A decidedly out of the ordinary thing happened in Garden county recently when the Western Land & Cattle company shipped into that section a carload of buffalo and turned them onto the range. The buffalo is, as well the pioneers of western Nebraska know, a very thrifty animal and this herd, though small, should increase to large proportions within a few years and should some time prove the wisdom of the scheme by the earning of great profit to the investors. The transaction was the occasion of an interesting spectacle to the people who were fortunate enough to see for their first time a specimen of the one-time most mighty of animals that roamed the range and which is now an almost extinct breed.

**AN IMPORTANT FACTOR IN CUTTING SHOE EXPENSE**

"Many months of comfort at little expense" is the way Charles A. Pearson of San Diego, California, sums up his experience with Neolin Soles. Mr. Pearson had two pairs of shoes resoled with Neolin Soles, and after wearing them for twenty months writes "I will have to get new shoes sometime, but so far as the soles are concerned, that time seems as far distant as when they were new."

This is typical of the experience millions are having with Neolin Soles. Created by Science to be durable, flexible and waterproof, these soles are an important factor in cutting shoe expense. You can get them on new shoes for the whole family, and for re-soles. They are made by The Goodyear Tire & Rubber Co., Akron, Ohio, who also make Wingfoot Heels—guaranteed to outwear all other heels.
