**A CRATER TOWN.**  
Where the Inhabitants Build Ships Inside Extinct Volcanoes.

Saba, in the West Indies, is one of the most extraordinary places in the world. By courtesy it is called an island, but it is really nothing more than the summit of an extinct volcano sticking up out of the sea.

Inside the crater live the only inhabitants of Saba. They live there because there is nowhere else for them to live, the outside slopes being nearly as steep as the sides of a house.

The place belongs to Holland, and the people are all Dutch. Nevertheless they speak English as their native tongue. They call their crater town Bottom because it is situated on the top of a mountain.

Although surrounded on all sides by the sea, they often spend weeks without seeing it, for that involves a long climb up to the rim of the crater. Still less frequently do they touch salt water, because to do so they must, in addition, climb downward for a distance of 1,500 feet by a precipitous rock hewn path known as "the ladder."

It is, however, in regard to their staple industry that these Dutch people who speak English and who live aloft in a volcano in a summit city called Bottom reach the extreme of topography. One might imagine them making balloons or kites or, in fact, anything but what they do make, which is ships—not ocean going liners, but good, serviceable schooners and luggers, whose reputo is great all over the Windward Islands. The ships when finished have to be hauled up to the rim of the crater and then lowered over a precipice into the sea.—Exchange.

Look them over—you won't need glasses to see the good qualities of our Shoes.

Smart, clean-cut styles—new spring models that mean a correct finishing touch to your appearance, to say nothing of the long wear and consequent satisfaction.

**GRAND SPRING OPENING.**  
All the Latest Creations in Spring Millinery.  
FRIDAY AND SATURDAY of this week.

I want every lady in North Platte to see my display this season.

Miss Louisa Matthies in charge of trimming department.

PRICES REASONABLE.

MRS. G. S. HUFFMAN.

To the Voters of the Second Ward.  
Most of you are aware that I am a candidate for re-election as councilman from the Second ward.

I do not aspire politically and never held a political office until two years ago when I was prevailed upon by a great many citizens of both parties to accept the nomination on the republican ticket.

I have been criticized by some of the "would-be boosters" because I did not favor levying a higher tax. I believe in economy in city affairs and did not favor a big levy for the reason that the increased valuation placed on all city property last year would have made our taxes higher and I consider them high enough already, and on account of the increased valuation a lower levy raised as much money as the high levy did the year before and it was not necessary to tax the people any heavier.

The Water Co. and its supporters are against my re-election because I have been nominated again by the republican convention, also by petition.

I did not favor giving them the 29 year franchise they wanted. I opposed this for the principal reason that if granted it also meant high taxes to pay hydrant rental, besides high water rates, and it gave the Company the right to place a meter on any or all consumers and to charge a high rate, with a minimum charge of \$1.00 per month, all of which I did not consider for the best interests of North Platte.

If elected I will do what I think is fair with the Water Co. to settle the water question and at the same time guard the interests of the city.

If you think I am doing my duty I ask your support and that you go to the polls and cast your vote for me.

If re-elected I will continue for two years more the thankless job at \$4.16 per month and do what I think is for the best interests of North Platte.

Yours very truly,  
E. R. GOODMAN.

**To Begin Work in a Few Days.**  
The Union Pacific is making preparations to push the working of making the grade for the new railroad from Kearney to North Platte with characteristic energy. Men and tools are being shipped in and the work will be under way in a few days. Thursday a carload of Italian laborers were shipped in from Omaha and will be employed on the grade.

Besides this double track from North Platte to Kearney, the Union Pacific is making other and greater plans for more extensive improvements. The rumor has been practical verified that a double line will be made east from Cheyenne.—Kearney Hub.

**Boosting the Y. M. C. A.**

**Look Well Dressed**  
**All The Time.**

Look at any well dressed man and you will see that it's the Fit and the Good Shape of his clothes that gives them style and makes him stand out in a group of men.

All tailors realize that they must put enough style into their clothes to make them pass muster while they are new.

But where is the tailor who can make clothes that will keep that good shape and style?

You know that most clothes soon wrinkle and bag and sag. Damp weather makes the trouble, because most clothes shrink a trifle on your back; not much, but just enough to ruin the style.

We sell Royal Tailoring. And the Royal Tailors of Chicago and New York use a shrinking process that takes out every particle out of the cloth before it is tailored. Come in and see our 500 patterns.
