

**AMERICAN LEGION NOTES**

Victory medal circulars entitled "Issue of Victory Medal Battle Claps, and Claps, for Service in the World War," have just been received by the adjutant of Alliance post, together with applications for same. All ex-service men desiring these circulars may obtain them from Miss Gannon at the court house, the American Legion adjutant in the Reddish block, or from the recruiting officer. Either of these people will help you fill out your application for victory medal and send it in for you if you so desire. Be sure to bring your discharge with you when making application. It is not necessary that it be sent in, however.

All ex-service men are entitled to the victory medal, but only those who saw service in the following major operations are entitled to battle claps: Cambrai, Somme defensive, Lys, Aisne, Montdidier-Novon, Champagne-Marne, Aisne-Marne, Somme offensive, Oise-Aisne, Ypres-Lys, St. Mihiel, Meuse-Argonne, and Vittorio-Veneto. Those not entitled to battle claps but serving in France, Italy, Serbia, Russia and England are entitled to claps for service in those countries excepting that claps are not given for service in both France and England.

While Seattle, Washington, post of the American Legion was giving a dance, a squad of policemen made a raid on the dance hall and arrested the adjutant. The prisoners were rushed before a magistrate, where the commander was charged with "purchasing ice cream without putting up a cash bond." The adjutant was charged with "becoming the father of twins on May 20 without proper permission from the post."

The bonus bill is going through, Parlez vous.  
The bonus bill is going through, Parlez vous.  
The bonus bill is going through, In nineteen hundred and ninety-two, Hinkey, dinkie, parlez vous.

Ninety-five per cent of the Muney, Pa., post wore full uniform in the Memorial Day ceremonies.

One Hundred three disabled Legionnaires of Louisville, Ky., have formed a club, the purpose of which is to give disabled men who have not been through the mill of government training, the benefit of the experience of those who have. The club has a trust fund of \$300.

Every member of the Palestine, Texas, post is said to be a member of some union affiliated with the American Federation of Labor. This post has 126 members.

**FAIRVIEW**

The barn dance at Mr. Lawler's Saturday night was well attended. Mrs. Fred Mason returned home Saturday after spending a month visiting with her daughter at Denver and Sterling, Col.

E. A. Bennett and family visited at the Judevine home Sunday.

The picnic at Wm. Rust's the 4th was attended by a large crowd. Girls, boys and men's foot races, boys and men's wrestling matches and baseball game were some of the sports which took place.

Mrs. Latham and sons went to

Dunlap Sunday to visit with her daughter Mrs. Chas. Wilson. Nels Peterson and wife from the sand hills, visited Sunday at the Otto Matz home.

The Ed Garrett, Brown, Griffith, C. F. Wessell and J. V. Nabb with their families, Willie Nye, Tommie Lawrence and Jay Frazier were some of those who spent the 4th at Berea.

Grandpa Mason and Mrs. Libby visited Tuesday with Grandpa and Grandma Lawrence.

Mrs. Naomi Schoofes, who is visiting her mother Mrs. A. S. Gerdes, was badly shocked by lightning during the storm Tuesday evening.

Grace and Elsie Lawrence spent Tuesday evening at the Ewing home.

J. W. Frazier, T. J. Lawrence, D. R. Lawrence, E. A. Bennett and Ernest Purington were among those who attended the commissioners meeting in town Tuesday.

E. A. Hahn spent from Monday until Wednesday in town.

Nels Nelson cultivated corn for J. V. Nabb the fore part of the week. The rains the fore part of the week have put the crops in this part of the country in fine condition.

Massachusetts parents who had named their baby boy Woodrow Wilson lately appealed to the courts for legal permission to change the youngster's given name. The custom of naming babies after famous public men has its drawbacks not only for the children themselves but also for the names so honored, says Baltimore American. Recently a doctor whose trial and conviction attracted wide-spread attention was found to be named Grover Cleveland. Parents owe something to their helpless offspring in giving them the burden of a great name they may wish either in later life to repudiate or else have to live up to.

