CAN'T PUNCTURE NOR BLOW OUT

DAYTON AIRLESS TIRES in the past 9 years have been used by thousands of owners of light passenger and delivery cars in all parts of the civilized world, and have conclusively demonstrated:

- 1st-They can't puncture nor blow out.
2nd-They ride smoothly and comfortably.
3rd-They give much longer wear than the average pneumatic.

They have been endorsed by thousands of satisfied users, including the late George Westinghouse and Edward Grey, formerly Chief Engineer of the Ford Motor Company.

Piers of live, elastic rubber built about one inch apart inside the casing and vulcanized or welded to it take the place of an inner tube. Nothing can happen but wear. We have standardized on 30 x 3 and 30 x 3 1/2, and the price is right. We sell direct to the user from one tire up where we have no dealer. Write for free booklet and price list. We want an exclusive dealer in every county—tire experience not necessary. Excellent chance to build up in a protected territory a very profitable business either by itself or as a side line.
