WHY?-If the versatile and poly sided able (?) correspondent of the Telegraph is anxious to obtain in formation relative to the management of the United States postal system why does he not address the department at Washington, instead of interrogating the alleged editor of an obscure rabidly partisan paper of the opposite political faith from that of the administration and thus by insinuation by guilty of deceit? This certainly would have been the more manly policy But manliness is a stranger to the correspondent in question.

A DEMOCRAT.

the Springfield (Mass.) Republican says: "Bicycle riders who think that no one can tell how fast they are riding as they "scorch" along the streets are very much mistaken. It is the easiest thing in the world to measure their speed accurately enough to swear to it without reading the cyclometer they carry or knowing the distance they ride. All that is necessary is for the observer to note carefully the number of revolutions the pedals make in a given period of time, say five sec--The following item from the onds, or a single second, and then breaking the law or not. Whenever a rider revolves his pedals once in a second it is practically certain that he is riding faster than eight miles an hour. If his bicycle is geared at 60, one revolution a second will carry him 103/ miles an hour, if at 63 his speed is a half-mile faster, at 68 it is 121/4 miles, at 72 it is almost 13 miles. and at 76 it is a little more than 134. One revolution a second is. therefore, faster than the rider of a 56 gear can legally ride. Any rider can easily satisfy himself that these fast he is riding."
