Dear reader, you will notice that a gift from J. D. Rockefeller to some university is always followed by a raise of a cent a gallon in the price of coal oil. You will also notice that the increase in the pay of railroad employes is followed by an increase of freight rates. It is the public that puts up the money for Rockefeller's gifts and it is the public that pays the railroad men their advance in wages.

The supper given by the Episcopal Guild was largely patronized, over three hundred persons being served, and many compliments on the quality of the meal were expressed. At this time it is not definitely known whether the high school football team will go to Kearney on Thanksgiving Day but it is probable that it will. Prof. Orr would like to raise a sufficient sum to have the Kearney team come here, but as it would require about one hundred dollars to have them come, he is somewhat doubtful about being able to secure that amount. In case the sufficient sum is subscribed the game will be made free to all.

M. C. Harrington says that 2,000 cars of hay of the 1902 crop will be shipped from North Platte, Gannett and Birdwood. The average car load is eleven tons and the average price will not fall below \$7 per ton. The value of the hay shipments from these three points will therefore be one hundred and fifty-four thousand dollars. Other points in the county will ship 1500 cars, so that the total value of the 1902 hay crop shipped out of Lincoln county will reach nearly two hundred and seventy-five thousand dollars. Hay is king in Lincoln county this year.

Langdon Succeeds Stubbs.

Effective today, Harry C. Langdon succeeds J. H. Stubbs as division foreman in this city, and he has entered upon his duties. This change, it is understood, has been contemplated for a couple of weeks, but was not formally announced by Supt. of Motive Power McKeen until late last evening.

Mr. Stubbs has been offered the general foremanship of the large shops at Armstrong, Kansas, but we understand he is undecided as to whether he will accept. Mr. Stubbs has proven a popular official and many will regret to have him leave.

Mr. Langdon is believed by all to be a mighty good man for the place. He has had many years experience as an engineer on the road, and for two years or more has filled the position of traveling engineer on the Nebraska division. His promotion has been well earned and we predict that his services as foreman will prove very satisfactory to the company and popular with the employees. THE TRIBUNE heartily congratulates Mr. Langdon on his promotion.

Mr. and Mrs. Geo. C. Stoddard arrived in town last night.

W. L. May, receiver of the People's State Bank of Gothenburg, began an action today in the county court against J. L. Lewis and wife to recover a debt of \$325.

AMERICAN AUDIENCES.

Men and Women and Their Effect Upon Public Meetings.

American audiences are strangely alike in some things and strangely dissimilar in others. A good committee will take as much pains in the arrangement of its audience as of its speakers. An audience seated without crowding is seldom enthusiastic. Neither is an audience whose hands are occupied with bundles or umbrellas, an audience largely composed of women or an audience in a cold room. The easiest audiences to address, the most responsive and inspiring, are those composed of men crowded and packed together and warm.

Women naturally do not applaud or cheer. They are by instinct more self-restrained in the public expression of their emotions than men. Every public speaker is complimented by their presence, knowing that their quiet word at home is oftentimes more effective in results than the most enthusiastic shouting on the street corners by the other sex. In a public meeting, however, the audience gets its cue from those nearest the speaker. I remember well two audiences, both from the same social class, both crowded, both in large theaters and both largely attended by women. One happened to be in Colorado, one in Massachusetts. In one meeting the orchestra was reserved for women. In the other meeting the men had the orchestra and the women had the lower gallery and all the boxes. In both cases the audiences were entirely friendly to the speakers. The second meeting was marked by wild enthusiasm, the first one by respectful attention. In the second case the mass of men in the orchestra urged on the speakers by continued applause. In the first case the men in the galleries who started to applaud were checked because between them and the speakers was a mass of absolutely silent femininity in the orchestra. I do not say that one meeting was less effective than the other, but the difference in the strain on the speaker was marked.—From "The Spellbinder," by Colonel Curtis Guild, Jr., in Scribner's.
