SWAT THAT FLY

The following passages are from Dr. Morris' sermon last Sunday eve-

"The common house fly is a pesteferous little creature that inhabits factor compared with the two legged yourself where are the cess pools of most all parts of the globe. In scien-creature that goes round propigating vice, and the breeding places of tific terms he is called "musca domestica," but in spite of this high sounding title he is under grave susipcion, on account of his origin, habits and disposition. The fly feeds on filth and human flesh,-and is especially fond of bald heads. He even sits up of nights to torment his victims.

"The chief breeding places of this little pest are the privy vault, garbage can, and other places of fith. forbid people to expectorate on side- ing the gambling dens, and wide open Under favorable conditions one old mother fly will bring forth a progeny liberty. of more than five quadrillion of flies in a single season. The fly is a deadly It has not been long since people saying identically the same things I foe to the human family, because of contended that saloons were a neces- had said from the platform. HOME GUARDS-

in Europe.

At the regular meeting of the home guards to be held Friday evening every member will be measured for a nw uniform. The guards will be outfitted in regular style with real guns and not ones made of wood. A lot of pep has been engendered into the organization during the last few weeks. R. S. Strong, Chief Pilkington, George Heilman and Jack Gleason being the main factors in the reorganization. As a protective measure for Box Butte County and the industries of this region as the Potash Plants and Railroad yards the home guards are essential. In case of trouble Uncle Sam can rely on the guards of Box Butte County to relieve the government of the necessity of sending out the regulars, who are needed

50% More Power From Each Gallon Of Fuel

UE to its simplified, new type design the Wallis delivers at the draw bar 74% of the power generated by

The Hyatt Texas tests prove this statement. This means that from each gallon of fuel the Wallis tractor gives you 50% more power than other tractors which require 40% to 50% of their power to propel their

Light Weight—A Power Saver

Simplified design of an advanced type enables the Wallis to combine for the first time great power, remarkable speed, and wonderful durability with light weight.

own weight.

The Wallis weighs only 3000 lbs. According to a recent tractor directory it weighs from 1000 to 5000 lbs. less than other tractors designed to do the same work.

The power usually required by other tractors to move this un-necessary weight in the Wallis is turned into draw bar power and

Durability in the Wallis is accomplished by simplified design, ex-

cellence of materials and workmanship.

The frame, for example, is made of steel boiler plate—rolled into a "U" shape. It eliminates all heavy braces, counter braces and I beams. It is the strongest yet lightest construction known to mechanics. This member also serves as crank case base, transmission case, and rear axle housing.

Speed Necessary To Economy

Experienced tractor users know that a tractor should not be judged by the number of plow bottoms it pulls, but how fast it pulls them. Speed is the important factor in work done. The Wallis pulls three 14 inch bottoms 6 to 8 inches deep at a rate of 2½ miles per hour or two 14 inch bottoms at a rate of 3½ miles per hour. This means 10 3-5 acres per day which equals the work of 10 good horses. The average tractor is designed to pull the same load at the rate

of 1% miles per hour or 7 2-5 acres per day.

Thus you can readily figure that this advanced type of tractor saves you 50% of your time in plowing.

Judging The Cost Of A Tractor

Cost is determined by service—not purchase price. The only right way to find out how much any machine really costs is to divide its purchase price by the years of service. Economy is determined by work done.

On this basis the Wallis is proving to users in United States. England, France and Mexico, that with the proper care it will do the greatest amount of work over the longest period of time.

You want this kind of service.

We will gladly give you any further information you desire. Call upon us at any time.

MAZOLA for thrift and quality—in deep frying, sauteing, shortening and salad dressings

Try Our Popular Price Lunch Room and Coffee Shop

All Modern Conveniences—Rooms \$1.00 Up

Under New Management

Mazola is more economical for general cooking than butter, lard or suet-because it can be used over and over again-does not transmittaste or odor from one food to another.

And Food Administrator Hoover asks you to save these animal fats. Mazola is pressed from the heart of golden

American corn—is as pure and sweet as the most delicate food cooked in it.

Thousands of housewives have solved the

fat problem with Mazola-and so can you. Get it from your grocer in punt, quart, half-gallon or gallon tins-the large sizes are most economical. Also ask for the free

Mazola Book of Recipes, or write us direct. Your money refunded if Mazola does not give entire satisfaction.

WHEN YOU WAKE Political Headquarters **UP DRINK GLASS** OF HOT WATER

Wash the poisons and toxins from system before putting more food into stomach.

Says Inside-bathing makes anyone look and feel clean, sweet and refreshed.

Wash yourself on the inside before breakfast like you do on the outside. This is vastly more important because the skin pores do not absorb impuri-ties into the blood, causing illness, while the bowel pores do.

For every ounce of food and drink taken into the stomach, nearly an ounce of waste material must be carried out of the body. If this waste tination, London Tit-Bits says. material is not eliminated day by day it quickly ferments and generates poisons, gases and toxins which are absorbed or sucked into the blood stream, through the lymph ducts which should suck only nourishment to sustain the body.

A splendid health measure is to drink, before breakfast each day, a glass of real hot water with a teaspoonful of limestone phosphate in it, which is a harmless way to wash these poisons, gases and toxins from the stomach, liver, kidneys and bowels; thus cleansing, sweetening and freshening the entire alimentary canal before putting more food into the stomach.

A quarter pound of limestone phosphate costs but very little at the drug store but is sufficient to make anyone an enthusiast on inside-bathing. Men and women who are accustomed to wake up with a dull, aching head or have furred tongue, bad taste, nasty breath, sallow complexion, others who have bilious attacks, acid stomach or constipation are assured of pro-nounced improvement in both health and appearance shortly.
