

THE POINT IS

If your eyes are evincing the slightest kind of trouble: have this attended to at once. By doing so you might be able to remedy the defect with the wearing of glasses for but a limited period, the glasses aiding Nature materially in having the eyes assume the former good condition. Of course go to a good optician. Our reputation is our stock in trade.

Where the Shoe Pinches.

Why do you insure your house, and furniture, and stable, against fire?

Because if you don't, and they burn up, the loss will fall on you.

Why do you neglect to insure your life?

Because if you die—and you will die some day—the loss will not fall on you but on somebody else—your wife or daughter, or aged mother, or invalid sister or some other defenceless dependent.

You haven't viewed the question in this way? Then think it over, and drop a card to the undersigned.
