ECZEMA'S ITCH IS TORTURE.

Eczeema is caused by an acid humor in the blood coming in contact with the skin and producing great redness and inflammation; little pustular eruptions form and discharge a thin, sticky fluid, which dries and scales off; sometimes the skin is hard, dry and fissured. Eczeema in any form is a tormenting, stubborn disease, and the itching and burning at times are almost unbearable; the acid burning humor seems to ooze out and set the skin on fire. Salves, washes and other external applications do any real good, for as long as the poison remains in the blood it will keep the skin irritated.

BAD FORM OF TETTER.

"For three years I had Tetter on my hands, which caused them to swell to twice their natural size. Part of the time the disease was in the form of running sores, very painful, and causing me much discomfort. Four doctors said the Tetter had progressed too far to be cured, and they could do nothing for me. I took only three bottles of S. S. S. and was completely cured. This was fifteen years ago, and I have never since seen any sign of my old trouble."—Mrs. L. B. Jackson, 1414 McGee St., Kansas City, Mo.

Many eastern papers are depicting our calamities greater than they are, or have been, during the past inclement weather, by stating that a heavy gale prevailed all over the state. If such had been the case the loss of life and property would have been tremendous, as the mercury took a drop almost unheard of before. So far, only two deaths are reported and they were in the northeastern part of the state. We have heard of no losses of stock in this or adjoining counties.—Ogalalla News.
