Rev. Mr. Haley is not sustained in his Y. M. C. A. action by at least two Catholic papers to whom he addressed the letter which was given publicity in these columns last week. Both papers we have seen do not seem to think there is likely any harm to come to a Catholic who holds an associate membership in the Y. M. C. A.—and this is the only membership they can hold. Only members of evangelical churches can be active members of the association.

 Yesterday at noon John H. Day executed a chattel mortgage in the sum of two thousand dollars to his father, David Day, and the latter took possession of the stock of goods owned by the former. The mortgage was given to secure eleven hundred dollars which Mr. Day had loaned his son and for a debt of nine hundred dollars which he assumed at a local bank. Other claims aggregating about three thousand dollars have been filed. The stock will inventory about four thousand dollars, and this with the book accounts will probably pay two-thirds the indebtedness. **THE TRIBUNE**, together with citizens generally, regret that financial misfortune has overtaken Mr. Day.

Teeth and Eyesight.

It is not a generally understood fact that the condition of the teeth has much to do with the health, beauty and usefulness of the eyes. That an ulcerated tooth will often cause extreme inflammation of the eyes is true, and a case is reported of almost total blindness caused by the teeth crowding together. A half grown boy, who had complained of almost incessant uneasiness in his jaws and had been visited with periodical attacks of the most violent toothache, retired one night in his usual condition, but upon awakening the next morning it was discovered that he was blind. The eyes presented a most unnatural appearance and the countenance was strained and distressed. After a good deal of investigation it was decided to remove some of his teeth and see if this would afford relief. Six teeth were extracted and the boy was given sedative treatment. After a few days the sight became normal and there has been no return of the difficulty. Children who appear to have too many teeth should be carefully looked after, especially if they complain of their eyes in any way. Sometimes the symptoms are only secondary, but an acute diagnostician will speedily detect the exact state of the case.—New York Ledger.
