The action of the city council in raising the occupation tax on saloons, and placing a tax of \$250 on drug stores taking out permits, has created a great deal of talk. House Plants at E. J. Newton's. The grocery store of Rebhause & Casey was closed Friday on a mortgage foreclosure by Wm. Neville and assigned to the Grand Island Mercantile Co., which is also a creditor, and it is now in charge. It is said that the stock and book accounts will be sufficient to settle all claims. The Grand Island company advertises the stock for sale, under foreclosure of mortgage, on April 18th, but as to who the purchaser will be it is of course not known. The collapse is probably due to lack of capital, the boys having started business on considerable borrowed money. Messrs. Casey and Rebhause are young men and their misfortune is regretted by all.

Baby Buggies at Newton's at very low prices. About the most original, convenient and neatest piece of fixtures for a grocery store that we have seen is the dried fruit case at Thompson & Swardworth's which was constructed by the former from plans furnished by the latter. It consists of a series of bins faced with glass, so that the kind and quality of the fruit can be seen at a glance. The bottom of each bin is covered with wire netting and underneath the case is iron for an open ice box. In the summer time a stry fly gets into it, he finds the temperature so cold that he is glad to make his escape at the first opportunity, and as a result the fruit is kept free from the worms which flies breed. The fruit is also kept thoroughly ventilated by the current of air which passes through, and does not become affected by the heat. By the means of a sliding bar, the tops of the bins are locked simultaneously, which is also an advantage, though it may not be so regarded by the small boys who make a habit of faking fruits when the clerk's back is turned. Several traveling men who have examined the case pronounce it the finest thing of the kind they have ever seen, and think Mr. Thompson would have no difficulty in finding a sale for a number of them.

Notice. I will keep on hand a nice assortment of plants through the season. E. J. Newton.

Milk and Elevator Leased. Lost week C. F. Idings made a lease of the North Platte mill and elevator for a term of years, and informs us that he will put the same in operation as soon as a few minor changes can be made in the interior parts. We are glad that this property is not to lay idle, as it is a business of considerable importance to the community. Mr. Idings assumes the mill with rather an unenviable reputation as a tight-rope walker, but we confidently expect him to put the business on a firm footing and find a ready market for its products. Home consumers should give Mr. Idings every possible encouragement in the way of patronage when he gets the mill in operation.

A Good Showing. The 25th annual session of the Mutual Building and Loan Association, of North Platte, which was given publicity by the Tribune, makes a most satisfactory showing. It shows where much of the savings of the wage workers of the city go, for during the year ending March 31, the receipts of the association were \$205,587.17; while the disbursements for the same period were \$132,922.25. The economy with which the association is managed, considering the amount of funds handled, is really wonderful, for the Mutual Building and Loan Association has been in existence for 25 years, and has received in the shape of deposits, transfers and fees, so that only \$100,000 has been taken from the fund. Another remarkable feature of that of all loans made, only one cent has been necessary, and in that respect the association suffered no loss. The series started this month and gives a number of shares have been sold. The condition of the association is such that it has managed its business very wisely.

Heinrich Stolle, a nephew of V. Von Goetz, is in Chicago putting up some of the finest work in the city. Von Goetz received a crate of crockery last week the contents of which were badly broken. The crate was shipped by an Omaha firm but as it came from England it may not have been packed by them and it is hard to tell where the damage was done. It is expected that some should be broken, but it is very unusual for over one half to be broken.
