A chicken roost in the west end was raided last night. It is not fair to presume, however, that the colored "gemmen" with us last evening are the guilty parties.

Prof. Garlich should reorganize his choral society and give a series of low price concerts. North Platte people are lovers of music, as attested by the audiences present at the last two concerts given at the opera house.

A newspaper will be launched at Hershey about January 1st and it is said that Sutherland will also have a paper before long. The editors are the only class of people who are getting rich these days and it is not strange that so many new papers are being established.

The Slayton Jubilee singers had a large audience last night and gave an entertainment lasting two hours. They were very good vocalists, but had they sang more of the old-time southern melodies, and infused a little more life into their music, the audience would have been better satisfied. The singing by the male quartette was particularly good. Nearly every song, however, was loudly applauded, and the company responded with encores.

The proposed sugar beet convention at Fremont seems to be assuming material shape. The sugar beet question is one in which the people of this section should interest themselves. If the proper efforts are made we believe that within the next two years reducing works can be established at several points in this county, and that a refinery which will use the output of these reduction factories can be secured for North Platte. If the farmer on irrigated lands wishes to attain the best results he must diversify his crops, and the addition of the sugar beet to the crops already raised would prove profitable. It is therefore to his interest that these factories be secured.

Under the head of "More or less Personal," in the State Journal yesterday there appeared the following: "What we want in our business," said E. F. Seeburger, superintendent of the North Platte Land and Water company, "is the repeal of the herd law in western Nebraska. That would compel my people to fence 18,000 acres of land, but they are ready to do it at any time. When the day of the irrigation farmer will have come every farmer in the valley can have a small herd of cattle that can range on the high lands in the summer and when fall comes they can be brought in and kept or fattened on the feed that will be abundant only where irrigation is possible. Even the 'divide' farmer in the western half of the state would be benefited by a change in the herd law. He could fence his land at small expense and when every other man did the same he could let his cattle feed at will on the choicest and best grass to be found on a thousand hills. Perhaps the time isn't ripe for this yet, but it will come and when it does western Nebraska will be in the swim."

"The Fast Mail" which appears at the opera house Monday evening next is said to be the most successful railroad and scenic melodrama on the road this season. Mr. L. J. Carter, the author and manager, has contrived to weave into a consistent story nearly all the good points of the sensational drama. The climax of each act is strong enough to sustain the whole play, yet so well graded are the features of the piece that one views with increasing interest through the five acts, the murder and the clever trick with the Grandfather's Clock in the first act; the Mississippi river steamer, its engine room showing a practical furnace, and the explosion with "complete change of scene behind a curtain of rising smoke," behind which is the wreck, as the curtain falls on the second act; the "life-size" freight train, with its realistic engine and sixteen box-cars, with their familiar lettering followed, at the close of the third act, by "The Fast Mail," the dago dive of the fourth act and the thrilling incidents and hair-breadth escapes which take place there; and then the "full front view of Niagara Falls, as seen from the centre of suspension bridge," upon which the final curtain descends.

Dr. Sawyer—Dear Sir: Having used your Pastilles, I can recommend them to the public. I have been attended by four different doctors, but one and a half boxes of your medicine has done me more good than all of them. How the Pullman Cars Are Named. Miss Florence Pullman, daughter of the head of the company, is said to draw a salary of \$10,000 a year for naming cars. In the performance of her duties Miss Pullman evidences a decided preference for names which sound euphoniously and which have a soft and musical quality.

Many of the names of the cars are of Spanish origin. They are the names of countries, rivers, historic towns, battlefields, flowers and geographical names miscellaneous selected. Such names as Guatemala, Brazil, Guiana, Peru, Chile, Mexico and the Central American states are frequently seen. Floral names, such as Narcissus, Sweetbrier, Geranium, May Bells and other floral favorites are common, while Windsor, Worcester, Indianapolis and the names of states are also common. Germania, Italy, Egypt, etc., are often seen.

There is a fine discrimination displayed in the naming of cars for special service. For instance, dining cars are in all cases named after celebrated cooks, as Savarin, and the cooks of famous men and women. There are cars named after the cook of Queen Victoria (Francatelli) and of Emperor William of Germany, the president of France, and noted chefs of mention in the literature of cooking.

Smoking cars attached to such trains as the limited express are given names which suggest luxury and leisurely enjoyment, as Sultan, Khedive, Musselman, etc. Observation cars are nearly always named after some famous place of scenic beauty, as Yellowstone, Yosemite, Appalachian, Watkins Glen, Niagara, etc.—Pittsburg Post.
