## RAILROAD NOTES.

### Daily Service on Branch.

Beginning yesterday a daily train service was inaugurated on the North River branch; that is there will be a train each way each day. The service will extend through to Northport. Supt. McKeown went over the branch the latter part of last week and after studying conditions, concluded that the traffic justified daily service. This additional train will be highly appreciated by the people of the valley.

Fred Fry returned yesterday from a visit with friends in Grand Island.

Verne Langford, time-keeper on the North River branch, spent Sunday in town.

An additional switch engine of the standard class was sent to this terminal Saturday and placed in service.

M. K. Barnum, at one time district foreman at this terminal, spent Sunday and yesterday as the guest of Mr. and Mrs. Geo. T. Field.

Orders for 150 cars of sand from the ice lake east of town were received last week, but could not be filled on account of the bottom of the lake being covered with water which seeped in through the headgate.

The daily consumption of coal by the Union Pacific at this terminal has averaged 325 tons for the past six weeks. The stock of storage coal in the local yards is now twenty thousand tons, but the stock is diminishing daily.

John Buckhorn, a Second district brakeman, fell from a car at Brady Friday and sustained severe bruises. He was brought to this city on the local, medical attention given him, and was then sent to his home in Grand Island.

The ice lake east of town is being put in shape preparatory to filling it with water from which to harvest part of the ice needed at this terminal. It is the intention of the Pacific Fruit Express Co., to put in an artificial ice plant at North Platte in the future, but probably not in time to supply ice for next season.

A local official says that the tonnage now passing over the Union Pacific is greater than during 1907, which was the record breaking year. Last Sunday there were fourteen freights from the west and twelve from the east into this terminal. This is one train less than for the same date in 1907, but the tonnage per train Sunday was much heavier than 1907.

During the past month or so there has, owing to heavy traffic, been many delays to passenger trains on the Second district, and Assistant Master Mechanic Likert has been at Grand Island for several days helping to expedite matters. The Third district with its single track, has fewer delays than the Second with its long stretch of double track.

The system used is ranked among the best and its use enables one to get most graceful lines and curves and insures a perfectly fitting garment.

The Presbyterian Christian Endeavor is arranging for a novel entertainment Friday evening of this week. They have an itinerary that puts Cook's tours in the shade. You can visit the land of wind-mills and dykes; you may even get a glimpse of that wonderful princess; the country of tea and rice and flirt with the slant-eyed maidens. In the Emerald Isle where they eat tattie skins and may make goo-goo eyes at the lassies and kiss the Blarney stone, or vice versa. Then visit the gypsy camp and have your fortune told by these dusky gypsies. O it's a fine trip all right and you will think so too. Tourists are expected to meet at Uncle Sam's depot 214 West Fifth St., where tickets and transportation can be secured.

## MEN WHO MAKE MONEY.

Are those who use their own judgment and not hesitate and procrastinate when a good opportunity is offered. The big profits in any business or investment are made by those who BUY AT THE INCEPTION OR BEGINNING of the enterprise—who GETS IN ON THE GROUND FLOOR—not by the man who waits until the price reaches the top, nor the one who takes everyones' judgment but his own although the party appealed to may not know anything about the proposition in question and perhaps not much of anything else.

### No Proposition was ever Knocked and Atagonized

more persistently and vicious than the Drainage of the Everglades, and those who prefer to get information in lieu of all the proof, indorsement and information furnished by reliable authorities better not waste their time nor ours.

We are colonizing 180,000 acres of DRAINED EVERGLADE LAND lying on the east coast of Southern Florida between Palm Beach and Miami. Rich, deep muck soil; in fact, there is no better soil in the world, an ideal climate, very profitable crops, good market, intelligent people, and we are selling this land at a price that does not bar anyone. It is an exceptional opportunity for a profitable investment or a home to those who are willing to use their own judgment, and they are the ones that always succeed.

The state of Florida is draining this land; and the drainage of the Everglades is past all question and doubt, and has become to those who know, another miracle to this great world of progress.

At the beginning of the drainage of the Everglades, men who were well posted said if the Everglades land can not be drained you will lose if you buy at \$1.00 per acre; when drained you would be stealing the same at 100.00 per acre.

If you want to profit by development and the advance in price, buy now and you will never regret it. We will be glad to give you any further information, and kindly invite you to call and talk this proposition over with us.

## Florida Fruit Lands Company,

W. A. CAUFFMAN, State Agent, Odd Fellows' Building.
