### How to Overcome Bashfulness.

You will overcome your bashfulness by going frequently into society, and endeavoring to lose your self-consciousness. Try to act naturally and without restraint, no matter where you are; and do not imagine that the eyes and thoughts of the entire company are constantly concentrated on you, eagerly awaiting every expression that comes from your lips. It is this kind of self-consciousness which makes men bashful.—New York Weekly.

**How to Make Ice.**  
Water in a shallow pan, in a sheltered place, will freeze even when the thermometer is above the freezing point. This is due to the rapid loss of heat of the earth after nightfall. In some hot countries ice is obtained in commercial quantities by setting shallow earthenware pans of water on the ground protected from the wind.

**Mexican Cocktails Are Powerful.**  
American barrooms are multiplying in the City of Mexico. Their so-called "American drinks" are almost as deadly as knockout drops, and the imbibers of them are very likely to be given the chance to sober up in the police station. Three Mexican cocktails are usually powerful enough to paralyze a mule.
