GOVERNMENT WISHES TO HELP FARMERS

Happening Recently in Our Own State Emphasizes Good Work Done by Agricultural Agents

In a Nebraska county not long ago the county agent has experienced much difficulty in interesting a certain farmer in proposed agricultural improvement campaigns. This farmer, who was of much influence in the community, considered his own individual success a proof that Government co-operation with farmers is entirely unnecessary. A special representative of the extension office of the United States Department of Agriculture who visited that section was told of the case by the county agent. He went to the farmer and found him cold and unresponsive.

"You are standing in the way of your country when your country is at war," said the special agent to the farmer finally. "Do you realize that?"

"No," said the farmer, "I hadn't thought of it that way."

"Well, do think of it that way awhile," suggested the special agent.

"The man who doesn't help his coun-

try at this time is hurting his country, and to hurt your country when your country is at war is a pretty bad thing to do, don't you think so?"

"You bet I do," said the farmer, thawing out for the first time during the interview. "You don't think I am that kind of a man, do you? I'll do anything for my country. I'll fight—"

"All right," said the agent. "Here's your chance. See that your farm and all the farms in your county increase their yields and their cultivated acreage. It isn't picturesque, but it is service—real service, great and genuine service. Now that's what the Government wants you to do. That's the purpose of these special county organizations. That's what these emergency county agents, like the one in this county, are urging. What about it? Your country wants you to help. Either you will or you won't—and if you won't help your country, you are indirectly helping the enemy. What your country wants you to do is to plant more land, specialize on certain crops, and cultivate so as to increase production. It is all figured out to harmonize with a great national program, scientifically arranged. The community organizations, co-operating in each community throughout the United States, are essential to the realization of this national plan—and that plan is

absolutely necessary of accomplishment if we are to win the war. Now we are trying to organize this county in harmony with this plan. You have opposed it. Don't you see what that means?"

"When is that county meeting?" asked the farmer.

"Tonight."

"I'll be there tonight and make a speech. You are mighty right—I hadn't thought of it that way. You will never have another chance to insinuate that I am not with my country in this war."

The farmer spoke that night. And by a unanimous vote the meeting arranged for organized agricultural work throughout the county.

PALMER WHEELS FOR AEROPLANES

Adoption by the Society of Automotive Engineers, sitting in Washington, of the Palmer rim and wheel for aeroplanes affirms once more the desire of the War Department and agencies working with it to unify all military equipment used by our allies on the western front. The Palmer rim and wheel is at present used on all British aircraft. By adopting it for use on our planes it makes it possible in the event of an accident to either a British or an American machine while landing to replace immediately a shattered wheel with a standard one. The B. F. Goodrich Rubber Company is the sole licensee of the Palmer tire in this country and it was at the suggestion of the Goodrich Company that the society unanimously accepted the British rim and wheel for recommendation to the government. The Goodrich company has sent to all wheelwrights and manufacturers copies of the specifications and have received replies assuring co-operation in hastening the construction of the wheel. The Goodrich Company's act in distributing plans to leading wheel and rim makers was warmly commended by the S. A. E. and indicates clearly how strongly the big industrial corporations have placed their resources and ingenuity at the disposal of Uncle Sam.

At the prices we quote for shed lumber you cannot afford to leave even one pair of wheels unshowered. There is more money lost each year in the deteriorating effects of the weather on implements and tools outside than it would take to build sheds for them all. And the shed lasts a long time.

Dr. Miles' Heart Treatment is highly recommended.

LIVED IN MISERY. "I suffered greatly from nervousness and headaches. The least excitement gave me dreadful pain. I began using Dr. Miles' Nervine and a few days later started to take Dr. Miles' Heart Treatment. I soon got so much better that I was encouraged and continued taking the two remedies until I was so well that work was no bother to me at all."
