinerator plant would cost in the neighborhood of from \$8,000 to \$10,000. A plant of this kind would take care of all the rubbish, tin cans, manure and dead animals.

The report of the police department shows that the cost of maintaining the department for the year ending April 1, 1916, was \$2,716.19. The cost of boarding prisoners for the same period was \$559.50. It might be interesting to know that from the first of November, 1915, to March 31, 1916, the city allowed 469 men to sleep in the city hall and light plant. The men were homeless and by allowing this, we found places for these unfortunates to sleep. During the past year there were 325 arrests made, total number of fines and costs collected amounted to \$1,273.95.

Some time ago the city saw fit to take over the cemetery and I find upon examination of the records that there is due from the sale of lots, prior to the time the city took hold of this proposition, the sum of \$874. We are making an effort to collect this amount. At the present time we

have in the cemetery fund a balance of \$190.98. We are planning considerable improvements in the cemetery and hope to complete a large part of these improvements this spring. The old buildings will be torn down, and a much larger building erected. In this building will be made a chapel, also a rest room. We have installed a new well, which will be operated by a gasoline engine. The pipes leading from the well around the cemetery will all be renewed this summer. At the present, we are having over 200 trees planted around the border.

The condition of the fire department shows that the cost of maintaining this department for the past year was \$999. There were 27 fires during this period. The total cost of property was \$3,400, insurance collected \$2,420. The condition, with the exception of our water hose, is in first class shape.

The report of the park board shows there was expended during the year \$1,134.08. I believe that the park will need some outside assistance this year, other than the mill levy in order that the park may be placed in a condition so that it can be enjoyed by our people.

I find, upon investigation, that the total amount of disbursements of the City Library from April 1, 1915, to April 1, 1916, is \$1,255.23. The library building is in need of certain repairs, such as walls painted, wood work varnished, and the basement is unfinished, which is badly needed. At the time that the city assumed the liability of this library, and in justice to the trustees and the entire city, I feel this council should see their way clear to financially assist in making these needed repairs.

PENROSE E. ROMIG, Mayor.

FOR STATE SENATOR

I hereby announce that I am a candidate on the Republican ticket for nomination for the office of State Senator from the 28th district, comprising the counties of Rich, Brown, Cherry, Sheridan, Dawes, Box Butte and Sioux.

If my candidacy meets with your approval I would like such support as you can consistently give me.

H. J. MILLER,
Bassett, Nebraska.

Third Term Not Popular

H. L. Cook, who is showing his face in this issue, is a former old and respected resident of this city and county and has many friends and acquaintances here who will be glad to have a chance to vote for him. Mr. Beckmann, the present Commissioner of Public Lands and Buildings, is opposing Mr. Cook before the primaries. He wants a third term, which is quite unusual in a state office, and will lose some votes on that account. Mr. Cook has served as deputy State Auditor and is a good hustler and will make a first class Commissioner of Public Lands and Buildings, if elected. He will get a lot of votes in this county.—St. Paul Republican, April 6.

Herman Sell, a missionary for the German Evangelical church, returned to Billings Monday, after spending a few days in Alliance.