Four hundred years since Magellan, is the gist of an exclamation that will be on many lips in Manila, if not in other cities of the Philippine islands, on March 15 of next year. Magellan discovered the islands on that day, in 1521. There is a hint of the many changes that have come to the islands since they were first known to Europeans, in the fact that the quadricentennial will be celebrated by joint action of Filipinos and Americans now composing the predominating population.

The secretary of agriculture conveys the pleasing information that farm workers and farm products are increasing. So to the farmer is due credit for the real and quickest way of bringing down the high cost of living. Now it is in order for his good example to be followed by the city fellow.

An English lord says the allies must stop their disagreements and get together. Well, the only way to do that is to resume the war. In war the allies are at peace among themselves and in peace they are at war among themselves.

France proposes a tax of 10 per cent on bachelors. That is one tax, at least, which married men will regret they can't pay.

North Dakota farmers have been feeding the prairie chickens all winter. Later on the prairie chickens will help feed the farmers.

**ATE NO BREAKFAST FOR OVER A YEAR**

Wisconsin Man Suffered So From Dyspepsia He Could Hardly Get Around

"Actually, two bottles of Tanlac have done me more good than all the other medicines and treatments I have tried put together," said Paul James Kowalski, 1517 Jefferson avenue, Waukesha, Wis., an employe of the Federal Malleable company, in West Allis, Wis.

"For years I have had trouble with my stomach," continued Mr. Kowalski. "My appetite was very poor and for a year I couldn't eat any breakfast at all. Nothing agreed with me, and after every meal I would bloat up terribly with gas, often become nauseated, and finally got so I just dreaded to eat. I had a bad headache all the time and became so dizzy at times I could hardly keep from falling. My nerves were in such bad shape it was almost impossible for me to get a good night's sleep, sometimes lying awake

all night long, and in the mornings I could hardly get out of bed. My kidneys worried me a great deal and I had a severe pain across the small of my back just about all the time. I kept losing weight and finally I became so badly run-down and weak I could barely get around and lost lots of time from my work.

"Some of my friends down at the shop where I work advised me to try Tanlac, saying it had done them a world of good, and the way it went after my troubles was simply remarkable. I had taken only a few doses when I began to improve, and now I feel like a new man. I have a good appetite, everything I eat agrees with me, and I haven't had a headache or dizzy spell since I began taking Tanlac. I am never bothered with my kidneys and the pains have left my back entirely. It will always be a pleasure for me to recommend Tanlac."

Tanlac is sold in Alliance by F. E. Holsten, in Hemingford by Hemingford Merc. Co., in Hoffland by Mallory Grocery Co.

**Eastern Wyoming Promises Big Oil Returns**

Nebraska men have benefitted heavily by investments in the Wyoming oil fields—you will benefit handsomely if you invest your money conservatively and carefully in a well-managed company with ample and diversified holdings.

**EASTERN WYOMING** is today attracting the attention of the oil interests of the country. The falling off of production in southern oil fields and the constantly increasing consumption of gasoline and other oil products, resulting in a depletion of the reserves of the country, is causing oil producers to turn their efforts and their attention to the field which promises the greatest opportunity for development—the state of Wyoming.

During the last eighteen months the discoveries of oil in the eastern part of Wyoming have brought that part of the state to the front. The Lance Creek, Mule Creek and Osage fields are proving that there is great opportunity for development in this territory.

The percentage of failures in wells drilled in this territory is small, in spite of the fact that much of the drilling has been in unproven territory. The chance for successful drilling, when done with care and under good advice and favorable geological conditions, is unusually favorable.

Experienced oil men predict that eastern Wyoming during the coming year will open the eyes of the world to the fact that this territory is underlaid to a large extent with huge bodies of oil bearing sands many of them yet untouched by the drill of the oil prospector.

The nation and the world must have more oil. It is not a question of cost. No product is more essential than this wonder-working fluid—no product aside from food stuffs and clothing is so vital to the happiness and progress of the human race in this advanced age when every human life in one way or another is affected and influenced by the great and indispensable service which petroleum alone can give.

**THE OIL LAND HOLDINGS** of the Wyoming-Northeastern Oil Company were practically all secured during the year 1919 by the men who today are in charge of and directing the affairs of the company. These holdings were carefully selected, under expert geological advice, and are located in the fields described below.

Geological reports have been made on the larger portion of these holdings by such well known geologists as Dr. G. E. Condra, William G. Haldane and Amil A. Anderson. Copies of these reports will be gladly furnished to parties interested in becoming stockholders in this company.

The company has under lease, option and assignment approximately 15,000 acres of Wyoming lands for oil purposes. These holdings are divided into four different fields which include the following

- MULE CREEK OIL FIELD
- CLIFTON-DEWEY FIELD
- "HIDDEN DOME" FIELD
- RED DESERT FIELD

The company is drilling at the present time in the Mule Creek oil field and has drilled to a depth of over 1400 feet. This well should be completed with a few weeks of active drilling. When brought in successfully it will prove approximately 2,600 acres which the company has under lease around and adjacent to the well.

Other holdings of the company have been and are being leased on a royalty basis to syndicates and companies for drilling. With the immense acreage held by the company we should have several rigs drilling our holdings within coming months.

It will pay those interested to visit the holdings of the company. We are always glad to accompany those who wish to go if they will call at our Alliance office, or wire or write when going through.

**THE ORGANIZATION** of this company has been carefully handled and it is officered by the men who have taken an active part in its affairs from the beginning. The company was incorporated under the laws of the State of Nebraska on September 16, 1919, with a capital stock of \$1,000,000, divided into 100,000 shares of the par value of \$10.00 each.

The officers of the company are as follows:  
President—F. A. Bald of Alliance.  
Vice-president and field superintendent—C. M. Looney of Alliance.  
Secretary—Lloyd C. Thomas of Alliance.

Treasurer—A. M. Miller of Hemingford.  
Director—F. W. Melick of Hemingford.  
Director—R. M. Baker of Alliance.  
Director—P. J. Michael of Hemingford.  
Director—C. F. Gruenig of Omaha.  
Director—F. T. Morrison of Omaha.

These men are widely known throughout Nebraska and have associated with them prominent Nebraska business men and professional men who are taking an active part in the company's affairs.

After a thorough and rigid investigation by the Bureau of Securities, Department of Trade and Commerce, State of Nebraska, this company was on June 24, 1920, granted permit No. 915, by the Bureau, authorizing the sale of \$90,000 worth of the stock of the company, the proceeds therefrom to be used as directed in the order—chiefly for development purposes. This is a speculative security and returns on the money invested in the stock of this corporation depend upon the discovery of oil in paying quantities by drilling upon the company's properties.

The company welcomes a thorough investigation by prospective investors.

The amount of stock to be sold by this company is limited. You should investigate quickly. Fill out the coupon attached and mail it to the office of the company without delay.

**A Mile is too Small to Measure by**

Figuring the service of the General Tire by the mile is like trying to measure the ocean with a teaspoon. Users of the General Tire get so many thousands of miles out of their tires that after they pass a certain point it's as hard to realize what this surplus General Service means as it is to comprehend the immensity of the 93 million miles to the sun.

Yesterday people talked in millions—today it's billions—and where only a few years ago 5,000 miles was a big tire record, today users of General Cords are greedy for 20,000 miles and more—little realizing what a lot of extra service they get out of General Tires for the money they pay for them. The average General Cord Tire will pass enough milestones—so that if they were laid end to end they would make an endless stone track more than ten miles long in itself. Isn't that the kind of tire you want—one that is measured by the miles of milestones it passes?  
Buy and try a General Tire today.

**Alliance Tire Works**  
George Mintzer, Prop. Times Building
